It is popularly believed that President Harrison is descended from Pocahontas and from the Parliamentary soldier and cide General Thomas Harrison, who

is executed in 1000. Pocahontas, daughter, of Powhatan, nifested a friendliness for the early white settlers of Virginia when she was but a girl. The story of how she saved he life of Captain John life of Captain John Smith, had been captured and conto death by herfatherow she, on several occasions, made to the settlers their danger en about to be attacked—is well known all acquainted with the early history America. Her subsequent marriage th John Rolfe, an Englishman—her noval to England where a son was born, from whom numerous wealthy fam-lies of Virginia claim descent—is the bais of the opinion that President Harrion is one of her descendants.

Whether this is true or not it is, howper, well-known that President Harriis a descendant of a noted family, stinguished alike in peace and war. The name of Harrison is already in leliby written upon the pages of American history, for General Wm. Henry Harri-on—the ninth President of the United -was the grandfather of Gen. Ben.

The election of another member the Harrison family is but anproof of the prevailnig disposition the public to return to healthy ministration of public affairs so charteristic of the earlier years of govern-ent. A similar desire has been maniested for a revival of early manners and soms in many various ways, of which ation in particular can be made of the prevailing demand for those old time eparations which were so successfully loved in the prevention and cure of ills and ailments which frequented the early log-cabin homes.

After much inquiry and research a no-

ted manufacturer has procured the origimethods used in their preparation nd again under the name of Warner's Lor Cabin Remedies, the public is posessed of those well-known preparations for the cure of coughs, colds, consump-tion in its early stages, blood disorders, catarrh. dyspepsia, debility, and other common disorders.

Notwithstanding the large amount of ae, attention and expense which the mufacture of Warner's Safe Cure deands-its well-known reputation as the aly remedy for the prevent on and cure of kidney diseases being world wide-the mufacturer is resolved to push the rit of Warner's Log Cabin Sarsaparlla to the front because of its splendid blood purifying properties and great value as a household remedy and springe system renovator.

Pocahontas, during her life-long friendip for the white settlers of Virginia, esides her many acts of kindness, is aid to have contributed much valuable formation to the log cabin home conming the successful methods employed by the Indians in the treatment of dise and it matters little whether the alleged relationship between herself and the President be true or not for the name Pocahontas is already immortal.

ABOUT PIANO LEATHER.

A Valuable Article Made by a Half Dozen

German Tanneries. United States. Every one must really two or three days after they reached be afraid of infringing any inventor's the island. patent right in manufacturing goods, and to become liable to pay a royalty to the inventor. One might think there is hardly a field any more where some valuable invention could still be

But there is the manufacturing of piano leather, which has no home at above water before. Then the sea came all in the United States. This kind back, enormous waves dashing far up of leather that is used for covering the hummers in pianes and organs 1s not made in the United States, nor in began to sift over the coast, and the the British Isles, nor in any other German colonists knew there had been a country, except and exclusively in Germany; and there are not more facture this kind of leather. Two factories that make a far superior kind are located in Central Germany near Leipzig, in the Eister Valley, in Thuringia. They are run by the father, Mr. Kretzschmar, at Eisenberg, and his son-in-law, Mr. Schlesier, at Gera. Their goods are world-famed. The wants and demands of all the piano and organ factories in any country on earth are supplied by these few piano leather

tanneries in Germany. Deerskins only can be used for that purpose. But deer is very scarce in Europe. It would hardly suffice to supply the want and demand for one year; they had to look for a supply from somewhere else. The American deer furnishes now the supply, and particularly the gray deer, living in the countries bordering the lake regions-called, also, "paper skins!" The skins of the red and blue deer are unfit for good plano leather. Deerskins are bought by the pound and paid from twelve to twenty-five cents for a pound, when green. For salted or Indian dressed skins the price is of course higher.

A German business house of Detroit exports annually deerskins by the carloads to Germany, to its agency at Gera, Thuringia.

