Hop Hanvest.-A few hop growers com-menced picking their crop this week, but picking will not generally commence until next Monday, when laborers of all description, men, women and children, may find fairly remunerative employment in the hop fields. The price of hops being very low this year, growers will make a slight reduction in prices paid for picking; but as the crop is heavy the pickers will probably make as much as in average years. They should be willing to pick for a lower price, else the hop growers cannot at present prices afford to gather their
