Western Branch, Box 27, PORTLAND, OR  
For Sale by H. R. LUCKY & CO., Eugene.

**THE CRY OF MILLIONS!**

**OH, MY BACK!**  
STOP IT NOW!  
SOON IT WILL BE TOO LATE.

I have been troubled many years with disease of the kidneys and have tried many different remedies and have sought aid from different physicians without relief. About the 15th of April I was suffering from a very violent attack that almost prostrated me in such a manner that I was bent over when I sat down. It was almost impossible for me to get up alone, or to put on my clothes, when kind Providence sent Dr. Henley, with the **OSBURN KIDNEY PILLS**, to my home. I immediately commenced using the pills. It had an almost miraculous effect, and to the astonishment of all the guests at the hotel, in a few days I was happy to state that I was a new man. I will recommend the pills to all afflicted as I have been.

**Too Much Load**  
On the Liver will break down all the energies of life, and unfit you for Work, Business or Pleasure.

Indigestion, Constipation, Sleeplessness, Biliousness, are the first alarm nature sounds to warn you of danger.

**Moore's Revealed  
Remedy**

Is King of the Blood, Liver and Stomach—It has Never Failed.

Hundreds of testimonials like this: J. A. Miller, Astoria, Or. writes: "It cured me of a severe Liver and Biliousness."

MONDAY, NOV. 23.

Robert Hayes was on the streets today. John Brunley has left for Park City, Utah.

A marriage license was granted to Orville Edwards and Ella Downing today.

J. M. Kison leaves for a short visit to the Palouse country, Wash., tomorrow morning.

Section Foreman Patterson has planted a few young fir trees at the depot. A good idea.

The Marine Cadets have rented the third story of the Matlock building for an armory and gymnasium.

Large congregations attended the different churches yesterday. Eugene is certainly a church going people.

Wm. D. Pool, the Springfield barber, has moved his shop into a room in the Springfield hotel. He has purchased a new chair.

J. N. Bunch returned Sunday morning from a three weeks trip to Coos Bay. His son Fred and sister, Mrs. Hattie Alvey came back with him.

Mrs. M. A. Rankin, of Portland, who has been visiting relatives and friends here for a week, returned to her home on this morning's local train.

A force of six carpenters commenced on the woodwork of the United Brethren church this morning. The work will be rushed until the building is enclosed.

H. W. Holden returned from Boise City, Idaho, last evening. He was unsuccessful in receiving the contract for the sewer work at that place, his bid being \$22 above the lowest.

The editor of the Okanogan, Wash., Sun announces his marriage in one issue of his paper and in the next chronicles the birth of a daughter. They also raise 100 bushels of wheat to the acre in that county.—Ex.

J. N. Bunch received a silver medal for the best washing machine, the Pacific, exhibited at the Sacramento state fair. The medal is of handsome design and is the highest honor conferred upon exhibitors.

One of the divorce cases in the Benton county circuit court was called for the dissolution of the marriage of Mr. and Mrs. John Foster. The marriage only occurred a few months ago and attracted attention on account of the bride being 17 and the groom 71.

Such marriages are simply ridiculous. As the groom is worth probably over \$100,000 it is safe to say there will be a big fight over it.

The Astorian says: "The superintendent of every newspaper publisher in Oregon to send a copy of his paper for the 700 inmates to read. Oregon newspapers are excluded from the penitentiary as having a tendency to contaminate the morals of the convicts, but the insane asylum superintendent evidently thinks the Oregon journals good enough for crazy people to read."

Work on the north jetty at Coos bay is progressing rapidly. The assistant engineer, who is in charge of the work, is J. S. Polhemus.

About forty men have been employed since the work commenced in April, and about 4000 feet of piling has been done, and the rock work has been completed to about half this distance.

The entire project is to be built out much further. No more work on piling will be done on the end of the jetty during the winter.

The appropriations asked for amount to \$2,000,000, as modified from the original \$2,468,000. A jetty will be constructed at the south side of the entrance also, at work on that has not been commenced.

The appropriation for this year amounted to \$125,000, and if all that is asked for is given by congress, the work can be finished in a year or more.

Already the jetty is 4000 feet in length, and has accomplished much good. Two months ago there was but fourteen feet of water on the bar.

Now there is a depth of twenty feet at high water. The jetty has stopped up several small channels running to the north. The idea is to have a channel twenty feet in depth at low water.

Several times when the Wilmington was on the Coos bay route, months ago, she struck when crossing over in rough weather.

**General Slocum's Joke.**

From the Richmond Times. In the course of the conversation Governor Hill said: "I was talking with General Slocum at breakfast just above Ashland and I asked him how many hours it would take to reach Richmond."

"I can't tell you," he replied. "I started once for Richmond and tried hard for four years, but never did get there."

Carter Harrison, the new editor and proprietor of the Chicago Times, will substitute "I" for "we" in the editorial columns of that paper. "I" is a great figure in Carter's eyes.

J. Sloat Fassett, Republican candidate for governor of New York, has filed his certificate with the county clerk of New York county showing that his election expenses amounted to the sum of \$8,450, and then suffered defeat. Flowers' expenses were a little over \$5,000.

