

EUGENE CITY GUARD.

L. L. CAMPBELL, - Proprietor.

EUGENE CITY, OREGON.

PITH AND POINT.

—The crowbar is a pry-mover in a great many enterprises.—Binghamton Leader.

—If you want to live to a good old age be good while you are young.—Somerville Journal.

—No malice can exist with thought; so how can there be such a thing as malice aforethought?—Texas Siftings.

—Never a vine but bears more grapes for the cut of the pruning-knife.—Matthew Mellowdew.

—Don't fret about what your reputation will be after death. Tombstones are mighty charitable.—Burlington Free Press.

—If dar was or perfect understandin' twixt man an' oman, dar must be friend-ship, but dar wouldn't be any love.—Arkansas Traveler.

—The tongue shows to a physician the disease of the body; to a philosopher the disease of the mind; to a Christian the disease of the soul.

—Human longings are perversely obstinate; and the man whose mouth is watering for a peach, it is no use to offer the largest vegetable marrow.—George Elliot.

—There is nothing of which men are more liberal than their good advice, be their stock of it ever so small; because it seems to carry in an intimation of their own influence, importance or worth.—Young.

—"Don't say you will be benevolent when you get rich. As well might the rose say: "I will emit no fragrance this month, but next month I will flood the gardens with aroma." Next month it is dead.—Talmage.

—Anger is an affected madness compounded of pride and folly and an intention to do commonly more mischief than it can bring to pass and without doubt of all passions which naturally disturb the mind of man it is most in our power to extinguish, at least to suppress and correct our anger.—Clarendon.

—If you wish to see things clearly, and to be just with your fellow-men keep clear of the fumes of vanity and the thick atmosphere of mere personal feeling. Make it a rule to see what a man is and does, and to value him by these things. A person may be very distasteful to us and yet be eminently useful and successful in the world.—Christian Union.

—It is in the minute circumstances of a man's conduct that we are to inquire for his real character. In these he is under the influence of his natural disposition, and acts for himself, while in his more open and important actions he may be drawn by public opinion and many other external motives from that bias which his disposition would have taken.—Old Homestead.

SPONTANEOUS COMBUSTION.

Seriously Avoid the Use of Saw-Dust to Collect Oil Drippings.

Among the results brought to light by recent investigations of the sources of spontaneous combustion, is the fact that saw-dust should never be used in oil sheds or warehouses, to collect drippings or leakages from casks. Dry vegetable or animal oil is found to inevitably take fire when saturating cotton waste, at 180 deg. Fahrenheit, and spontaneous combustion occurs more quickly when the cotton is soaked with its own weight of oil. The addition of 40 per cent. of mineral oil—density .890—of great viscosity, and emitting no inflammable vapors, even in contact with an ignited body at any point below 338 deg. Fahrenheit, is sufficient to prevent spontaneous combustion, and the addition of 20 per cent. of the same mineral oil doubled the time necessary to produce spontaneous combustion. Danger is involved in the use of saw-dust, from leakage into sawdust, etc., oily waste of any kind, or waste cloths of silk or cotton, saturated with oil, varnish or turpentine; also lined oil cask drippings into a sponge, glycerine or oil of any kind leaking into sawdust, and oily turnings mixed with sawdust; rust from gun barrels kept some time under water, scraped and put in parcel in pocket; bituminous coal in large heaps of pit coal, hastened by wet, and especially when pyrites are present in the coal—the larger the heaps the greater the liability. Oil on flour, or water on flour, is productive of spontaneous combustion. In fact all organic structures, being largely composed of carbon and hydrogen, are steadily excited, because of the affinity of the hydrogen for oxygen, both of which are in an allotropic state (that is in a state unusually ready to combine). Hence there is danger in any condition that brings a carbhydrate in connection with water.—Indianapolis Corn Miller.

HOW TO MARRY WELL.

Some Important Things Which Girls Should Always Remember.

What girls should never forget is to be neat! Not primly so, but daintily so. The girl will get up, with irreproachable gloves and shoes that fit, though her gown be only cotton, yet if it will be well turned out, may compete with the richest, while the slovenly dresser, who scorns or forgets to give attention to details, is passed over by the disinterested eye, though her gown may be a masterpiece of work.

