What is it?
That produces that beautifully soft complexion and leaves no traces of its application or injurious effects? The answer, Wisdom's Robertine accomplishes all this, and is pronounced by ladies of taste and refinement to be the most delightful toilet article ever produced. Warranted harmless and matchless. F. M. Wilkins, agent, Eugene City.

Change is one of the irresistible laws of nature, and fortunately the change is almost invariably for the better. As an instance of this, St. Patrick Pills are fast taking the place of the old harsh and violent cathartics, because they are milder and produce a pleasant effect, besides they are much more beneficial in removing morbid matter from the system and preventing ague and other malarious diseases. As a cathartic and liver pill they are almost perfect. For sale by Osburn & Co.

How to See the Wind.
An exchange says: Take a polished metal surface of two feet or more, with a straight edge, a large hand saw will answer the purpose. Take a windy day for the experiment whether hot or cold, clear or cloudy, only let it not be too murky, rainy weather. Hold your metallic surface at right angles to the direction of the wind—i. e., if the wind is north, hold your surface east and west, but instead of holding it vertical, incline it about forty-two degrees to the horizon so that the wind striking glances and flows over a dam. Now sight carefully along the edge some minutes at a sharply defined object, and you will see the wind pouring over the edge in graceful curves. Make your observations carefully and you will hardly ever fail in the experiment, the results are even better.

The bonded indebtedness of Astoria is \$57,050, and the city's indebtedness is \$14,688. In addition to this it is proposed to add \$22,950 to the amount of the bonds, to run for 30 years at 4 per cent.
Give Them a Chance!
That is to say, your lungs! Also all your breathing machinery. Very wonderful machinery it is. Not only the larger air passages, but the thousands of little tubes and cavities leading from them. When these are clogged and choked with matter which ought not to be there, your lungs cannot do their work. And what they do, you cannot do well. Call it cold, cough, croup, pneumonia, catarrh, consumption or any of the family of throat and nose and lung and lung obstructions, all are bad. All ought to be got rid of. There is just one sure way to get rid of them. That is to take Boschee's German Syrup, which any druggist will sell you at 75 cents a bottle. Even if everything else has failed you, you may depend upon this for certain.

Seal Fishing Bids.
A Washington dispatch of February 21, says: Bids were opened at the treasury department at noon to-day, for the exclusive right to take fur seals upon the islands of St. Paul and St. George, Alaska, for the term of twenty years from May 1st, 1890. There were twelve bids, but two were thrown out because they did not contain a certified check for \$100,000 as required.
The American Fishing and Trading company, of San Francisco, offers to pay the United States \$305,000 per annum, \$4.12 for each skin, and twenty-five cents for each gallon of seal oil.
The Pacific Steam Whaling company of California, offered to pay an annual rental of \$50,000 and \$7.1 for each seal.
The Alaska Commercial company offered to pay \$50,000 rental and \$6.75 for each seal, also to provide one hundred comfortable dwellings for the inhabitants of the island, and make ample provision for their maintenance and support, and establish a regular mail service from San Francisco to Alaska without cost to the government; also, to provide schools, churches and hospitals for the inhabitants; to provide wharf facilities at Unalakleet, and distribute supplies gratuitously to the various points in Alaska; also in the event that any other responsible party shall offer in good faith a greater amount for said privilege, to pay the United States the full amount offered by such parties, and say that their offer contemplates an annual revenue to the United States of \$875,000.
The North American Commercial company, of California, proposed to pay an annual rental of \$55,200 and \$1.75 for each skin, with the express understanding that the catch shall not be limited to less than 100,000 seals per year after the first year; or they will give the government forty-five per cent. of the gross receipts from the sale of seals, and will agree to pay a rate of ten per cent. higher than that offered by any other company.
The North American Commercial company, of San Francisco, offered to pay a rental of \$60,000 and \$9.62 1/2 for each skin and fifty cents a gallon for seal oil. Another firm in the same company proposed to pay a rental of \$57,100, \$1.50 for each skin and fifty cents a gallon for seal oil, provided the United States guarantee protection in the fisheries.
Bids were also made by the North American Trading company, of West Virginia, with an estimated annual revenue to the government of \$416,000, by E. W. Clark of Washington, D. C., to give a bonus of \$221,000, rental, \$50,000 per annum and a tax of \$2 for each skin.
By the Atlantic and Pacific company, of New York, an annual rental of \$55,000, and \$5 1/2 per skin.
By the North American Commercial company, of Illinois, \$56,000 per annum and \$7.11 per skin.

