# Office of the Spokane Board of Health

### SPOKANE, Washington, May 13, 1892.

The evidence is conclusive as to the absolute purity and healthful character of the RoyaL BAK-ING POWDER.

Certainly there is no baking powder known to us equal to the Royal for strength and uniformity. We confidently recommend it for these qualities, as well as for its purity and wholesomeness.

WALTER Q. WEBB, M. D., Board President. C. G. BROWN, M. D. Health. G. T. DOOLITTLE, M. D.,

### Medical Nomenclature. Judge, jury, lawyers and spectators

were treated to an exhibition of professional priggishness in division No. 2 of the circuit court the other afternoon that was decidedly refreshing. The case of H. G. Bouham against the Kansas deal of it is gathered in the shape of nod-City Railway company was on trial be-City Railway company was on trial be-fore Judge Slover. The case is one for specimen of amber in Europe is a cup \$30,000 damages for injuries sustained in an accident, and considerable medical testimony had to be taken.

A young doctor was put on the stand who was determined to display his learning, and he was successful. When he amber was made into knives and forks started off he did so with the easy gait with one prong, which were used by princes of one who feels he has the nomenclature and caurch dignitaries, it was more of his profession at his tongue's end, for valuable than gold. Now it is worth every sentence he uttered was so mixed with technical terms that an ordinary

person could scarcely understand him. When he took the witness stand he glanced patronizingly at the jury and the rest in the court room, and in answer to the first question rattled off a lot of

medical terms that drew the attention of every one in the room. Judge Slover looked at him a moment and then said: "Use plain English, doctor; I know

you can if you try." The witness looked around and said, 'Yes, sir; certainly, sir."

"Now, doctor, where did you say Mr. Bouham was injured?"

"On the posterior portion"-"Speak plainly, doctor," admonished the court.

frozen by cold so intense that nothing can melt it again. Roman ladies of that time "Well, he suffered a severe contusion were accustomed to carry such spheres as of the posterior of the abdomen" (turnthis one in their hands during hot weather ing to the jury with a familiar wave of

Grim silence. "Baby tum in-peeze, papa." He shall not come in.

"My papa."

I write on "Papa," says the little voice; "I lub my papa. Peeze let baby in!"

I am not quite a brute and I throw open the door. In he comes with outstretched little arms, with shining eyes, with laugh ing face. I catch him up into my arma, and his warm, soft little arms go around my neck, the not very clean little check is laid close to mine, the baby voice say sweetly: "I lub my papa."

Does he pay?

Well, I guess he doest He has cost me many anxious days and nights. He has

#### A MOST GRAPHIC STORY.

LIFE.

Experience Both Abroad and in America.

(Boston Hernid.) The unwritten romances of life are

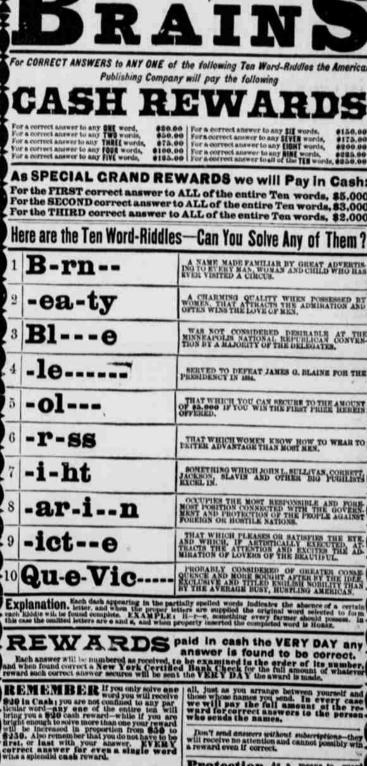

more wonderful and far more interesting than the most vivid works of fiction. The one we are about to relate occurred in real life, and is both interesting and structive.

Mrs. Jennie Rav formerly livel in Manchester, N. H. Her home was pleasant, her surroundings comfortable. In the year 1880 she visited England, and while in that country began to ex-perience strange sensations. At first she attributed them to the change of climate, but they continued and increased, until finally, like many another woman, she became utterly discouraged. It was while in this condition that Mrs.

