Does it Contain Ammonia?

The charge is being made that the Royal Baking Powder contains ammonia. We would have supposed that the emphatic condemnation of ammonia baking powders by the most eminent physicians throughout the land, and the fact of the three leading chemists of Minnesota making their report to the Senate Committee recently showing that bread baked with the "Royal" contained ammonia and the hostility now being manifested by the public against all ammonia and alum baking powders would have driven them permanently from the market.

In view of the fact that Baking Powder has become an indispensable article in every kitchen, it is gratifying to know that there are brands in the market to which no suspicion of any kind has ever attached. Dr. Price's Cream Baking Powder is a pure cream of tartar powder free from every taint of ammonia, alum or other harmful substance.

Dr. Price's Cream Baking Powder is reported by all authorities as free from Ammonia, Alum, or any other adulterant. In fact, the purity of this ideal powder has never been ques-

Clever Diamond Smuggling. Talking about smuggling reminds me of a trick I saw resorted to by a passenger on one of the big steamers a couple of years ago," said a loquacious commercial traveler. "You know there is a duty on diamonds, and one of the passengers had three large stones, worth several thousand dollars, which he had purchased in London. The problem of how to evade paying the wids, sprains, bruises, or pains of any problem of how to evade paying the duty on the stones worried him considure been entirely satisfactory and beneerably, but at last he evolved a plan, and a few days before the steamer arrived in New York he proceeded to exe-

"The chief officer had a little Skye terrier, and the passenger after considerable coaxing induced him to sell the dog. As soon as the smuggler gained possession of the animal he tied him up and gave him nothing to eat until just before we were to go ashore. He then procured some fat meat from the cook. and cutting off a piece a little larger than a walnut made a hole in it into which he placed one of the diamonds. "A dog will generally bolt a piece of

fat without chewing it, and of course a the State of Minnesota, for example, has written us a letter in which it diamond will go down with it. The there appeared before the Senate coms evident that he has made up his hungry dog swallowed the meat, as his mind concerning some things, and owner expected he would, and in a charles W. Drew, Ph. We are better far asunder -New York Tribune AMMONIA DOES NOT LEAVE THE

BREAD. This is Proven by Actual Tests in Bak-

ing-No Sophistry Required.

The fact that scientific and medical nen, and State Legislatures have not hesitated to talk about the subject has challenged the attention of the public to the discussion about the effect of ammonia and alum in food products. Aside from the claim of rival com-

panies which have to deal with this question, there remain a few truths on which people can build their own conclusions. One of the claims made is that ammonia when used in baking powder put into bread, disappears in baking of the bread. To be scientific, the claim is made that ammonia is a volatile salt. Medical men of repute, chemists of unquestionable standing, and practical business men who have given the matter unbiased investigation, say such is not the case. The opinions of these gentlemen have been printed. The question was of sufficient importance to warrant some of the Legislatures of the country to take it up and pass upon it. Before action was taken on the matter the committee in charge called chemists before them and tests were made. In mittee in charge of the investigation, stantly in my house, and we consider the bouse officials, and was soon on his way at the University o Minnesota. As the question was, "Is ammonia a volatile salt?" it was necessary to use in the test "' it was necessary to use in the test such baking powders as are acknowledged to contain ammonia. The list included Andrews' Pearl Baking Powder, Woods' Acme Baking Powder, and Royal Baking Powder. Dr. Drew found in each a cream of tartar powder containing ammonia. He also found in the Forest City Baking Powder an alum powder contain ing ammonia-alum, and in White Rose Baking Powder, an alum-phosphate containing ammonia-alum. He stated to the committee the following emphatic opinion: "I would not recommend the use of such powders to my patients, nor samples of bread broken when hot, by the smell, unmistakable evidence of the Nobody seemed to know and the presence of ammonia, Prof. Dodge made six tests, and found that the Risteacher, a long suffering student from ing Sun, the Royal, Woods' Acme, and the university, lost his patience. Shut-ting the book with a bang, he dismissed tained ammonia, and that the Forest City and the White Rose contained ammonia-alum, and found ammonia in each of the six samples of bread made composed of business and intelligent men, to recommend the passage of a bill

which would require the manufacturers the packages offered to the public, so that the consumers could not be dethat the consumers could not be de-ceived. Mrs. B. Talks About Her Husband's Progressive Euchre Party. Mr. Bewser suddenly looked up from his paper the other evening and asked:

