EUGENE CITY, OREGON.

A Cockroach and Fly Fight.

Did you ever see a cockroach and fly fight? No? Well, I saw one in which the roach came out victorious after six rounds. Whether it was Marnole of Our rounds. Whether it was Marquis of Queensberry rules or not I could not say. The ring was on the olled counter of an aptown office. A festive fly alighted upon the counter and aported itself as any well regulated fly usually does. An active young roach saw his flyship and immediately gave battle. The fly threw out his left duke and

caught the bug squarely on the head, dazing the bug for a moment, but he returned to the attack smiling, and with a right hand upper cut landed on the left eye of the fly, causing the latter to whirl com-pletely around a dozen times. A clerk present thought it a knock out blow, but call of time and rushed hereity at his opponent, with an evident determination to "do him up" instanter. But the roach's superior ducking tactics gave him an ad vantage, and he vigorously shot out his right knocking the fly clean off his pins and setting hims into another revolving and setting him into another revolving

The fly returned gamely to the attack four times more, and was finally put to sleep in the sixth bout. The reach then walked off triumphantly to his den, rear-ing up on his hind feet, as much as to say. "Oh, didn't I do him!"-New York Tele-

A Brave Chinaman.

E. D. Cahota is a native born Chinaman. He has lived in this country nearly forty years, having left the land of his birth when but 6 years old. Long before the Chinese exclusion law was dream of he had proved his fitness for the duties of American citizenship by taking up arms in defense of his adopted country and marching to the front.

Although but 15 years old when the war broke out he declared that he was over age, and enlisted in the Twenty-third Masachusetts volunteers, under command of Col. Andrew Ellwood-the only represent ative among the Mongolian race among the millions of men thus facing each other in a struggle for life and death. Cabota was an unique character. Under fire Cabota an unique character. Conter in Canota proved that he was made of the stern stuff, for his bravery was commented on during various engagements, notably at Cold Har-bor and in the building of Gen. Butler's

aignal station in front of Petersburg. At the close of the war Cabota was mustered out along with the survivors of his regiment, then under command of Col. Raymond, of Marblehead. Since that time Mr. Cahota has devoted himself to ousiness, there being little in common between him and the ordinary Chinaman be yond certain race characteristics of feature. In speech and dress he is an ordinary citi-zen.-Chicago Herald.

Facts About the lilk Industry. The silk industry of America has grown Into cousiderable proportions. Begun as an experiment twenty-five years ago, it now occupies 700 establishments, gives em-ployment to 50,000 persons and yields a yearly product of the value of \$60,000,000. Our ailk making is confined almost exclusively to staple goods. The high grade fabrics will probably continue to be made abroad on account of the special aptitude of the Lyons, France, cheap skilled hand labor; but for the production of staples the American manufacturer has the best machinery in the world. The growth of the industry in recent years is shown by the following figures: In 1883 domestic silks were produced to the value of \$35,102,030, as against \$57,957,051 in imported silks. In nestics were \$55,668,780, as against \$34,000,000 in foreign silks imported.-Chicago Tribune.

BLUBBER AS A DIET.

The Eating Habits of the Esquimans Not Very Different from O I had read about Esquimaux eating

habits-how, once upon a time, for instance, an arctic explorer offered some Esquimanx some sweetmeats, which were rejected, while tallow candles were eagerly accepted and eaten. Now I was to see an Esquimaux eat. With many smiles Peter entered the cabin and sat down at the table. I should have apologized to him on account of the scantiness of our fare, for we had no candles, and there wasn't a bit of

tallow on deck even, let alone in the cabin, but I noticed that the butter plate was heaping full, the sight of which made me wish for some of my friends, so that we could make a pool on the number of bites he would take

in swallowing the roll. Then Peter sat down, and without ceremony helped himself to a lot of and yards to pay the cost of the fodder there. Try to feed them so that the cows will not shrink in their milk, or the there is a large piece of very lean salt beef, all of which he bit into and swallowed as the others lose flesh before winter. It costs more to get back a pound of flesh or a quart of milk after a shrinkage than it would to feed so as to keep it and add two pounds to it. The down-hill road two pounds to it. The down-hill road It a hungry man might have done. Then seems to be easy after they start on it, of sugar to each cup. He was a long and it is not so easy to turn them about time getting to it, but he finally began on the butter. He had poured his last Fattening stock cattle, swine or sheep cup of coffee, and was looking about would in hot weather and gain more rapidly than they will in December. Increase the feed gradually, and watch small piece he put a small lump of but will now eat more heartily than they ter on it, and slowly ate the combinacarefully, particularly if a hot day comes, as too much rich food then may cause a feverish condition, which will check fat tion with the coffee. To the reader it may seem strange, but the fact is, untening, if it does not cause a total loss of appetite. Try to have them in a condi-tion to bring a first-class price when really expected to find the Esonimaux really expected to find the Esquimanx Some cattle are so unthrifty that of South Greenland showing the habits and tastes of those living a thousand miles farther up the coast.

