OCcidental Melange

Union Pacific Train Collides With a Runaway Coal Car.

THE HOP LICE APPEAR IN OREGON.

Total Amount of Peculations of Collins and Dare—The Kimball Olive Oil Works—Etc.

Los Angeles is once more striving for an outfall sewer to the sea.

San Diego wants 800 square feet of space for its county exhibits at the World's Fair.

Francis G. Newlands was elected President of the National Mining Congress at Helena, Mont.

The Union Pacific is arranging for a new line of steamers between Portland and China in place of the Upton line.

A fire in the basement of the court house at Prescott, A. T., originating from stacked lime, caused a loss of about \$6,000.

The weather in Oregon is beneficial to the crops. A good yield of grain is promised. Hop lice have made their appearance.

The Canadian Pacific railway is to send an agent to New Zealand to make arrangements for an Australian line of steamers.

Much complaint is made of the way in which Robert Roberts of the land office of Sacramento does business, and an effort is being made to secure his removal.

The British steam schooner Eliza Edwards, seized at San Diego on suspicion of being a smuggler, has been released by the authorities, no actual proof being obtained of the vessel.

Rev. C. O. Brown of the First Congregational Church at Tacoma, has resigned to accept the pastorate of the First Congregational Church at San Francisco.

The Kimball Olive Oil Mills at National City, San Diego county, Cal., are to enlarge their works. The demand for oil is ten times in excess of the output.

A Union Pacific train collided with a runaway coal car near Beaver Canyon, Idaho, the other day. The fireman, Jack Moore, was killed, and the engineer, George Oram, badly hurt.

The total amount of peculations of Collins and Dare of the defunct California National Bank at San Diego is placed at \$1,200,000. Collins, it will be remembered, committed suicide, and Dare made his escape to Italy.

The old Tinciacora mine, south of Phoenix, A. T., has been discovered after a search of years, and much excitement prevails over it. The shaft was filled with debris just as the Mission priest's left it when they were killed by the Indians.

The bringing of suits to quiet titles to land at Nogales, A. T., has created much indignation, and the claimants were hanged in effigy by the people. The settlers in the San Rafael and Calabasas land grants are also served with notices of contest.

Yda Addis Storke who recently sued for a divorce from C. A. Storke of Santa Barbara, Cal., was unable to obtain it, has petitioned the Board of Supervisors of the county for a literary woman of considerable note, and at one time was comfortably well off. Her health is feeble and she is now unable to support herself.

After years of litigation over the estate of Joel R. Carter, alias Cramer, letters of administration have been granted to S. B. Smith at Sacramento. Carter was a wealthy farmer whose pecuniary matrimonial ventures led him into many serious entanglements. At the time of his death he had three wives, all of whom protested against the distribution of his estate. His children will divide the money.

The Union Pacific has assured the lumber dealers of Portland that it will restore the old 40-cent rate to Denver and common points. This is the result of a meeting between President Clarke and a committee of the Portland Transportation Bureau during the recent visit of Mr. Clarke to that city. The matter will have to go to the Western Traffic Association, but the lumbermen are confident it will act favorably. The new rate will apply only to lumber shipped from Portland.

The case of the United States vs. J. W. Conner, G. W. Mead and S. C. Mekam, indicted by the grand jury for conspiring to defraud the government out of its title to certain lands in the Roseburg district, was tried in the United States Circuit Court at Portland the other day. When the taking of the testimony was concluded United States Attorney Mays stated that in his judgment the evidence was not sufficient to warrant the jury to bring in a verdict of guilty. Judge Deady then instructed the jurors to bring in a verdict of acquittal, which they did.

A statement was recently published showing that the average length of haul per ton on the Great Northern road had risen from 214 miles in 1889 and 232 miles in 1890 to 270 miles in 1891. It is stated to be even greater thus far this year. The average for 1891 is only sixteen miles less than that of the Northern Pacific for the same year, while the mileage operated by both is practically the same, and the Northern Pacific had all its transcontinental business included. The conclusion reached was that the Great Northern had increased its average haul by largely increasing the amount of traffic carried to the end of its operated mileage in Montana.

Captain Carlson of the steamer Chilicat, just arrived at Tacoma from Alaska, gives the first authentic report of the bloody fight between the Chilicat Indians and the whites on Chilicat Bay. The fight was not between the cannibals and Indians, although the cannibals were stabbed and beaten nearly to death. The white fishermen had trouble with the Chilicat over the setting of a fish trap. July 4 the Indians got drunk, and revived the feud by beating and stabbing the whites. The whites then shot and killed a wealthy Chilicat, and later the Indians rallied and in order to kill a white man for the Indian killed shot an unknown and unaccounted man just in from Juneau. A double charge of shattering struck him in the left side, shattering his watch and carrying away the entire fleshy part of his side between the hip and ribs. Carlson brought the dead and wounded to Juneau. An investigation has been ordered.

