

The State University.

The report of the Board of Regents of the State University at Eugene, which has been submitted to Governor Penney by Hon. M. P. Deady, the President, shows the affairs of that institution to be in a prosperous condition. The report shows that during the past scholastic year the university numbered 352 students on its rolls. Of these 217 were in the classical department, thirty-six in that of law, twenty in the medical and ninety-one in the department of music. Almost all those taking the classical courses were Oregonians, only five being from Washington.

The report from the fund shows a gain of \$11,044 during the year. At the annual meeting of the regents the degrees of master of arts were conferred upon Henry F. McClure, Robert Collier, A. C. Woodcock, R. F. Rossoner, D. W. Bass, W. C. Cartwright, Jennie McClure, and Eva Rogers. The degree of bachelor of laws was also conferred on Charles E. Lewis.

Employes Must Be Paid.

ALBANY, Aug. 18.—The hearing of the petition of the employes of the Oregon Pacific railroad for an order of the circuit court directing the receiver, T. E. Hoeg, to pay them the amount of \$11,000 due them on February 1, was had at Corvallis today before Judge Pipes. The employes were represented by Attorney-General George E. Chamberlain and J. K. Weatherford. An order was issued by the court directing the receiver to settle with the employes on or before August 31, and empowering him to negotiate his certificates to raise the necessary funds. It is thought the money can be raised in this manner by the time the money due the men will be paid. Should the receiver fail to do so, he will be required to show cause to justify disobedience of the order of the court.

Last Friday we perched ourselves on the fence, on a sharp rail, and gazed at some object which drew our thought might be one of the Mt. Carmel, Ill., air ships which had gotten away and was coming west, but this conclusion was soon expelled and we sat there in the hot sun speculating whether or not it was an ad for Sells Brothers show, but, as it rose above the tree tops, and on discovering it to be a balloon, we "came down off the perch" and gazed intently off in the distance and as near as we could discern it was headed toward Fairmont.

Suicide at La Grande. F. L. Boyer, a real estate agent of La Grande committed suicide Saturday, by hanging himself. After breakfast Saturday morning he told a young lady to whom he was engaged that he was in trouble and left the house. About 6 o'clock in the evening a man called at the house to see him on business, and the sister went in search. She found him in his barn in the upper part of the city, hanging by his neck from a rafter. He had fastened a pair of reins from a rafter, placed the loop around his neck, and dropped from a beam in the upper part of the barn. The body was cold when taken down. Indications are that he must have committed the act early in the morning. He was about 30 years of age, had been in La Grande nearly two years. Partial insanity is thought to be the cause.

Recording Railroad Patents.

Patents numbered 3 and 5 conveying to the Oregon & California railroad company by the United States about 150,000 acres of land in the Willamette valley have been received for record at the county clerk's office. A large amount of the land is situated in Lane county. The entire patents must be recorded in every county in which a single tract of the described land. They bear recording certificates of a number of the county clerks down the valley.

This is the first record that has been made of any lands granted in aid of the construction of the Oregon & California railroad, although the railroad company has sold and ceded away thousands of acres. It is presumed the delay in placing the patents on record was prompted by the desire to escape as far as possible payment of taxes on the lands.

He sprayed his yard twice and it will not be affected by the hop louse.

It is said that milk is made especially nutritious if it is put in a jar and stood in a moderately hot oven for eight or ten hours. It is then called "baked milk," and has become thick and creamy. Prineville Review: Everything at the Deschutes brewery is now in shipshape order. The new brewer is making lots of beer, and of a first-class quality. As to the quality we are able to vouch for, the proprietor, Mr. Wood, has donated this office a sample keg, which is good enough to satisfy any connoisseur.

James Warnick is slowly recovering from the fall of 18 feet, when he alighted squarely on his feet. His feet and ankles are black from the injuries received, and although no bones were fractured, he is unable to bear any weight on his feet. He moves about the house on his hands and knees.

Mr. J. Powers, a carpenter working on a new barn being built for Dr. Shapley on his farm, fell from the building and sustained internal injuries and fractured his collar bone. Dr. Brown was called to attend him.

The Eugene cannery has secured some very attractive and showy labels. One of them is a fine simile of the bird's-eye lithograph view published by Geo. M. Miller and the town, University, McKenzie mountains and the Three Sisters. The name of the brand is "The Three Sisters."

The bulkhead and filling at the mouth of the sewer are completed. An automatic slanting gate will close at the mouth of the sewer in case of very high water to prevent back water from coming into town. The usual number of thieves and gamblers will be with the circus today, and we would advise our readers "Never to buck at another man's game."

GUS WILL FIGHT.—A Portland exchange of the 17th says. Gustave Hicketheier, the Washington street marble cutter, proposes to contest the divorce suit recently instituted against him by his wife Minnie. He filed his answer yesterday, in which he denies seriatim all the allegations of the plaintiff, and avers that within the year preceding her application she would frequently taunt him with her intention to procure a divorce, and extorted money from him, saying she would leave him and take the children and things east to her brother. He denies in toto that he has ever ill-treated her, and avers that since the occasions on which, in her complaint, she alleges he abused her, she has cohabited with him, and that whatever difference they may have had she has thereby condoned. He therefore prays for a denial of her application for a divorce.

ROUGH TRACK.—Very frequently, of late, it has fallen to the lot of the newsgatherer to have to chronicle delays to trains on the Southern Pacific, and in nearly every instance the same cause is responsible for the delay, viz: a disabled engine. The real cause, however, if old railroad men are to be believed, is in the rough condition of the track, which wears the engines out quickly. The impression seems to prevail that the O. & C. has too few men on the sections. These sections will average seven miles in length and on some of them there are not over four men.—Statesman.

The worst street at present in Eugene is Willamette, the one most recently "improved" at a large cost to property owners. Horses as well as pedestrians suffer. Their hoofs become clogged with the putty and they slip and slide as they travel.

Salem Journal: Captain O'Brien at the head of the Oregon federated trades is at the state printing office. He says the anti-boycott law cases will go before the grand jury.