Why is it that we haven't given a progressive euchre party this winter?" "They have been voted too much trouble," I replied.

Well, Mrs. Bowser, I shall give a progres sive euchre party next week, Wednesday evening. If you'll see to the refreshments I'll see to the people."

"I'll be glad to, of course, but"-

"You must prepare yourself for disappoint-

"Oh, I must! How kind of you to give me warning! Mrs. Bowser, I don't want to seem vain or egotistical, but I'll invite thirty-six people here on that night, and for every one who fails to come I'll give you a \$30 bill. "You are kind-very kind. I hope the party will be a great success. You can begin

When he came home next night he had a list of eighteen couples who had been invited and solemnly promised to come.

"Voted too much trouble—can't get people enough!" sneered Mr. Bowser, as he looked over the list. "It's in the management, Mrs. Bowser—all in the management."

For three days he walked around on tip toe

and took every occasion to brag over me. Then came the first set back. We were at dinner when the telephone rang and Mr. Bowser was asked for. "Hello! Bowser!"

"Yes." "This is Filbert."

"I wanted to tell you that we can't come down to the party.' "You can't!"

"No. My wife has just remembered that she agreed to go over to Johnson's on that night. Sorry, old fellow, but I hope"—
Mr. Bowser shut him off with a loud bang

and turned to me and said: "Mrs. Bowser, don't you never darken Filbert's doors again-never! They are liars and dangerous people. I can fill their places in five minutes."

Before he got out of the house there was another ring. "Hello! Bowser!"

"Yes,"

"This is Watkins." "Yes."

"When I told you the other day we'd be down Wednesday evening I forgot that our Eva was to have a child's party on the same evening. That knocks us out." "And you can't come?"

"Of course not. Sorry to disappoint you, old fellow, but of course "Watkins is a liar, Mrs. Bowser-a first

class, bold faced liar!" exclaimed Mr. Bowser, "and you want to cut the whole family as dead as a door mail?" He went off saying he could get two million couples to take their places, and he returned at evening just as the following note came by

the hands of a messenger boy:
"Mr. and Mrs. Jackson present their comments, and regret that the death of an uncle in China will prevent them from being present on Wednesday evening.

Mr. Bowser had begun to turn white when the telephone rang. 'Heilo! Bowser!'

"Say, old man, this is a world of change, you know. When I told you we'd come down to that party I never thought about my sister. She's to be married that same evening. Tra-la, old boy, hope you'll have a good

"I told you it would be hard work to get so

many people out," I remarked.
"Did you, Mrs. Bowser! How kind of you! But I'll show you and these liars and de-ceivers a thing or two before I get through." There were no more declinations until Wednesday morning. Then Mr. Bowser was called up by telephone.

"Is it to-night you have that party?"

"Pshaw! I thought it was a week from to-night! Well, that knocks us out. We've got to go to the Y. M. C. A. Sorry, you know, but this is a previous engagement." Mr. Bowser was jumping up and down

when there came another ring:

"Helio! Bowser!" 'Yes." "Nice weather."

"Yes." "All well down there!"

"That you, Bowser?"

"Yes." "Say, Bowser, my wife made a previous engagement for to-night. We've got to go

Mr. Bowser shut him off with a bong and started for the office. During the forenoon I took in two more declinations, and while he was at dinner there was a ring and the old familiar bail:

"Hello! Bowser!"

"Say, Bowser!" "Yes."