One special point would impress upon the girl who desires (as all girls do) to range themselves well, to make a good marriage—is to be gentle. The crass for vivacity, for the free and easy style that borders so closely on the manners of the demi-monde, that distinguished the society of ten years ago, has provisionally died a natural death. Nowadays men are sensible enough to look for comfort in their married lives. And surely the knowledge that one's future wife has a heart as tender as it is sympathetic should, and does, go far to arrange a man's decision of who shall be the partner of his daily life.—Ladies' Home Journal.

The important work of draining the Roman marshes, on which the Italian Government has been engaged since 1864, is now well advanced toward completion. The work can only be carried on at certain seasons of the year, owing to the unhealthiness of the district.

THE PACIFIC COAST.

Two Men Attempt to Kidnap a Tacoma Lady.

The Editor and Business Manager of the San Diego Union Under Arrest.

Olympia, Wash., has voted bonds for general municipal purposes.

National City has an olive-oil mill that will soon be handling thirty-two tons a day.

George N. Cobb has been appointed assistant keeper of the lighthouse at Oakland, Cal.

The Los Angeles restaurant keeps have protested against the giving of dinner for a price by the ladies of the churches.

Washington's Governor has appointed the trustees who are to locate and supervise the construction of the State reform school in Lewis county.

Two and three-fourths miles of jetty at the mouth of the Columbia river have been completed, leaving one mile and a quarter to finish the work.

Eastern capital is rapidly finding its way into Salt Lake City. No less than five syndicates are endeavoring to obtain control of the water works.

Spokane Falls is taking steps to build a mineral palace from ores taken from tributary mining camps. The Northwest Exposition will open September 14 at Spokane.

The Japanese crew of the sealing schooner *Pelee* at Victoria got drunk, and for awhile ran the vessel, cutting Mate Lungeberg severely. The Japs are now in jail.

Land-grabbers have seized upon some 16,000 acres of land in the Fayette valley, Idaho, under the desert land act, and will hold the land for the expected immigration into the country.

John Major, an Indian living near the Klamath agency, Or., killed his wife and a brother Indian, and was subsequently killed by a posse of Indians. Major is supposed to have been insane.

Two men tried to kidnap Mrs. Barkley, the wife of a Tacoma building contractor. Her husband's timely appearance put to flight the men who had thrown a blanket saturated with chloroform over her head.

The citizens of San Jose, Cal., built bonfires and exploded bombs and rockets and paraded the streets with appropriately inscribed transparencies in their enthusiasm over the signing of the public-building bill by the President.

The result of the conference between the Southern Pacific officials and the delegation from Astoria regarding the Southern Pacific extending its system to Astoria has been made public. Huntington demands a subsidy of \$200,000 and terminal facilities.

The sons of A. Ingram and F. C. Young, two miners who perished while returning from the Yukon river, have started from Victoria, B. C., to find, if possible, the remains of their fathers, in order to bring them out and give them interment in the family cemetery.

The United States District Court has decided the suit against the British ship *Craigell* at Seattle in favor of the sailors. The ship was chartered for two years, but the Captain broke his contract, and suit was brought for three months' extra pay by the men beyond payment for services rendered.

There are only two passes between Tacoma and Olympia. The Union Pacific is seeking to occupy both of them and shut out the Northern Pacific. Three crews of men are now slashing on the right of way between Tacoma and the Nesqueally river, while a fourth crew is at work between the river and Olympia.

From a pair of Chinese pheasants placed in Linn county, Or., about seven years ago, the birds have spread all over Marion, Lane, Polk and Benton counties, till the farmers complain of them and shoot them despite the law protecting them. They hatch two or three broods in a season, and are very swift of foot and strong of wing, cunning and hardy.

The managing editor and business manager of the San Diego Union have been arrested on an order of the three Superior Judges, sitting in bank, upon a charge of contempt of court. The order was issued upon petition by the prosecuting attorney, who charged that the editor had published a libelous article in the Union, and that the business manager had aided and abetted him in the same.