Roseburg Review: Charles E. Wolverton, a prominent Albany lawyer, is the latest candidate mentioned for congressman in the first district on the Republican ticket.

It is said that he seeks the honor, and he is certainly the strongest man yet brought out against our own Binger. The politicians of the district generally concede that Hermann is out of the race since his letter to Miller has been published.

The fight will be between Miller, Geer, Wolverton and probably Jennings of Lane, and there are numerous dark horses besides.

The Second Judicial District possesses a considerable Republican majority, and with a capable candidate in the field they will elect the next circuit judge without a doubt, against any man the Democrats can produce, unless it be Judge Pipes, who has made himself extremely popular in Republican counties, by his straightforward dealings, fair and impartial rulings, and his dignified but unassuming and gentlemanly bearing.

The Democratic party of the Second District may be assured of this fact: With M. L. Pipes as their candidate they have a possible chance of retaining the circuit judgeship. Without him they may as well let the nomination for the position go by default.—Gold Beach Gazette, (Republican).

**Good Reports from the Mines.**

Yesterday, Mr. Legh Harrett, the mining expert, of Portland, and Mr. Murray, a mine owner from Gold Hill, paid a visit to Eugene to report they make of the present prospects of the district are very gratifying.

It seems now, that all Mr. Harrett, in the face of adverse circumstances and opinions, predicted for the mines two years ago, when he wrote them up, and that he is the only public man, who took a correct view of the Blue River district.

First they showed us from assays, recently made by Thomas Price & Son, the oldest and wealthiest and most reliable firm in that line in San Francisco, which in uniformity of big pay, exceed anything we have seen or heard of in the district—these assays ran as follows:

Name of Mines.	Gold Per Ounce.	Total Ton Gold and Silver.
The Cliff.....	42 10.....	\$ 84 19
Defencia.....	10 7 10.....	214 35
Kenton.....	5 35-500.....	166 30
Total Week.....	10 1-10.....	992 27

Signed, THOMAS PRICE & SON.  
The above figures are enormous and would allow a large deduction and then be especially good, but in this case they have an additional value in the fact that with the exception of the Defencia, one of the oldest mines on Gold Hill, the others are all new locations—thus giving renewed assurance of the vast richness of the district.

When we recollect that the Blue River mines are chiefly tributary to Eugene we can see the importance of this information to our people.

Fortunately these assays are supported in their full meaning, by recent developments on Gold Hill and the spirit of confidence, prevailing among the owners of mines. First of these the Foreman mine is mentioned. The tunnel here is 300 feet in length, and at the end the vein fills the breast of the tunnel. When Mr. Murray left the Hill a crosscut was in progress, but though in ore the precise width of the vein was not ascertained but it was then enormous. All the ore wherever tapped was of a very high grade.

In the Foreman prospect very high. The ore was very springy intended to put up a good mill. They know now they have got a mine of great value. Then

THE DEFENCIA,  
is proving up in the same way. The tunnel is now 130 feet in length and the vein increasing every foot so that in a few feet more it will be wider than the tunnel, certainly 8 feet wide, perhaps more. A large amount of ore is now on the dump and as it assays \$214.85 a ton, not selected specimens, the value of the mine can be correctly estimated.

BLUE RIVER MINING COMPANY.  
Formed principally by citizens of Eugene, has done much work this summer on the Sisters and Durango and have made promising progress.

Among the new locators made this summer, those of Chancey Daley are remarkably good and those of Messrs. Murray and Butler equally so.

Altogether, the camp never presented such a promising aspect. It has passed from uncertainty into a veritable mining camp worthy of capital in every respect.

Yet it's real merit or extent is not half known. All this convinces, with a greater intensity of interest the question of

**A WAGON ROAD**

To the mines. It is very evident no local or individual interest must be allowed to decide this question.

How the road will be best in the public advantage must alone decide the route finally.

Proposed by Murray and Manager, to cut the road from Mr. Peppiott up Gate Creek, twelve miles for \$600 on the following conditions which are better security to the public than any bonds that could be given for the completion of their contract.

These men are both large mine owners on the bill, ask for \$100 to start with for grub and tools, and then another \$100 on the completion of every two miles until the \$600 is consumed.

This will take the road to the foot of the Big Elephant, as it is called, and thence the three miles to the center of the camp, there is now every reason to believe Linn county will assist to complete the remaining three miles.

This is not merely an assumption but a fact, based on the people of Brownsville owing as much interest in the mines as the people of Eugene, and also because the Brownsville people have ever been earnest in their exertions to get a road and because this route will in the end be cheaper and better for Linn county, for all purposes of hauling and travel than any other that can be selected.

This important matter will be brought right away before our local Board of Trade for a thorough discussion. In the meantime, we hope our citizens will think it over carefully. Let it be remembered first that a road has to be made into the mines; next, that this winter is the time to make it; next, the Messrs. Murray and Manager will not make a dollar in cash by the transaction; and lastly, that it is an opportunity which may never be presented to the people again.

The property-owners of Willamette street have just cause to complain in the manner in which the alleged improvements were conducted.