"We expect to be down early to-night." "Glad of it."

"But it may be that my mother-in-law will come in on the 6:30 train. If she does we can't come."

Mr. Bowser seemed dazed as he hung up the trumpet and left the house. The last blow came at 7 in the evening. The telephone rang and he crawled over to answer.

"Yea."

"Where's the old man?" "I am Mr. Bowser."

"Oh! so you are. Your voice seems mighty weak to-night. Say, old man, the three couples of us in this terrace were coming of such baking powders as contain alum down to-night, but we must disappoint you at and ammonia to have the fact printed on this late moment. We have had free tickets sent up for the opera, and of course"

> Improvements in Smoke Suppression. Determined attempts are being made in Chicago to suppress the blinding smoke that is blown ashore from passing steam craft. An experiment was made recently to demonstrate the practicability of a new invention. A small tube with a perforated top, like that in a sprinkling can, was introduced into the smokestack, and through this steam could be injected upon the uprushing smoke, which immediately condensed. The little tube, with its jets and sprays of steam, is not a smoke consumer, but there seems little doubt of its utility in

the prevention of smoke.

A Shower of Grain

it is indeed a remarkable tale from Diarbekir (Turkey in Asia) which is told by the Turkish journal The Tarik. During a recent tempest there was showered from the skies neither hailstones nor raindrops, but grains of millet. The inhabitants of Melessa and Muhal have gathered the grain and have stored it, and are grinding it for bread.

Dr. John C. Berry, who is in Asia on a vacation, mailed a letter and a postal card to Dr. R. D. Bibber, of Bath, on the same day, sending one westward via St. Petersburg and the other east via San Francisco. The letter and postal card reached Bath in the same mail. - Bath (Me.) Times.

A delicate white scarfing may be worn with less apprehension, and therefore greater satisfaction, than during the warm interim when the protective collar melted under the perspiring ooze and endangered the costly fabric.

SOMETHING FOR THE NEW YEAR.

The world-renowned success of Hostetter's Stomach Bitters, and their continued popularity for over a third of a century as a stomachic, is searcely more wonderful than the welcome that greets the annual appearance of Hostetter's Almanac. This valuable medical treatise is published by The Hostetter Company, Pittsburg, Pa., under their own immediate supervision, employing sixty hands in that department. They are running about eleven months in the year on this work, and the issue of same for 1821 will be more than 10,000,000, printed in the English, German, French, Welsh, Norwegian, Swedish, Holland, Bohemian and Spanish languages. Refer to a copy of it for valuable and interesting reading concerning health, and numerous testimonials as to the efficacy of Hostetter's Stomach Bitters, amusement, varied information, astronomical calculations and chronological items, etc., which can be depended on for correctness. The Almanac for 1862 can be be obtained free of cost from druggists and general country dealers in all parts of the country.

The tramp has reached the hay-day of his propensity when he is allowed to sleep in the barn THE PROGRESS OF THE CENTURY

Leans away from superstition and blind idolatry of isms and ics-allopathic in-cluded. It leans toward universal, all-deter-mining law; towards facts, not fancies. It leans towards immutable principles and inleans towards immutable principles and invulnerable truth, and away from superannuated authority, organized ignorance and dyed-in-the-wool prejudice. Blind empiricism in medicine has, with other fossilized bivalves, had its day. Yes, there are plenty of "belated crabs." but being born of darkness and fear—twin sisters of intellectual inflancy—they cannot much longer withstand the civilizing influence of advancing science. They are slowly but surely "dying Egypt, dying," before the "search light" of investigation. The advancing thinker wonders how it was possible for that monstrosity—the medical science (?) extant now—to have survived to this late day! But where was the reform to come from? It is not only passe to attempt refrom? It is not only passe to attempt re-form, it is outright dangerous. It requires a boldness akin to recklessness. Legion is the name who have tried; they have left their bleaching bones as a warning. An attempt at reforming theology brands you a