The Governor of California has granted a pardon to A. P. Gipson, who was sent from Santa county in 1878 to San Quentin prison to serve out a life sentence for the murder of a stockman named Schroeder. Convicted with Gipson for complicity in the same crime were two men named Hilbrant and Tom Gipson. The latter was pardoned by Governor Perkins and Hilbrant by Governor Stoneman. Hilbrant made affidavit that he swore falsely when he stated that A. P. Gipson was implicated in the crime. Tom Gipson also swore afterward that A. P. had nothing to do with the murder. The pardoned man is about 70 years old.

James Guiler, representing the Rialto Iron Works at San Francisco, has returned from Washington and other Eastern cities, which he has visited in the interests of his firm to secure prices for supplying iron and steel necessary in construction of 8,100 and 5,500 ton cranes for the United States navy, for which the Rialto Iron Works are to submit bids. While in Washington Mr. Guiler had an interview with the Secretary of the Navy, who was greatly interested in the welfare of San Francisco, and particularly in respect to the Rialto Iron Works entering into this new enterprise and bidding for government work. He also said that it gave him pleasure where he found a willingness on the part of our people to assist in the building up of our navy and merchant marine.

The revenue steamer *Bear* will sail for her usual summer cruise off the Alaskan coast some day next week. Only the usual duties, so far as known, are assigned to Captain Healy for this cruise. He will prevent illegal sealing as far as possible, and will regulate the trade in furs among the Indians. Captain Healy will not learn the details of his orders until after leaving San Francisco. As they come from Captain Shepard, who before his promotion to his present position as chief of the revenue marine service had some lively experiences with the British sealers, the presumption is that the orders will give every authority for the preservation of the government's rights in the North. It is reported that the cutter *Cornwall* will also go North before long. The naval steamer *Alert* is being fitted out for the cruise, and the talk is that this vessel will also join the fleet of government steamers that will be in Alaskan waters during the summer sealing season.

EASTERN ITEMS.

A High Fence to Be Put Around the Lincoln Monument.

The Michigan Supreme Court Holds the New Liquor Law of That State Unconstitutional.

Over 100 colored men now control newspapers in the United States.

There has been a general increase in the Newfoundland tariff of 5 to 10 per cent.

This season's flood is making remarkable changes in the Mississippi river channels.

It is said that there are nearly 200,000 ex-Union soldiers in circumstances approaching destitution.

Gary Pittman, cashier of the Bank of Nottingham, Ala., has skipped. The condition of the bank is not yet known.

It is now claimed that Edwin Cowles, the late editor of the *Cleveland Leader*, was the first to propose holding a World's Fair in 1892.

Michigan's Supreme Court holds that the new liquor law of that State is unconstitutional. The enjoining clerk had made unauthorized interpolations.

There is still much quarreling over disputed rights to property in Oklahoma towns, and rival claimants easily secure the backing of a disreputable element.

A speedy settlement of the Behring sea controversy seems improbable. It is expected, however, that a temporary arrangement may be made for this season.

A high iron fence is to be built around the Lincoln monument at Springfield, Ill., to protect it from relic hunters, who have mutilated the statues and the sarcophagi.

It is understood that there will be no more caucuses on the silver question by Republican Congressmen, and that the Senate will pass the bill favorably to silver and that the House will agree to it.

The two warring baseball leagues in the East are getting tired of losing money, and it is said, will change the date of the season so that the two organizations will not play on the same day in any one city.

Aaron's Feder, clothier of 93 Prince street, New York, failed a few days ago, and it was reported that he had committed suicide. He was, however, found by the police, and it was learned that he had committed suicide.

The President has approved the bill authorizing the construction of a bridge across the Brazos river in Texas and the joint resolution authorizing Lieutenant Henry R. Lenny, U. S. A., to accept a position under the Republic of Colombia.

Prohibitionists in Iowa believe that the decision of the United States Supreme Court that Iowa cannot interfere with the importation of liquor into that State in unbroken packages will have a damaging effect on the prohibition law of that State.

A strange malady has made its appearance at Muncie, Ind., with which 100 persons have been suddenly stricken. Doctors disagree regarding the disease. Claims are made that it is la noma, the prevailing epidemic in Germany and Italy, which was preceded by a grippé.