I had not quite expected to find them living in snow houses, but I had a misty idea that an Esquimau was a little black Indian, whose chief delight among the things brought from a civilized country was the tallow candle. The staple food is seal meat and blubber. Next to that is the little fish taken in the flord and dried for winter use, known to them as the augmatfat, if covered up with straw they can be kept much longer than they can in and to the learned as salmo villosus A favorite way of eating the dried aug-

The

matfat is to take it by the tail, poke it into the oily blubber for a while, and then chew it down. Awful, isn't it?

The It is almost as bad as eating sardines. There is a deal in a name. Blubber is disgusting; oil, if for use on a salad; is delicions and indispensable. I have eaten seal oil and found it (very unexpectedly) good. I had supposed it would have a flavor of fish oil. There to the best extract of cotton seed -that quality sold as olive oil in all American groceries. Augmatfat and blubber, under a French label, would be esteemed a luxury in New York as in Arsuk.

For the rest the Esquimaux trade seal oil and skins to their governor for three kinds of hard tack, for coffee, sugar and tea. They catch arctic codfish (misarkornak in Esquimaux and perfluence plants taken out in prepa-ration for the mulching which will need to be done later. The material for mulching should be gathered together gadus navaga in the books) and salmon in the seasons. They shoot no end of gulls, ducks, ptarmigans and the arctic hare. They have eggs in endless quan-

Two Maine Women and Three Bears. The Parkersons and Ackleys pasture their cows in the same lot. Saturday

night these cows did not come up to the bars as usual, and after waiting a reasonable time Mrs. Thomas Parkerson and Mrs. Elbridge Ackley started out to find a them. It was almost sundown when the women began their quest. They pushed on, however, and having climbed the hill had entered a belt of old growth woods on the edge of the swamp when Mrs. Parkerson caught Mrs. Ackley by

the arm, crying: "Oh, my! look!" pointing to the right. Mrs. Ackley followed her advice and did look.

What she saw would make an ordinary woman faint away, but downeast women are made of sterner stuff, so when she silently handed him a cup it the saw three bears, a female and two cubs, she said "Oh, my," too, and both women went to a pile of cord wood close by and procured two stout round birch sticks about four feet long.

The subsequent battle was short, but The subsequent battle was shown battle and single rose and laid it gently a and weak. She made a deal of noise, the water He laid it on so set and weak. She made thing she "wasn't not a drop was displaced, and in but when it came to hard moved up and back to the president with a back in it." Two times she moved up and back to the president with a back showed fight, but failing to break through the waving wall of clubs got down on all fours and beat a hasty retreat, followed by her two young cubs. One of these little bearlets was very weak and could not run nearly so fast as the other, so in the course of ten or fifteen minutes the old mother bear and the stronger cub were out of sight, leaving the poor weak one to the tender mercies of two wideawake women.

The little fellow was soon dispatched, the cows were found, and the tired victors went home to get supper, proud of their work.-Trescott Cor. Bangor News.

Few Organized Working Girls.

The number of working girls and women gathered into any sort of organization in New York city is, at the widest calculation, fewer than 5,000. In the factories which the inspectors visited during the past year there are 30,000 women employed, and counting those who work at various trades, as well as servant girls, the total will not fall far short of 150,000. This would seem to leave a wide field for the expenditure of the energies of the Knights of Labor, trades unions, working women's societies and working girls' clubs, without danger of knocking elbows. There is, at any rate, no fear of a dearth of raw ma-

terial. There are various rumors afloat of proposed new central bodies of women's organizations. One of these, which will be composed of delegates from the various women's unions, will be affiliated with the Central Labor federation. The the K. of L. will try to organize a working women's district assembly. This will be simply the resurrecting of an attempt made by Charles Guy Brown, who died recently, when he was editor of The Union Printer. It was a flat failure then, and why it should be more successful now is not apparent. There is plenty of room, however, for all newcomers who wish to make experiments.

Worans in Dried Fruit.

-New York Recorder.

Sometimes after exercising the greatest care in putting away dried berries. apples and corn the housewife will in a few weeks find them infested with worms. Many methods are suggested to prevent this-heating in the oven just before tying up in a thick paper bag; mixing with the fruit a quantity of sassafras root bark: sprinkling the outside of the bag with pepper; enveloping the sections where as yet these hour bag containing the fruit in another of made much impression. Hints That Will Bring

How the Ocean Is Sounded

It has been found difficult to get the cor rect soundings of the Atlantic A mid shipman of the navy overcame the diffi culty, and shot weighing thirty pounds carries down the line. A hole is bored through the sinker, through which a red of iron is passed, moving easily back and forth. In the end of the bar a cup is dug out and the inside coated with lard. The bar is made fast to the line and a sling

holds the shot on. When the bar, which extends below the ball, touches the earth the sling unbooks and the shot slides off. The lard in the end of the bar holds some of the sand, or whatever may be on the bottom, and a drop shuts over the cup to keep the saud in. When the ground is reached a shock Its cost will be \$20,060. is felt, as if an electric current had passed The great initiation through the line.-Ocean.

