If the eggs are to be hatched keep a neying toward Jerusalem at this season drake for every five ducks in order to of the year, which is identical with the be sure.

coultry can help themselves if you ex- tering the hill country, some miles bepect to maintain health.

One advantage with ducks is that they do not harbor lice. They have ers that covered the landscape on all too much oil.

that only a low fence is needed to con- of thorns!" fine or keep them out.

On the farm the laving of five dozen eggs ought to pay for keeping a hen a that long sharp thorns were concealed farm it will nearly always pay to plant convinced that this was the true crown. a few rows of sunflower seed especially and as we advanced toward Jerusalem for the poultry. Geese are fond of weeds, especially of purslane, and will often do good service in killing out and destroying weeds. Very often a few drops of turpentine put in the lar to what we commonly call the flowdrinking water at this time will pre- oring almond, with the addition of the vent the gapes. If the chicks are al- thorn. The bloom is very thick, so ready affected, a drop or two on a small that by merely entwining a branch a piece of bread will cure. As a rule guineas should be hatched under hens near the house. They are naturally rather wild, and this will aid materially in making them gentle, if the young guineas are kept near the house. Milk is much better food for poultry during the summer than corn. Corn is heating and fattening, two conditions that as a rule, ought to be avoided. unless feeding for the market.

The value of the manure should always be considered in keeping poultry properly managed. It is one of the best fertilizers that can be had and is well worth the trouble of gathering up and storing until ready to use.

Care must be taken that the nests are ald. kept as free from lice as possible. One way of doing this will be to clean out occasionally and substitute fresh, clean material, burning up the old and using kerosene, carbolic acid or sulphur to elean out the nests.

As the weather becomes warmer it is necessary to provide good ventilation and the more thoroughly this is done the more comfortable the poultry can be kept. Direct drafts should, however, be avoided, and yet at night, during the summer time, care should be taken to have as cool as possible .- St Louis Republic.

-The American Sunday - School Union has organized, during the past year, 1,758 Sunday-schools in thirtyone States and Territories. in places bitherto destitute of religious privlleges. It also gave aid to other needy schools in 6,438 instances. In many cases the schools have developed into churches of different denominations. ASLEEP ON THE RAILROAD TRACK.

A little child, tired of play, had pillowed his head on a rall and fallen asleep. The train was almost upon him when a passing stranger reshed forward and saved him from a horrible death. Perhaps you are asleep on the track, too. You are, if you are neglecting the hacking cough, the heetle flush, the loss of appetite and growing weakness and lassitude, which have unconsciously crept upon you. Wake up, or the train will be upon you ! Consumption, which thus insiduously fastens its hold upon its victims while they are unconscious of its approach, must be taken in time, if it is to be overcome. Dr. Plerce's Golden Medical Discovery has cured thousands of cases of this most fatal of maladies. If taken in time, and given a fair trial, it will cure, or all money paid for it will be promptly refunded. For Weak Lungs, Shitting of Blood, Shortness of Breath, Brouchilts, Auto.

For Weak Lungs, Splitting of Blood, Shortness of Breath, Bronchitis, Asth-Severe Coughs, and kindred affections, it is an efficient remedy.
