THE CENTAUR COMPANY, 77 Murray Street, N. Y.

LADY OF THE HOUSE — Do you still like our Charter Oak Stove as well as when we are got it, Mary?

Servant—Oh, every bit as well, Ma'am.

LADY OF THE HOUSE—I am expecting a friend to take dinner with us next week, on purpose to show her how nice our stove cooks everything, and I want you to have a nice dinner for us.

Servant—indeed I will, Ma'am. There's no trouble to cook nice with that stove. The Wire Gause Oven Boors makes it so much easier than other stoves I have been used to, and I have so much more time to make everything just right. Just look at that roll! I never have bad luck with bread, biscuits or cake, now.

LADY OF THE HOUSE—Why, how do you explain it?

Servant—Well, I don't have to watch everything so close for fear it will burn. You know how careful you have to be with a baked custard, it is so apt to burn on top before it is baked through. The charter Oak bakes it perfectly without any danger of burning. And then in roasting a turkey, I don't have to keep basting it every five minutes. It reasts beautifully brown without it, and without frame that the tight overs do. And you know how crisp the biscuits are without being hard and tough. You always praised my biscuits, but if it want for the wire gause oven door I know they wouldn't be near as nice. I hope I'll never have to cook anywhere again where they haven't got a Charter Oak Stove or Range.

Lough medicines, Ayer's Cherry Pectoral is in greater demand than ever. No preparation for Throat and Lung Troubles is so prompt in its effects, so agreeable to the taste, and so widely known, as this. It is the family medi-

cine in thousands of households. "I have suffered for years from a bronchial trouble that, whenever I take bronchial trouble that, whenever I take cold or am exposed to inclement weather, shows itself by a very annoying tickling sensation in the throat and by difficulty in breathing. I have tried a great many remedies, but none does so well as Ayer's Cherry Pectoral which always gives prompt relief in returns of my old complaint,"—Ernest A. Hepler, Inspector of Public Roads, Parish Terre Bonne, Lu.

#### "I consider Ayer's Cherry Pectoral a most important remedy

For Home Use. I have tested its curative power, in my family, many times during the past thirty years, and have never known it to fail. It will relieve the most serious affections of the throat and lungs, whether in children or adults." — Mrs. E. G. Edgerly, Conneil Bluffs, lowa.

e. G. Edgerly, Conneil Bluffs, Iowa.

"Twenty years ago I was troubled with a disease of the lungs. Doctors afforded me no relief and considered my case hopeless. I then began to use Ayer's Cherry Pectoral, and, before I had finished one buttle, found relief. I continued to fake this medicine until a cure was effected. I believe that Ayer's Cherry Pectoral saved my life."—Samuel Griggs, Wankegan, Ill.

"Six years ago I contracted a severe

Samuel Griggs, Wankegan, Ili.

"Six years ago I contracted a severe cold, which settled on my lungs and soon developed all the alarming symptoms of Consumption. I had a cough, night sweats, bleeding of the lungs, pains in chest and sides, and was so prostrated as to be confined to my bed most of the time. After trying various prescriptions, without benefit, my physician finally determined to give me Ayer's Cherry Pectoral. I took it, and the effect was magical. I seemed to rally from the first dose of this medicine, and, after using only three bottles, am as well and sound as ever."

— Rodney Johnson, Springfield, Ili.

State Horticultural Society.

sufficient, according to the Methodist dis-cipline, to "exclude a person from the king-dom of grace and glory," and libel, which ver, he feared the consequences if they ate plexion and leaves no traces of its application or injurious effects? The answer. Wis don's Robertine accomplishes all this, and is pronounced by ladies of taste and refinewhen a church member is convicted of such asked him to go cut and see if he could raise did well. Though the solution was strong,

Mr. Clarke remarked that it was generally doubly damned. But it appears that in count. Mr. Ochle returned with the bauble stated in agricultural journals and by agricultural stations that 150 gallons to a pound

die. The sun of March is hotter there than

Dr. Plummer, of Portland, was shown a a limb of an apple that had dead spots on it, and wondered if this was caused by sunburning. Risley said he had them on all affected, and the trees made a splendid cases were with Yellow Newtons and Spitzenburgs. This called out some experience and it was generally conceded that the Y. N. sure as other varieties. It made a difference in spraying between different variehurried out and from a couple of friends ties. Some were less liable to worms than

Dr. Plummer made a test as to the virtue of spraying by leaving several trees across a ravine, and not easily reached. Those were badly infested with worms; also anothsisted upon payment. Ben sent for a coupe, or that was alongside an old cabin. He found afterwards that thus tree had been overlooked. He saved half his apples, when neighbors lost all of theirs, and he lost nearly all on the trees not sprayed. Probably he would have saved more if he other man in the country could have done this with the same grace? He calls to mind the young English spendthrift was as good as Paris green. A brother who

who used to mollify the cravings and quiet the ravings of his tailor by ordering another grow fruit at San Jose wrote him that the knowing ones used Paris green. The difficulty is that it does not mix so readily in water as London purple. Mr. Varney, of The Dalles, used concentrated lys as a wash at times, and mixed it with four pounds of resin to one pound of

lye. He thought this made a good solution for use, better than lye alone. He put this in 100 to 150 gallons of water. The afternoon discussion related to prices and prospects. It seems that apples are a

scarce crop all over the country; also California has a light crop of all drying fruits. The crop of Oregon was fairly good, except apples and pears, and the worms destoyed these after a good showing in the spring of fruit that set. The general conculsion was that all dried fruits will bear a

fair price, as there is no overproduction. Mr. Clarke told of the way apples set last spring, and showed that the worms had destroyed seven-eights of all there were; also the result of spraying, and that at a small expense every man could save his fruit, if an orchard beside him was ruined. The discussion related to grading prunes, as done in California, to methods of curing, the need of thinning to grade the fruit on the

As to planting trees, Mr. Clarke gave his way of plowing lands to have the dead for row come where the trees did, and then plow very deep and plant in the furrow, so the trees would be as when in the nursery. Mr. Francis, of Portland told of a man at Eugene who planted a row, so that

they graded in depth until the last one was two feet deeper than in the nursery. The man said those buried the deepest did the best of all, but this was not accepted as good fruit tree logic. It was generally conceded that Mr. Clarke's plan was the most reliable. Mr. Varney thought trees should be set deep. As to ages of trees to be set, a variety of opinions was expressed. Some had found

dently much depends on the trees and on the trees and on the soil. Different variaties and different locations made a difference as to results. A. F. Shaw, of Vancover, set out big and little trees in 1882, and the little ones are now twice as large as the others. That was

three or four old year old trees to do best,

and others favored good yearlings. Evi-