The run of the new torpedo boat *Cushing* from Newport to New York was the quickest on record between those cities. She ran against strong wind and heavy seas, but nevertheless made it in six hours and fifty-seven minutes, or seven minutes quicker than any other vessel.

Major Powell, Director of the Geological Survey, says the area of the arid land region is 1,300,000 square miles, or a third of the entire country. Of this at least 100,000 square miles can be economically reclaimed by irrigation, making it worth not less than \$30 per acre and adding \$2,800,000,000 to the nation's wealth.

The Merchants' bank of Atlantic City, N. J., has suspended payment on account of a run caused by reports that several of their branches in neighboring towns had suspended on account of the suspension of the Bank of America. Philadelphia deposits are estimated at \$50,000.

Judge Wallace in the United States Circuit Court at New York denied the application of Henry Hilton to reopen the suit of *Fortin & Co. v. Fortin* manufacturers of Paris, against A. T. Stewart & Co. for breach of contract, which was decided in France some years ago and judgment rendered against Stewart & Co. for \$105,000. Judge Wallace holds that the decision of the French court must be presumed to be fairly arrived at.

In a letter to the Speaker of the House the Secretary of the Interior estimated that it will require \$83,806,752 annually to give service pension to every survivor of the late war now on the rolls and \$6,642,811 annually to increase the pensions of those now on the rolls to 48 per cent. and \$9,778 to grant pensions to widows of deceased soldiers. The total annual expenditure would be \$100,226,327.

The members of the scientific expedition from Philadelphia have ascended Ixtaccihuatl in Mexico. Barometrical measurements give it an elevation of 17,150 feet. A glacier two miles long was found to descend the western slope. It is the first glacier on record as existing in Mexico. On the summit the thermometer registered 28 degrees. Butterflies were found imbedded in the ice at an elevation of 15,500 feet.

The E. H. Hammond Beef Company of Chicago and the Central Trust Company have issued to Alex. Harvey of New York a mortgage of \$1,645,000 on all their property in all cities from Albany to Chicago. The Hammond Company is incorporated under the laws of Great Britain, and the mortgage calls for an English equivalent to \$1,645,000 in American money. The mortgage will be divided and sold to English capitalists.

Serious forest fires are reported from the northern part of Wisconsin. Much damage has been done around Mason, along the Omaha road, where the woods are ablaze and two or three houses in the town burned. The fire in stumps and underbrush between Hurley and Ironwood spread with great rapidity along the section bordering on the mines from Ashland to Aurora, burning three or four miners' cottages. All the mills and factories at Rice Lake, Benton county, were kept closed so the men could protect their homes.

James Pollock, ex-Governor of Pennsylvania, who died at Lock Haven Saturday, was the first man to urge Congress, of which he was a member forty years ago, to build a Pacific railway. He predicted in 1848 that a railroad uniting New York and San Francisco would be built within ten years. The road was finished in 1869 and Mr. Pollock passed over it two years later, and an ovation was given him in San Francisco as the prophet of the Pacific railroad.

FOREIGN NEWS.

DeBrazza, the French Explorer, Starts for Africa.

Holland Proposes to Increase the Duty on American Petroleum—Other Items.

There is no Ministerial crisis in Uruguay as has been reported.

The Shah's wife is in Vienna undergoing an operation to recover her sight.

There are at present within the walls of Paris 30,229 subjects of the German Emperor.

The state of siege on the island of Crete has been raised and martial law abolished.

It is reported that Queen Victoria will confer a title on Stanley, making him Lord Stanley of the Congo.

De Brazza, the French explorer, has started on his sixth trip to Africa—not as a civilizer, but as a money-maker.

The first electric cars in Germany are to be introduced at Halle. The American overhead system will be employed.

Malliet has signed a treaty for the settlement of the Samoan troubles. Tannan has accepted the new regime.

The Royalist Deputy for Belleville, France, has been sentenced to pay 1,500 francs fine and 10,000 francs damages for libeling Goblet.

The United States and British Governments have made an imperative demand that the Delagoa railway question be settled by arbitration.

A dispatch to the London Times from Shanghai says that the further consideration of the Chinese railway question has been postponed.

