

Facts to Think About.

The average ad valorem duty on window glass is 113 per cent, and the manufacturers have their lobby members now in Washington asking for additional protection.

DISKARD CATTLE.—It was discovered some time since that W. S. Ladd's herd of Jersey cattle near East Portland was diseased with tuberculosis, a disease similar to consumption in the human kind.

A Court House Kick.

EUGENE, OR., Jan. 20, 1890. Just why the people of Oregon can, in their sovereign capacity, wholly disregard their own compact, the Constitution, and yet claim the right to execute the law in an individual sense is one of the anomalies of our government.

Engines For Sale.

BONA FIDE CLEARANCE SALE!

S. H. FRIENDLY, General Merchandise. EUGENE, OREGON.

Jacksonville Times: "The Washington legislature is addicted to the use of lady clerks, who will, doubtless, make a pretty mess of engrossing bills and transacting other public business, also same Oregon lady clerk. Two of the demagogues last week struck for higher wages, and the chivalrous legislators promptly granted them \$5 per day, but refused to raise the salaries of male committee clerks to the same figure. There can be no doubt that there are lady clerks in existence who do as good work as men in this line, but that the State is in demand for such positions, because with women of efficiency the first giggling flush of youth and rotundity is generally gone, and it is the giggle and rotundity that the average legislator wants to ogle and smirk at during the intermissions necessarily occurring between introducing innocuous bills and practicing parliamentary law. The lady clerks come high, but it seems the "dear boys" must have 'em.

The Anti-trust bill has been defeated in the Washington (State) House of Representatives. During the debate a member, Mr. Eddy, declared that the State had interests in coal, lumber, transportation, telegraphy, telephone lines, electric light, fisheries, mining claims, lumber lands, insurance and medicine. He said a ton of coal that cost on the cars at the mines \$1.85 sold at Seattle at \$4.15 profit, in consequence of the coal trust. Another member, Finneson, in opposing the bill, pleaded for the trusts, and for capital and denounced labor unions. It is fitting and in order for a Legislature with a big Republican majority to kill any bill infringing upon trusts. For has not the great apostle of that party said they were "private affairs"? And is not the tariff the father of trusts, and is not the Republican party the friend of the tariff.—E. O.

The Jacksonville Times commenting on the early death of the Medford paper makes a true statement concerning the subscription price for which a good local paper, with a limited field, can be published with any fair financial returns to the publisher. The Times says: Medford's dollar weekly has "gone where the woodbine twined," as might have been expected. No large, first-class paper can be printed in the interior for less than \$2.50 a year. Publishers of city papers issue weeklies for less money, but they make use of the reading matter that has already been printed in the daily editions. Otherwise their prices would not be so liberal.

It is worth remembering that no newspaper is published especially for one person. People who become greatly displeased with something they find in a newspaper should remember that the very thing that displeases them is exactly the thing that will most please somebody that has as much interest in the paper as they have. It takes all kinds of people to make a world, we are told, and the patrons of a newspaper are made up of the elements of the world. A man may have a dislike for tobacco, but he is not foolish enough to complain at his grocerman because he keeps it for sale to those who want it. The man who finds something in a newspaper he does not like is not obliged to read it or be influenced by it.—Index.

Lexington Budget: One morning last week when E. E. Hathaway, of this place, opened his door he found a shepherd dog waiting to be admitted. Tied to his collar was a note from Mr. and Mrs. Russell, parents of Mrs. Hathaway, who live about four miles west of Lexington, stating that they were both sick and needed attendance and a physician. The intelligent animal had been started off at 9 o'clock in the morning and faithfully performed his errand. Mr. and Mrs. Russell are recovering.

In Hamburg a malignant type of typhus follows in the wake of a grippé, attacking the elevated systems of the victims of the latter disorder. Typhus, typhoid and malarial fevers are likely to follow in this country as well, unless convalescents take particularly good care of themselves until their systems are fully restored and recuperated. The pneumonia which is attended with so many fatalities is really a development of the influenza.

The Republican majority of the census committee have reported against the bill to require the Superintendent of the Census to ascertain what percentage of the people own their own farms, the number of farm mortgages and the amount thereof. The high tariff Republicans do not wish the condition of the farmers in this country to be known. The facts would be a convincing contradiction of the theory that a tariff benefits the farmer.—East Oregonian.

In the Senate of the Washington legislature, Thompson, of Walla Walla, is chairman of the committee on public morals. The display of levity which takes place when religious or temperance matters are referred to this committee nettles the worthy senator, who exclaimed the other day, "What in hell do they take me for? I am as moral and good a man as any jackass on the floor of this senate chamber."

Nellis Bly, the New York World's correspondent, completed her flying trip around the world last Saturday, having consumed just 73 days, 6 hours and 11 minutes in making the trip. This is the fastest time on record and yet Nellis is not considered a fast girl.

L. T. Barin, chairman of the Republican State Central Committee says that he will issue the call, about February 8, for the committee to meet early in March.

The salary of the Governor of Montana is to be \$5,000 a year. This is a contrast to the paltry amount Oregon pays her chief executive.

LOCAL MARKET.—Wheat, 60 and 67 cts.; oats, 35 cts.; hops, 7 and 8 cts. on consignment; butter, 25 and 30 cts.; eggs, 35 cts.; potatoes, 60 cts.
