WOMEN AS MONEY-MAKERS.

They Do Not Sneeced as Well as Men Because They Are Better.

When woman has to concern herself with the material necessities of life she descends from a higher plane than man. She must often stoop to conquer. Human'ty has made immense strides since it was first heard of, but it has a great way yel to get before it reaches the repose of perfect harmony and crowns a finished world. The angel in man has fatally bruised the head of the brute in man, but the brute still bites at the head of the angel.

As between the angel and the brute. I think our own country leads the world. The unquestionable claim of women, the deference due to women, the sacredness of her physical inferiority and of her spiritual superiority, are not only a commanding instinct, but clearly defined idea in American man-

A thousand violations on the part of both men and women do not annihilate this fact. Thousands of women earning their own living, thousands of wives working harder than self-supporting maidens, thousands of both doing their work with or without protest, nay, even it with rejoicing, do not affect the fact.

I am a man of desperate fortunes, that is, a man whose friends are dead, for I never simes at any other fortune than in friends. not reached the ideal life. It is much that we have reached a point where we can catch glimpses of the Promised Land.

At first sight it seems ideal to say to women who are wearing themselves out in doing work that should be done by servants, or to a world in which a large part of the household work not only, but of outside work as well, is done by women, that ultimately and ideally they out not work at all. But in any comparison of their effectiveness with that of men, it certainly should never | Sell your poorest horses. Always keep the best young females to breed as they mature. that of men, it certainly should never well in sight, that however unsuccessful their efforts be, it is in a field which they are not made to cultivate. It is better that they cultivate that field than that they be idle in their own or they starve in their neighbors'.

Many women are not sufficiently developed to discern their own peculiar work.

Without discerning it they do a great deal of it instinctively in the lower deal of it instinctively in the lower fields where they are forced to live, but this means acquiring all the bauquet of old from which they will one day be graduated. But always it should be held upon all sides to the light that women's real work is on character, her surest weapon is influence. She can buy and sell, and cook and sew, and wash and iron, because she is still of the earth earthy, but she can not do it as well as a man because she is not so much of an earth creature as he. As a matter of fact, even in this favored country, where not are the words. Scott's Enuision to only gives flesh and strength by virtue of its own nutritions properties, but caeates an appetite for food that builds up the wasted body. "I have been using Scott's Enuision for several years, and an pleased with its action. My patients say it is pleasant and palatable, and all grow stronger and gain flesh from the use of it. I use it in all cases of Wasting Diseases, and it is specially useful for children when nutrient madication is needed, as in Marasmus."—T. W. Pinnes, M.D., Knowdle, Ala. men pay to women as women, not as ladies, or beiles, or beauties, an extraordinary deference, the mass of wives work as hard as the mass of husbands. Their spiritual superiority is signified

business, not in her own. The woman who makes a real failure, a failure in her own business, is the unloved woman, the ungracious woman, the grasping, the selfish, the repressive, the unsympathizing, the censorious, the untruthful, the woman who is a center of discomfort, a source of anxioty, an object of avoldance, instead of being that gentle, consoling, considerate, motherly magnet which draws unto itself all human want, and woe, and bliss, and aspiration. - Minneapolis Star.

THE HENNEPIN CANAL.

Proposed Ronte and Estimated Cost of the Great Water-Way.

The plan of making a waterway from the bend of the Illinois river at Hennepin to the Mississippi river was first proposed in 1866 by a surveyor who had Investigated the route. The line was surveyed in 1870, but nothing was done about it. In 1882 the project had so far assumed definite shape that a survey of the route was provided for by an act of Congress. Since then a bill for the appropriation of money needed to begin the scual excavation of the canal has been before each session of Congress, but has not yet been carried through, owing to the opposition on the part of some members from other States-unreasonable because the construction of the line would be an undoubted advantage to the entire commerce of the West and Northwest. The Hennepin Canal, as projected, begins in the Henry Pool, twelve miles west of La-Salle, rising two hundred and five feet to the summit in eighteen miles; at the twenty-sixth mile a navigable feeder thirty-seven miles long reaches to the Rock river at Dixon. From the feeder junction two lines have been surveyed; the Marais d'Osier line, the most northerly, and somewhat the shorter line, and the Rock Island line, which follows a course some miles south of the other. The Marais d'Osier line extends northwest from the junction to the Mississippi above Rock Island Rapids, near Albany. The descent from the summit is seventy-five feet, and the distance sixty-four miles from the Illinois. The Rock Island route leaves the main line near Green River Crossing, leading west to Rock river, which is followed by slack-water to near the mouth. The descent is one hundred and one feet and the distance seventy-seven miles from the Illinois. The estimated cost of construction by the Marais d'Osier route, is \$5,811,866; by the Rock Island route,

\$6,709,836.—Chiengy Inter-Ocean.