Slaughtering Deer.
For an unparalleled slaughter of deer for their hides solely, an account reaches us from the shores of Rivers inlet, on the northern coast, which seems almost incredible, says the Victoria Colonist. Still it is a fact, and is graphically described by one who was in the vicinity at the time of the round up:
The spot was on the shore of Rivers inlet, where a band of deer numbering over 100 came down to the beach from the highlands to nibble at seaweed for sustenance, the deep snow at the time preventing them from obtaining grass or roots in the forest. When the herd reached the beach they were nearly buried in the deep snow, and means of locomotion were next to impossible. Indians, seeing the plight of the animals, started for them with clubs, and there and then dispatched the entire band, skinned them for the sake of their hides and left the carcasses on the beach to rot. It is in a manner like this that deer will eventually become as scarce as the buffalo of the plains. Is there no remedy?

Wallowa's Sheriff in Trouble.
Advice from Wallowa county state that a recent investigation by the county court disclosed the fact that Sheriff Rhinehart was about \$3,500 behind in his accounts. Rhinehart tendered his resignation to the court which will be accepted. His bondsmen made good the deficiency and took a chattel mortgage on his property which is thought to be worth about \$2,500. No dishonesty is charged to Mr. Rhinehart who is making every effort in his power to guard the county and his friends against loss. It is evident that he was unqualified and incompetent to attend to his official duties, and had no idea of how his business matters stood, trusting entirely to his deputies. About the only thing he can be blamed for is attempting to do something that he must have known he was unqualified for.

The last Republican Speaker from Reed, eight years ago, was a certain fellow of unenviable memory, named J. Warren Kiefer. The next fall after his performances as Speaker, the country elected a House consisting of 191 Democrats and 119 Republicans, a Democratic majority of 72. It would not be surprising if history should repeat itself next year. By the way, this Kiefer enjoyed the unique distinction of going out of office without the usual compliment of fairness of the Speaker by a unanimous vote of thanks. A division was demanded and the vote of thanks adopted by 86 to 8 in a House of 293 members. Speaker Reed has done Kiefer the great service of making his conduct in the chair respectable by comparison.—Ex.

Mercury, Rep.: Plenty of candidates for the chair that Penoyer is now so comfortably seated in. Honor has it that Mr. Thompson, Mr. Moody and Mr. Penoyer are very strong men, but that it will be necessary to watch for a "dark horse" from the eastern or southern part of the state. The people in these localities do not propose to let everything pass by without an effort. Southern Oregon wants the treasurer, Eastern Oregon wants the state printer, The Dalles wants the governor again, Roseburg wants the congressman; but Multnomah will have something to say in the matter before it is settled.

The statistics showing that the cost of producing the Illinois corn crop of 1889 was \$68,000,000, while its market value is only \$59,000,000, are simply estimates, and so may be considered out of the way; but there can be no doubt that the raising of corn has become unprofitable in Illinois and all the other western states.

In San Francisco the gambling spirit is rampant. Every daily in the city but one receives \$1000 a month for advertising from the Louisiana lottery, and it is calculated that this gigantic swindling concern sells \$100,000 worth of tickets in the city every month.
Mercury: "Sandy" Olds says he has been tried three times for gambling and he would like to be tried once for the killing of Emil Weber. As a matter of fact, however, "Sandy" was never tried for gambling till after he had perforated the anatomy of Weber. In Portland gamblers are seldom annoyed for pursuing the "innocent" pastime of robbing the unsophisticated by means of cards. It is only when the "pot" is raised by powder and ball that the fellows are "called" by the police. Wives may go next to naked and children may cry for bread, because the husband and father donates his income to the wily gambler, but the officers of the law say nothing. Charitable institutions care for the destitute innocents, and everything goes.

Washington Independent: No wonder our legislators object so strenuously to the employment of a chaplain. It is all explained since the women who are in the houses of ill-fame exhibit their autograph albums with the names of many of the members of the legislature inscribed therein. The said women make an exhibition of the honorable body to show who are their patrons. Rome is being enacted in Olympia.
Four timber men started a week ago last Saturday to go to their claims, eighteen or twenty miles above Brownville, says the Albany Herald. They came very near perishing in the snow, which was eight feet deep. Luckily they found a cabin, where they stayed over night without food. They arrived at their camp next morning. Last Sunday they ventured forth again. There was still five feet of snow when they came out.
