Good News for Siuslaw.

There is now but little possibil-ity of the failure of the United

There is, however, another point

produced its effect upon men quick to discern counterfeit coin." "Governor Campbell will always be a political success," she continues, "for the man who thus impresses these implacable critics, convicts, these implacable critics, convicts, sioners have compiled for that comwill gain ends with voters."

Chairman Norton said of McKinlev: "He is my friend; I would to God that his law were as good and harmless and gentle and kind as he. McKinley may be as the dove or even the hird of paradise, but his very the information whose safe it was. or even the bird of paradise, but his law is as the hawk, the vulture and the coyote. They say McKinley is

The Moody family, of The Dalles, seems to be in luck, as the following from The Dalles Chronicle will show: Mr. Zene Moody has been appointed by the United States government to a situation in the Portland custom house, Mr. W. H. Moody has been appointed by the same authority, fish reporter for the Columbia river, at a salary of \$3.50 per day, and ex-Governor Moody, we are informed, will be appointed, within the next sixty days, to a government office in connection with swamp land matters.

The farmers of Eastern Washington are not entirely satisfied with the reduction in rates made by the Northern Pacific railroad. They will have to accept it, however, as final for this season at least, unless Governor Ferry calls an extra session of the legislature for the purpasse of passing a law regulating freights. This would be an expensive and hazardous experiment. The railroad company, not the people, governs in Washington.

Major Handbury, U. S. A., reports that the great engineering work at the mouth of the Columbia hia has so far progressed that success is assured, and that but little more time and money will be required for its completion. The construction of the immense jetty has changed the Columbia river with its shifting channel from a dangerous passage to deep sea ships to a safe and unchangeable channel lowest part, and soon to be increased to thirty feet. The jetty tramway is now over four miles long.

The move decided upon by tha Eugene Water Company is one thy. will greatly increase the efficiency and quality of the water supplie The water taken directly from the river is often discolored and muddy in winter, and too warm for drink-June till November. The wells from which the water will be taken will supply pure cold water, and, although it will go into the reservoir, the almost constant pumping in summer months will not allow it to become warm. The station will be convenient of access, and in case of a fire or other emergench can be quickly communicated wity.

The Portland Telegram will take notice that while Capt. Symons discourages improvements on the Upper Columbia and the Siuslaw bar he makes a very full report compli-mentary to Coos Bay, in which section he is interested in a townsite. "Yarrow" Symons should be removed from the service. His actions on the Siuslaw improvement alone stamp him as unworthy of the trust he holds at the hands of the government.

The present weather is not favorable for barvest operations, but it will help the filling of late grain.

A Big Wheat Trust.

Particulars of the great corner in a stan-projected by the farmers' altisuce are given in a St. Paul special to the New York Her-ald. St. Paul is the center of the move-ment, and 1,000,000 circular letters are being distributed from St. Paul by George M. Muller, editor of the State, one of the lead-ing alliance papers of Minne-ota. Mr. Muller said today: "The movement grows out of a general

"The movement grows out of a general States authorities to commence work as soon as the plant can be secured on the improvement of the Siuslaw bar. The prompt and united efforts of our Senators and Congressmen, Boards of Trade and the county press have awakened the lethargic powers that be. The telegram to Mr. Friendly, published in another column, explains the grounds for our belief.

There is, however, another point

"The movement grows out of a general coronaction to speculators and wheat gamblers. They have sold the crop, now we will see whether they can deliver the goods. December wheat has been sold by these speculators at 84 cents, and if they cannot fill the orders when the time for delivery comes they will simply less their margin. The extremely short crop in foreign countries, coupl-d with the increased demand and the absolute extainty that vast quantities of American wheat gamblers. They have sold the crop, now we will see whether they can deliver the goods. December wheat has been sold by these speculators at 84 cents, and if they cannot fill the orders when the time for delivery comes they will simply less their margin. The extremely short crop in foreign countries, coupl-d with the increased demand and the absolute extainty that vast quantities of American wheat gamblers. They have sold the crop, now we will see whether they can deliver the goods. December wheat has been sold by these speculators and wheat gamblers. They have sold the crop, now we will see whether they can deliver the goods. December wheat has been sold by these speculators at 84 cents, and if they cannot fill the orders when the time for delivery comes they will simply less their margin. The extremely short crop in foreign countries, coupl-d with the increased demand and the absolute extainty that vast quantities of American wheat will be required.

There is, however, another point for our people to carry. Captain Symons should have nothing to do with the work. His prejudice and animosity have been sufficiently shown to convince any one that he should not be placed in charge. He could delay the work, spend all the money for a plant, as shown by his own estimates, and prove a hindrance at every step. The Eugene and Florence Boards of Trade should not cease their efforts until Symons is relegated to a back seat, at least as far as this improvement is concerned.

BILL TOUR WHERAT.

It is involved in those three words, 'Hold your wheat.' Over 40,000 secretaries of alliances and kindred organizations in America have been sent twenty copies each of the situation and the reasons for the movement. To illustrate. The estimated crop of Minnesota and the two Dakotas is 100,000,000 bashels. It will only be necessary to hold this crop back a few weeks to advance the price 25 per cent., and only a little longer to advance it 50 per cent. This would have been impossible five years ago for me to have secured the nemes of 40,000 who would reach 4,000,000 individuals and thereby place me in a close communication with the entire agricultural class of this country.''

THE RALERGAD COMMISSIONERS.— HOLD YOUR WHEAT.

Campbell that he has a wonderful influence over men. He accompanied her with his wife at the penitentiary services a short time ago, and after the services was requested to address the inmates. She also writes: "What he said was not remarkable, but it was better—it was kindly, it was humane. There was a sympathetic timbre in his voice which fell gratefully on ears little used to music in any form; and produced its effect upon men quick on Garagaban."

THE RAILROAD COMMISSIONERS.—The board of railroad commissioners. The board of railroad commissioners will the state house Monday, at which the routine business was transacted. The board adjourned to meet at Ashland, Saturday, August 8th, where it will investigate the circumstances of the death of Engineer Rockford, in tunnel 14. The commissioners will return to Salem and hold a meeting next Monday. The officials of the Southern Pacific will appear before them at that time to consider the proposed tariff sheets which have been recommended by the commissioners.