STARTLING DISCOVERY.

The discovery by the lababitants of a locality hitherto mayleited by the resultent scourge of fever and agus, that it exists in their very mids!, is decidedly startling. Such discoveries are made at every sasson, in every part of the Union. Subsequently, when it is ascertained, as it invariably is at such timest through the valuable experience of some one who has been benefitted and cured, that flootetter's Stomach Bitters is a thoroughly efficacious eradicator of the malarial poison, and a means of fortifying the system against it, a feeling of more security and tranquility reigns throughout the whole neighborhood. Besides the febrile forms of malarial disease, dumb agus and agus cake are removed by the patent action of the Bitters, to which science also gives its sanction as a remedy for rhoumstism, dyspepsia, constipation, liver complaine, debility, somey troubles, and all diseases impairing the organs of digostion and assimilation.

IN LOVE'S HARNESS.

Their spiritual superiority is signified chiefly in this—that the women work for love, the men for money.

The woman who falls in her business is not necessarily the woman who sinks beneath the toil of the kitchen, or who pricks her life out with the needle, or who can not make both ends meet in a dry-goods establishment or a milliner's shop. Such a woman falls in man's factor of the manufactures, that it will give satisfaction in every case, or unoney will be refunded. This guarantee has been printed on shop. Such a woman fails in man's faction in every case, or money will be re-funded. This guarantee has been printed on the bottle-wrapper, and faithfully carried out for many years.

If a man cope not for that which baffleth hepe, he shall not find it, for it is past searching for and past finding out.

CURED OF MALARIA.

22 FLORIDA ST., ELIZABETH N. J., March 17, 1884. I have been using ALLCOCK's POROUS PLASTERS for the last five years. Some two years ago, after having been sick for upwards of six menths with malaria, I found myself with an enlarged spleen, dyspeptic, and constantly troubled with a headache, and constantly troubled with a headache, and my kidneys did not act very well either. Having spent most of my money for medicine and medi al ad-vice, I thought to save expense I would use Allcock's Ponous Plasters, two co the small of my back, one on the spicen or ague cake, and one on the pit of the stom-ach, just under the breast-bone. I con-tinued using the Plasters about thirty days, changing them every week. At the end of that time I was perfectly well, and have remained so ever since.

-Robert J. Burdette recently received a notification at Livingston, Mont., that a dead registered letter awaited his orders at Washington. He FOT sent the following reply: "If the letter referred to isn't so dead that it is offensive you might send the remains to Burlington, Ia., where I will claim the mining in about a month."

-Henry George was in Washington not long ago, and white gazing upon the Washington monument east of the Capitol, inquired of a colored boy who was standing by who the man was. He said he did not know his name, but (reading the inscription on the side of the pedestal fronting him, "First in war"), he added, "He was the first man in the war." .

-A noted Boston physician, while returning from Cincinnati recently, rested over night at Buffalo on his way. home. Here he met a son of a dear friend of his childhood's days in distress and lent him \$50. After he had received the benedictions of this unfortunate youth he discovered that his gold watch and his railroad tickets were missing. The young man disappeared very suddenly, and the doctor waked up to realize and mourn his expensive experience.

-The people of Calais never saw a genuine, living and moving millionaire till Uncle Russell Sage went down there, the other day, to buy the Grand Southern railroad. With true Down-East hospitality a son of the hotel landlord hitched up a span of horses and gave Millionaire Sage a delightful ride about town. Uncle Russ was profuse in his expressions of pleasure, and after the drive was over put his right hand down in his pocket and gave the young man a nice, round, silver ten-cent piece. The young man was much surprised. He did not expect any thing. He has had a hole punched in that ten-cent piece and will wear it on his watch chain.