He Was No Idiot.

Cheery John Maclean made his first appearance in London at the Surrey some where about 1861 as Peter Purcell in "The Idiot of the Mountain." Shepherd and Creswick were the managers of the theatre then, and Maclean was standing one day at Rockley's, when a kind friend pointed out the newly engaged actor to Shepherd, who, having been ill, had not yet seen him.

"You're playing in my theatre, Mr. Maclean?" Shepherd bawled. "I'm play-ing in 'The Idiot of the Mountain,' sir," Maclean replied half timidly. "Glad to hear it, sir, glad to hear it?" Shepherd exclaimed, "you're not the idiot, surely?" "No, sir," Maclean answered with a seri ous face, "the manager who engaged me is the idiot."-San Francisco Argonaut.

Delletous Indian Tea.

As you near Darjeeling you find many of the hard woods of our American mountains, the rose begins to bloom, and there are tea plantations by the hundreds of acres. The tes of the Himalayas is the best in the world, and I would advise American housekeepers to try the Indian tea. There is a tea in Thibet which has the flavor of milk to such a degree that when used it has all the properties of good tes mixed with the most delicious of Jersey cream. This Himalayan tea has the flavor of flowers. It is pure and clear, and it is supplanting the Chinese tea in the English markets.-Frank G. Carpenter's Letter.

Pin Money.

I've heard a good many explanations of the term "pin money," as applied to the pe-riodical dole given by husbands to their wives, but nobedy yet has hit on a theory I have long cherished. What is that?

The place where a woman's pins are always put for safe keeping while she is get ting ready to use them is her mouth. Do you see the logic? The more pins the less talk. So an accient trick has passed, as it were, into a proverb.-Kate Field's Wash-

burned before the plowing. There ought not to be any weeds going to seed there, but there usually are some, and they are more apt to be there this year. as the farmer has been kept very getting his crops harvested and marketed.

Permanent Improvements. Such work as ditching and draining

low land, digging out rocks and stumps, building walls and fences where needed, or removing them where not needed, is always in order if the farmer has time to spare for it, and so are the repairs of buildings and their alterations as necessary to add to the comfort of the people or the animals who occupy them, or the ease of doing the work that must be done in them. If dry weather contin-

ues, muck may be dug from the swamps and put out where it will drain out and freeze and thaw a few times this winter. The muck from some swamps has a great deal of decayed vegetable matter, and has some value for spreading upon sandy or gravelly land, or for using as an absorbent in barnyards and barn cellars. It should, however, be dry and exposed to weather at least a year before it is used for either purpose, in

order to get the acid out of it which has developed when in the stagnant water. Inless it is thus seasoned it is injurious o vegetation.

Making Cider.

If cider is made, even though it is intended to be made into vinegar instead of

unpleasant flavor should not be allowed to go into it, and it should be put into clean casks. If made early, it becomes vinegar much quicker than late-made One of the unique features of the cider. The process of vinegar-making Mexican exhibit at the fair will be the may be hastened by allowing it to drip celebrated Panduza famly, consisting of or run in a small stream from one cask

Wild Geese and Electric Lights.

The night was still and dark, and as the birds flew over the city some of the geese would get bewildered by the

circle round and round the light, world, squawking as if lost. The ducks do not seem to care for the excitement of city life and go quietly on their way, but a goose is so supremely curious that he can hardly pass an electric light without flying round and examining it. About two years ago there was a terrific thunder storm, during which a flock of geese, numbering probably 200, entered the city and soon became bewildered by the storm. Some of them, it is said, even lit on the roofs of houses, but certain it is that at half past 4 or 5 in the morning there was a great flock of geese sitting in the light of the are lamp, on the corner of Main town. This, of course, is an exceptional muskets on Wellington's funeral case, and would probably never have happened if it had not been for the storm, but why they should be so irresistibly attracted toward a light as to

lose all fear of man's habitations, and to alight in the middle of the street has always been a wonder to me.-Forest and Stream.

Justifiable Homicide.

Perhaps the queerest lawsuit on record -one that deserves a place in the legal records of Georgia-was that which was recently decided in Morgan county. A drummer hired a mule and buggy to go jam. The drummer plied whip and the society. mule kicked back. The mud flew, but the drummer held his own.

When patience ceased to be a virtue The owner of the male brought suit against the drummer for the value of his quadruped, whereupon the jury brought in the following verdict: "We, the jury. find the defendant not guilty, and the killing a case of justifiable homicide."-Columbus Enquirer-Sun.

Cigarette Hearts Not Very Useful.

An autopsy on the body of young Potwas found that he had a very prononneed case of "cigarette heart." The smoke causes the valves of the heart to harden. and extra effort of any kind results in