EDUCATIONAL NOTES.

Effect of the Free Education Act Upon the Schools of England and Wales Gratifying.

Phillips Andover Academy has just held its 114th commencement.

The State Agricultural College of Massachusetts graduated last week a class of twenty-two.

The public school is not universal in the old world. There are 10,000 parishes in England with only church schools.

Hereafter in Boston new schoolhouses will be named after illustrious citizens who have been gathered to their fathers.

One of the chief features of the commencement exercises at Amherst College this year was the class oration, which was delivered by William N. Lewis, a young colored man of Portmouth, Va., on "The Amherst Idea."

The new Catholic Ecclesiastical Seminary, which is in process of construction on Valentine Hill near Yonkers, N. Y., is progressing rapidly. The total subscription to the building fund has already reached the sum of \$140,000.

Harvard University is spreading her net over a very wide extent of territory this year. It is announced that examinations for admission to that institution are to be held simultaneously in no less than twenty-five places, including England, Germany and Japan.

The saleswomen of Jordan, Marsh & Co. of Boston have had a gymnastic opened for them by their employers at the top of the store, and there, instructed by two women teachers, each of the 1,500 employees of the establishment has the chance of exercise and physical training twice a week.

The effect of the free-education act upon the schools of England and Wales has been unexpectedly gratifying. Out of a total of 19,000 schools affected by the act it is estimated that between 15,000 and 16,000 are now absolutely free, and the attendance has largely increased, especially among younger children.

The World's W. C. T. U. has chosen Miss Mary Allen West, for years editor of the *Union Signal*, superintendent of the World's W. C. T. U. school of methods, and will send her by special commission to the Sandwich Islands and Japan to teach and train workers by means of the schools that she will hold for a few days at a time in a place.

Prof. Skeel, who maintains the orthodox belief that the study of Latin and Greek is serviceable for improving a student's style in English composition, thinks also that there is something to be said on the other side. Whatever the study of Latin and Greek might do toward improving the student's style, the study of languages and English literature would do more.

CONGRESSIONAL MATTERS.

Bill Granting Right of Way Across the Umatilla Indian Reservation for an Irrigating Ditch.

Russia has notified the United States of her acceptance of an invitation to participate in the international monetary conference. With Russia's acceptance all the countries of which were invited have sent formal acceptances. The matter will now be laid before Congress.

Secretary Foster of the State Department said the other day that the action of the Canadian Council in allowing rebates on tolls on grain shipped from American ports on Lake Ontario passing through the St. Lawrence canal and exported from Montreal has no particular bearing on the controversy between the United States and Canada on the subject of discriminating canal tolls. He added that it could hardly be regarded very much of a concession.

Senator Mitchell's bill granting right of way across the Umatilla Indian reservation for the Dumont Irrigation and Improvement Company was reported to the Senate, and at his request was taken up and passed immediately. The bill preserves full Indian rights, and compels the irrigation company to furnish the Indians with water for irrigation purposes from the ditch which they propose to build. It also grants the company such reservoir sites as may be necessary on the lands owned by the Indians.

Judge Randall of the Department of Justice, who was specially detailed to investigate the charges made by Assistant Secretary Nettleton against W. D. Owen, Commissioner of Immigration, of incompetency, insubordination and general unfitness, has submitted his report to the Secretary of the Treasury.

While the report confirms several of the specifications on which the charges were based, it acquits Owen of all the serious charges. The report will not be made public until after copies have been furnished Nettleton and Owen.

The present situation of the free-coinage bill indicates that it is probably defeated so far as this session of Congress is concerned. If it is amended and goes back to the Senate, it will be talked to death, and the probability is that it cannot now be passed unless it is amended.

Some of the anti-silver men think it will be passed anyway, but they think the closure rule will be necessary on account of the fact that the Republicans of the committee prepared and submitted a minority report gives the silver men hope of having their support all the way through, and the management of the anti-free silver fight has practically been turned over to the Republican leaders.

By treaty with Samoa the United States acquired the right to establish a station for coal and other naval supplies for her naval and commercial marine, and Attorney General Miller has given an opinion that the right conveyed by the treaty undoubtedly includes the right to make the provision relating to a coaling station operative by the purchase or transfer of land from native or other Samoan owners to this government.

Legal steps toward the purchase have been taken, and the establishment of the first regularly and fully acquired coaling station on foreign soil is assured. As there is ample appropriation, it is reasonable to suppose that within a year the United States will possess a creditable coaling station on the Pacific Coast, fully and honorably acquired.