Conel Brece, a noted member of the turf and brother of the horse St. Gatien, the winner of the Derby at the Epsom meeting in 1884, has committed suicide in London by shooting himself with a revolver.

A Berlin dispatch says the Emperor of Germany has directed the building of a yacht, to be the largest of her class in the world. It is said the Emperor will, when the yacht is ready, pay a visit to the United States.

London Fire Department statistics show that, although the theater district has increased greatly in number, they are far less damaging than formerly, owing to the improvements in the apparatus for suppressing them.

The Austrian newspapers in commenting on the meeting of Queen Victoria with Kaiser William at Darmstadt declare that England is practically an ally of the triple alliance, although not formally committed to it.

President Carnot has received a letter from the King of Danubia, complaining that the French attacked him without warning and without declaring war against him. The French merchants now in his power will be kept as hostages.

Two different English syndicates solicit the concession for enlarging the canal and port of Brussels so as to make Brussels accessible to vessels of 2,000 tons. Both syndicates fix the cost of the necessary constructions at about 24,000,000 francs.

The lunatics in the asylum at Dundrum, near Dublin, Ireland, became excited because their beer was cut off, and smashed everything within reach that was breakable. The fire department was called out, and after the lunatics were well drugged they became quiet.

Countess Kessler, daughter of Admiral Lynch, has brought an action against three Paris newspapers for accusing her of being a Prussian spy and giving revelations with sinister ends; also for accusing her of stealing Boulanger's mobilizing scheme.

Stanley says: "My heart will always be with America. Circumstances compel me to do many things he could not do of his own free will. On account of my future work I may have to formally declare myself a British subject. At present I consider myself an American citizen."

Holland proposes to increase the duty on American petroleum imported into the Dutch Indies in retaliation for the American increase of the duty on raw tobacco. In Dutch commercial circles the advisability of being discussed of common European action against American protection.

The enemies of the Brazilian Republic are sending abroad reports of dissensions and supposed tyrannical acts of the present government. Premier de Fonseca has, according to reports, prohibited publications exposing the inefficiency of troops or anything liable to injure the country's credit abroad.

In the British House of Commons Randolph Churchill's bill to consolidate and amend the licensing laws has passed its first reading. The bill proposes to trust the granting of licenses to municipal and county councils, abolishes beer houses and compels clubs to register and pay fees ranging from £30 annually for workmen's clubs to £2,000 for aristocratic clubs.

Leprosy has of late assumed such large dimensions in the Baltic provinces, especially in the province of Estland, that it has been found necessary to take steps toward founding an asylum for those unfortunate people. The first institution of this kind will be found at Dorpat. Subscriptions, concerts and lotteries are now being got up for this object in different parts of Russia.

The last prison statistics of Prussia show that in the year 1888-9 39,708 Russian prisoners worked altogether 11,900,000 days for wages of 10 cents each per day. Of the 21,432 men and 3,566 women under the supervision of the prison division of the Prussian Ministry of Justice 1,039 men and 2,172 women are employed by manufacturers under contract with the prison authorities. The average daily wages were about 9 cents each.

Stanley says if he had left Emin where he found him he would have been at this moment in Khartoum a common slave; nothing could have saved him. He was as much a prisoner as a slave in chains. The people did not want him. There was no government left, and the servants would not obey him. When he asked how many would return with him only one man consented.

Something new in the line of strike is presented by the beer-drinkers of Munich. 8 brewers, railway employes, tradesmen and workers in the factories have signed a pledge not to drink any Munich beer because the proprietors of the breweries have raised the price. In order to bring them down to the old figures the workers drink Strasbourg beer, Frankfurt beer, Dortmund beer, or any kind of beer that does not come from the Munich breweries.

PORTLAND MARKET.

The general condition of the local merchandise markets is all that could be desired. Trade is expanding in all directions, and country orders are heavier than last year. Abundant crops may be looked for everywhere, and should the farmers obtain a good price for their grain next fall times will be exceedingly lively. Visitors from the East are not arriving yet in such numbers as expected, still their appearance will be noticeable later on. Collections are living up considerably, and the railroad construction in this vicinity will materially increase the amount of ready money in circulation.