There is a secret in the manufactur ing of piano leather that is strictly guarded. The best kind is smoked or fumed, in a similar way as in Kentucky and Tennessee the heavy export tobacco is cured by fire and smoke. When this piano leather is imported again into this country, its value equals its weight in silver-\$12 to \$15 a pound.

Any American who would like that secret and manufacture a similar or equal kind of piano leather in this

A WALL OF WATER. Two Explorers Lose Their Lives in a Wave

Forty Feet High. In March last two German officials landed on the southwest coast of the America is often called in the newsapers by Europeans the Land of the Island. They had gone there from Patents. It justly deserves this cog- Finehhaven, in neighboring New nomen, for nowhere on the giobe are Guinea, with a considerable force of naso many applications for patents lives. No tidings whatever have been made to the United States Patent heard of them since, Search parties Office and patents secured for inven- sent out from Finchhaven have sought tions of machineries, or for the pro- them in vain, and there is no longer tection of certain secret processes in any doubt that they fell victims to a rethe manufacturing of goods, as in the markable phenomenon that occurred

> On the morning of March 13 a sound was heard at Finchhaven as of distant ibunder A few minutes a sea receded from the shore in an unbeard-of manser, and revealed to view, six feet shove its surface, a reef at the harbor entrance that had never been seen on the land and deluging a part of the ittle settlement. Awhild after finenshes volcanic outburst northeast of them.

Two days later the little vessel Otthan half a dozen tanneries there that tille, sent from Finehhaven, reached make their special business to manuniles away. The captain could not at first recognize the coast, though he had seen it often. The aspect of Vulcan sland off the west end of the blg island. had entirely altered. The top of it had disappeared, and it is supposed that a volcanic ecuption blew it into the sea, and that this was one of the causes of the mighty wave that spread ruin along the south of New Britain.

This wave, judging from its effects, is believed to have been about forty set high. All the villages that fined the beach had entirely disappeared. For ten or twelve miles along the coast a belt of timber about three-quarters f a mile wide had been swept away. Where the force of the wave began to abate the bodies of a few natives were ound lodged in the branches of trees twenty to thirty feet from the ground. Here and there on the ground were henped great fragments of coral rock and trees, and thousands of dead fish strewed the ground. Many of the natives were killed, and others had their limbs b. oken by being swept off their feet and dashed against trees.

It is a noteworthy fact that the naexplorers, it is supposed, had not yet started inland, and they were overwhelmed in the common destruction. The great wave which overwhelmed nany thousands of people after the

Undeservedly Laughed At. The untilinking are proint to make game of nervousness. Yet this is avery real and serious affliction, the harrassing symmtoms of which are rendered all the more pougnant by ridicule. The stomach is usually responsible for these sometones—its weakness and disorder find a reflex in the brain, which is the headquarters of the nervous system. As a nerve tonic and tranquilizer, we believe that not one can be pointed out so effective as Hostetter's stomach litters. In renewing vigorous digestion, it strikes the keynote of recovery of strength and quiettale by the nerves. Headaches, tremers in quiet sleep, abnormal sensitiveness to unexpected noises—all these modify and uffiniately disappear as the system gaine strength from the great lonic. Dyspepsia, billiousness, the unanism, constipation and kidney complaints are suisined by the litters.

CUPID'S HARNESS.

Most women naturally look forward to matrimony as their proper sphere in life, but they should constantly bear in mind that a fair, rosy face, bright eyes, and a healthy, well-developed form, are the best pass ports to a happy marriage. All those wasting disorders, weaknesses, and functional irregularities peculiar to their sex, destroy beauty and attractiveness and make life miserable. An unfailing specific for these maladies is to be found in Dr. Pierce's Favorite Prescription. It is the only medicine for women, sold by druggists, under a positive guarantee from the manufacturers, that it will give satisfaction in every case, or money will be refunded. This guarantee has been printed on the bottle-wrappers, and faithfully carried out for many years, \$1.00 per Bottle, or Six Bottles for \$5.00.