The United States marine hospital service at San Francisco will be directed by the Secretary of the Treasury to carefully inspect all vessels arriving at San Francisco from Victoria, B. C., and vessels from Northern ports having on board passengers or merchandise from Victoria into San Francisco. The Secretary of the Treasury has received a telegram from Assistant Surgeon Magruder at Port Townsend, stating that smallpox is epidemic at Victoria, and that many cases are now under treatment. Owing to the close proximity of Tacoma, Seattle and Port Townsend to Victoria and the continual traffic between these places, the Treasury Department is alarmed for fear the disease may spread, and stringent measures are to be at once adopted to prevent it.

BEYOND THE ROCKIES

Grain Acreage Throughout the Southern States.

Mexico has appropriated \$600,000 for her display at the Columbian Exhibition.

The Louisiana Legislature has appropriated \$38,000 for a State exhibit at the World's Fair.

Over 11,000,000 persons have up to date petitioned that the gates of the World's Fair be closed on Sunday.

A plan to utilize all the schoolhouses in Chicago as dormitories for teachers visiting the World's Fair is being agitated.

Ten or twelve Esquimaux families are to be brought to the World's Fair. They are getting ready a schooner at Halifax to go after them.

A solid gold brick, weighing 500 pounds and worth \$150,000, will be exhibited in the mines and mining building at Chicago by a Helena (Mont.) mine owner.

Director-General Davis has received a petition from the trustees and elders of forty-six German Evangelical Protestant Churches of the Middle States, representing a membership of 63,000, strongly urging the opening of the exposition on Sunday.

The Kentucky building at the World's Fair will be a typical representation of a Southern colonial mansion, one of the distinctive features of which is great pillared porches or verandas. Extensive of these porches the building will measure about 75x90 feet.

The Michigan World's Fair Board has engaged agents to attend all county and other fairs in the State the coming fall to secure the first-premium exhibits of farm products that may be drawn upon for the State's exhibit at the World's Fair. Premiums are offered for the best collections of grains and grasses.

One of the novel exhibits in the marine section of the transportation department at the World's Fair will be 200 pen engravings of American steam vessels, beginning with the Clermont and following down a typical series of the present day. The pictures will be sent by the New York Seaboard, a marine paper.

The Washington World's Fair Commission has arranged to make a very complete fish exhibit. It will include all kinds of deep-sea and inland species of fish, oysters, clams, crabs, lobsters and other crustaceans, turtles, frogs, snakes and other reptiles; specimens of aquatic mammals, such as sea otter, seals, fishers, beavers, muskrats, etc.; fish-eating birds and their nests and eggs; and fishing boats and apparatus.

The jelly palace, which the women of California will bring to the World's Fair exhibit, will be 16x20 feet and 25 feet high, with two open doors approached by marble steps. The framework will be of wire. On this will be placed several thousand jelly glasses, cups, globes, prisms, etc., filled with jelly of many shades of color, arranged in artistic and beautiful designs. The interior will be brilliantly illuminated by electricity. The cost of the framework and glasses alone is estimated at \$2,700.

The Secretary of the Treasury has awarded the contract for the construction of the United States life-saving station authorized to be erected upon the shores of the World's Columbian Exposition at Chicago for \$7,878. The station will be a part of the government's exhibit at the fair. It will be one of the most complete of its kind ever erected, and will serve to illustrate in the best manner the organization and methods of the life-saving service. It will take the place of the present Chicago life-saving station, the crew of which will be moved to the new station.

The jolly palace, which the women of California will bring to the World's Fair exhibit, will be 16x20 feet and 25 feet high, with two open doors approached by marble steps. The framework will be of wire. On this will be placed several thousand jelly glasses, cups, globes, prisms, etc., filled with jelly of many shades of color, arranged in artistic and beautiful designs. The station will be a part of the government's exhibit at the fair. It will be one of the most complete of its kind ever erected, and will serve to illustrate in the best manner the organization and methods of the life-saving service. It will take the place of the present Chicago life-saving station, the crew of which will be moved to the new station.

The jolly palace, which the women of California will bring to the World's Fair exhibit, will be 16x20 feet and 25 feet high, with two open doors approached by marble steps. The framework will be of wire. On this will be placed several thousand jelly glasses, cups, globes, prisms, etc., filled with jelly of many shades of color, arranged in artistic and beautiful designs. The interior will be brilliantly illuminated by electricity. The cost of the framework and glasses alone is estimated at \$2,700.

The Secretary of the Treasury has awarded the contract for the construction of the United States life-saving station authorized to be erected upon the shores of the World's Columbian Exposition at Chicago for \$7,878. The station will be a part of the government's exhibit at the fair. It will be one of the most complete of its kind ever erected, and will serve to illustrate in the best manner the organization and methods of the life-saving service.
