So many have claimed to be centenarians that Dr. H. Agnew in the interest of medical science has gone to the trouble to trace the authenticity of many of these reports, and finds upon investigation but a very few have reached the advanced age of one hundred.

OSGON by way of trying to please the many new comers to the state has the past week been busy adding some Eastern improvements to her weather. One morning we were treated to a pour down that came with force enough to wet any native that ventured out, many times thunder and lightning came with lighter showers, and one evening there came a wind like our trees had never known, whilst we were filled with pity listening to them creak and groan with such abuse, and calling it an ill wind to treat them so. We found for the poor editor's good, this wind had brought some secrets, and left them for her use. One from the banks of the McKenzie came to our ears in such a hurried way that we could not catch it all.

THE LOFTY intellect of our esteemed contemporary cannot be held with bit and bridle to the strict road of facts but like Pegasus (with which as it is a constellation, our fellow editor is doubtless familiar) soars through all the airy arches of the blue expanse. If you please, Bro. Bronsough, let us have fewer flights of imagination in the domain of epistolary literature.