To commence with the contractors were allowed to fill with sand, loam and large gravel, when only fine clean gravel should have been used.

Then, to improve this, a mud coating was given it. Treble the amount charged for this would have planked the street in good shape.

When the slush became unendurable city money was wasted by hiring a large scraper to remove about one-tenth of the mud coating.

This left it but little better, and again the city took away a larger proportion with shovels. The street was rendered more passable, but still was a disgrace to the town.

Now the sweet privilege is given to property-owners to scrape and sweep the street at their own expense.

They must pay for work that the money expended by the city in makeshifts would have amply provided for. They pay an exorbitant price to have mud hauled on, then must pay to have it hauled off.

This more particularly refers to blocks between Seventh and Ninth streets. The other property-owners on both ends of the street have been worse treated.

Owning large frontages, their bills for the privilege of having good, hard, settled streets torn up and replaced with mud and slush are heavy.

John Sherman has served Wall street too long and well to doubt his own election. He knows Wall street will be grateful as long as it expects future benefits, and Mr. Forker's mouth is too large for its uses.

During nineteen years, ending 1888, the capital of the National banks was \$480,712,940. The net earnings during the same period was \$5,517,418, or about 1 1/2 per cent. on the capital invested.

**Worthy of Imitation.**

They have a practice in New York state, says the Salem Statesman, Rep., of both parties nominating faithful judges who will not be re-elected. At the late election three judges of the supreme court were renominated by both parties.

The other candidates, both republicans, in another district were also unopposed. The judge elected in still another district, a democrat, had no opponent.

Hamilton Ward, who was elected in the eighth district, without opposition, was so highly regarded that Governor Hill, in spite of the fact that Mr. Ward was a republican, appointed him to the bench when a vacancy occurred.

These are pleasant incidents to record, and they serve to show that the people of the Empire state have a just pride in their judiciary, and strive to keep it disconnected from partisan politics.

Daily Guard, Nov. 23.

We claim this to be an age of intelligence and civilization and point scornfully to the superstition of the dark ages.

Yet the court house in Eugene was thronged every night for the week past to listen to an enthusiast, whose mental balance has been touched, proclaim that after March next seven years of tribulations, wars, famine and pestilence would ensue, then the millennium.

Predictions of this tenor have been made for years past, and many are the times that have been set for the final catastrophe, yet old earth continues her revolutions and pursues her flight through space, while many of the would be prophets have found their resting place in her bosom.

The fight between the Union Pacific and opposition line becomes more intense every day at The Dalles. As an illustration, a Union Pacific agent offered to take a man and his family and team to Portland for \$11.50, but then a "Regulator" agent got hold of him and changed his mind.

When a Union Pacific man offered to carry him for nothing and give him a dollar beside, a Dalles paper is responsible for the statement that if he had accepted the Union Pacific agent's offer he would have found himself mulcted for about \$15 at Portland, which he must either pay or fight the company in the courts.

Statistics received by the Bureau of American Republics show a growth in the population of the Argentine Republic since 1861 from 1,350,000 to 4,000,000, and in the number of acres under cultivation from 490,000 to 7,000,000.

In 1861 the only railroad was Buenos Ayres to Merio, a distance of 18 miles. Over 5,000 miles of road are now open to traffic, and 6,000 more in course of construction.

The public debt has increased from \$17,000,000 to \$401,000,000, exclusive of cedulas and the paper currency, which raise it to \$613,000,000.

Governor Boies is quite right. Not only in Iowa but in every other agricultural state of this Union the farmers will insist upon making "an intelligent comparison of the effect of our protective system upon their own and other industries of the country."

They will insist upon knowing why wealth in the comparatively barren manufacturing states piles up at a rate from twenty to forty times as fast as in the fertile producing states of the West.

The largest warship in our navy at present is the Miantonomah, a heavy fighting vessel of the Monitor type. It is armored with iron and steel plates.

The Miantonomah, by sheer force of its weight and size, could run down and crush any ordinary naval cruiser that it come near enough to it.

It is meant for sea battles and coast protection. In the spring there will be two more of the same type completed, the Terror and Puritan.

The Lane County Horticultural Society seems to be either dead or sleeping. This society, if properly managed, would be capable of doing a great work in this section.

Trees are being planted by the thousands, and the fruit-growers should confer with each other, for the suggestion given by each individual would be valuable to all.

Then, why not the president call the society together and reorganize it, or form a new one.

Gov. Hill of New York will not take his seat in the senate when it meets in December. He will not vacate the governor's chair until several weeks later, when Flower will be inaugurated.

David B. looks out carefully for the welfare of the Empire state, and does not propose for even so short a time to take any chances by leaving the helm of state to cranksy Lieut. Gov. Jones, who was supposed to pay the freight.

The Klamath Star says that June next will glow with political heat all over Oregon. The election of nine district judges, a supreme judge, two congressmen and a fresh legislature will raise the partisan temperature and put a fine flush on party editorials, and the campaign liar will have a sore throat.

It has been officially decided that letter carriers must not be in the habit of betting on horse races. This, for reasons not necessary to mention.