Ray returned to America and her home. Thousands of women who read this stor can appreciate the condition in which Mrs. Ray then was, and sympathize with her suffering. Two prominent physicians were called and endeavored to do all in their power for her relief. In spite, however, of their skill Mrs. Ray grew weaker and more depressed, while the agony she endured seemed to increase. It was at this time that a noted physi-cian who was called declared Mrs. Ray was suffering from cancer, said there was no help, and told her friends she could not live more than a week at the farthest. And here comes the interesting part of the story, which we will endeavor to tell

in Mrs. Ray's own words. She said: "Unknown to all these physicians, I had been using a preparation of which I had heard much. I did not tell the physicians because I feared they would ridicule me, and perhaps order its discontinuance. During all the while that the physicians were attending me the preparation was steadily and faithfully doing its own work in its own way, and I had faith in its power. At last the doctor said there was no use of his coming, for he could do me no good. I had suffered so much that I was quite willing to die, but it seems I was nearer re-lief than I knew. One week from the day the doctor last called a false growth, as large as a coffee cup, and which looked as though it had been very large, left me. I sent for a doctor, and he declared it was a fibroid tumor, but said he had never known one to come away tatingly declare that my rescue from death was due solely to the marvellous effects of Warner's Safe Cure, which vans the remedy I took unknown to the physicians, and which certainly rescaed me from the grave. It is my firm belief that many ladies who are said to die of cancer of the womb are cases like mine, and if they could be induced to use War-ner's Safe Cure they, like me, might be

saved. The above graphic account is perfectly true in every respect. Mrs. Jennie Ray is now living at 142 West 6th street, South Boston, Mass., and if any jady doubts the above statement she can address Mrs. Ray, who will gladly answer all questions or grant an interview of a confidential nature to any lady who may choose to call upon her. It is said that "truth is stranger than fiction," and when the thousands of suffering, help-less women who are upon the road which physicians say leads only to death, consider the story as above given there is reason for hope and joy, even sithough they may be now in the depths of de-spondency and misery. To such ladies the above truthful account is willingly given.

Porpoise Shooting. Porpoise shooting is the newest sport at Cape May. The seaward end of the pier is the favorite rendezvous for those who want to get a shot at the swiftly moving fish. The marksman must have a steady hand and always be in readiness to shoot, because the movements of the porpoise are so uncertain that one does not have time to raise the gun to

the shoulder before they are out of sight beneath the water. The women take as much interest in the sport as the men, and quite a number are out every afternoon perched on the lower deck of the Helen Streeter, is not a count at all, but pier, rifle in hand, and waiting for a good an American." chance to shoot. The sport seems to lie more in the attempt to capture big game come out all right."- Harper's Bazar.

than in successful results, as it is quite rare for one of the fish to be killed and washed up on the shore.-Exchange.

No Peaches This Year. A letter from Dover, Del., to The Bal-

timore American says: "A drive through what ought to be the center of the peach belt-lower Kent and upper Susser counties-will convince any one that the much abused peach liar of this peninsula will have no chance this season, for the reason that there are no peaches to lie about." There are miles and miles of thrifty looking peach orchards wholly

destitute of fruit. The buds were killed destitute of fruit. Filmer & Rey, & F., Cal & Portland, Or. by cold, sleety rains in the spring.

give promise of undreamed of richness Coal is found on both sides of the boundary line, from the coast back to a distance of twenty-five or forty miles, and comprised in an area of 20,000 acres or more, and the country is so easy of access by a railway line built parallel with the boundary line that there is but one way in which the coal will be brought out, and that is through Blnine.

It is only necessary to be in this coal district with one's eyes open to see it, and competent judges affirm that it is coal of the finest quality. Nor is coal the only mineral to be found. Vast deposits of iron ore abound; in fact, there is a mountain some few miles back which is nothing but fron ore, and oil is so much in evidence that a stick plunged into the marshy land can be immediately lighted by the applica tion of a match.-Blaine (Wash.) Journal

#### A Graveyard Curlosity.

In New London, Conn., there is a lot in the city cemetery containing five graves, those of a man and his four wives. The women's graves form four sides of a square, the man reposing in the center, while the inscriptions are as follows:
