Chances of Life and Death.

The following table is one that is used

by the London assurance companies, show

ng the prospect of life at various ages. It

is the result of several years of careful cal-culation, and is said to seldom prove mis-leading or incorrect. Of course sudden

and premature deaths, as well as lives un-

usually extended, occasionally occur, but

this is a table of average expectancy of life

of the ordinary man or woman: A person I year old may expect to live 39 years longer,

of 10 years, 51; of 20 years, 41; of 30 years, 34 longer; of 40 years, 28; of 50 years, 21; of 60

years, 14 more, of 70 years, 9, of 80 years,

4. Readers can easily gather from the above statement facts which will tell them,

approximately at least, how many years longer they may reas, tably expect to live according to the law of averages. -St. Louis

MUSICAL ACCENT ILLUSTRATED. A Witness Explains the Term to the Satis-

faction of the Court. At a trial in the court of king's bench as to an alleged piracy of the "Old English Gentleman, one of the first witnesses put into the box was Cooke. "Now, sir," said Sir James Scarlett in his cross-examination of Cooke, "you say

that, sir?" "What I said," replied Cooke, "was that the notes in the two arrangements are the same but with a different accent -the one being in common while the other is in triple time; consequently the

that the two melodies are identical, but

different. What am I to understand by

position of the accented notes is different in the two copies."

"What is a musical accent?" Sir James flippantly inquired.

'My terms for teaching music are a guinea a lesson," said Cooke, much to the merriment of the court.

"I do not want to know your terms for teaching," said the counsel, "I want you to explain to his lordship and the jury what is musical accent." Sir James waxed wroth. "Can you see it?" he continued.

"No," was the answer.

"Can you feel it?" "Well," Cooke drawled out, "a musician can." After an appeal to the judge the examining counsel again put the question. "Will you explain to his lordship and the jury-who are supposed to know nothing about music-the meaning of what you call accent!"

"Musical accent," rejoined Cooke, "is emphasis laid on a certain note just in After the John Brown identified by his ddress on the card had been selected, the on any word when speaking in order to make yourself better understood. I will a few minutes until eleven men had been secured. Then the clerk pulled out one give you an illustration, Sir James. If I were to say 'you are a donkey,' the acmore slip to complete the jury.
"Jacob Levy," the clerk called.
It seemed as if every man in the courtcent rests on donkey; but if instead I said 'you are a donkey,' it rests on you,
Sir James, and I have no doubt that the remedy, doctor?" I asked. clerk counted them and there was just an even dozen Jacob Levy's who had been gentlemen of the jury will corroborate me in this." The story is more personal than polite — nevertheless, it is well worth telling as an instance of forcible in the box, his honor remarking that all illustration. It is useful, too, since it may the labor of securing the jury one at a time might have been avoided if the clerk had only chanced to pick out Mr. Levy's themselves on being musical some faint notion of what accent in music really is. It is the outcome of that wonderful invention, the division of music into bars, The baby came from down south and has but for which music might still be only only been in town a few weeks, but she has made the most of her time. Tinted Paper.

Mrs. East, the wife of an English pa per maker, happens to drop a bluing bag nothing about the accident; her husband benefit of suffering humanity. storms when he finds that the paper has a peculiar tinge, but the astonished workman can throw no light upon the matter. Thereupon he sends the paper to London with instructions that it be closed out at any price. The public, however, accept it as a purposed novelty. It becomes the rage; orders pour in for more of the same sort. The wife confesses, the husband forgives her-and well he may, for his fortune is made. This is the very simple origin of tinted paper.-Illustrated American.

For Lettering on Glass. In order to fasten glass letters, figures, etc., on glass (show windows) so that even when submerged in water for several days, they will not become detached, use an india rubber cement. The best for this purpose consists of one part india rubber, three parts mastic and fifty parts chloroform. Let stand for several days at a low temperature to dissolve the cement. It must be applied very rapidly, as it becomes thick very soon. When spread with a camel's hair brush over a crack in glass or porcelain vessels this cement effectually closes it, and the vessels may be made serviceable for holding water, though, of course, they will not bear the application of heat.-New York to another the article required has only to be placed on a little car, a button pressed. Telegram.

Treatment of Stutterers. It is said that stammerers rarely if ever show any impediment to speech when speaking in whispers. On this fact a new method of treatment has been advocated by Dr. Coen, which is as follows: In the first ten days speaking is prohibited. This will allow rest to the voice, and constitutes the preliminary stage of treatment. During the next ten days speaking is permissible in the whispering voice, and in the course of the next fifteen days the ordinary conversational tone may be gradually employed. -New York Telegram.

"EVERY WORD TRUE."

SO SAYS THE WRITER OF THAT

He Reiterates His Statements, Produces Additional Proof and Clearly Defines His Position.

[N. Y. Sun.] ..

It would be difficult to measure the interest and comment, not to say excitement, which the published letter of Dr. R. A. Gunn, which appeared in the papers vesterday, has occasioned. The prominence of the doctor and the unusual nature of the letter have both tended to add interest to the subject and make it really the talk of the town.

I called upon Dr. Gunn at his residence, No. 124 West Forty-seventh street yesterday afternoon. I found the reception room crowded, and it was only after an hour's waiting that I succeeded in obtaining an interview.

Dr. Gunn is a distinguished looking man, and impressed me at once by his manly bearing and air of sincerity. I took the seat he courteously offered me

"Are you aware, doctor, of the commo-

tion your letter has caused?" Dr. Gunn smiled, and replied: "Things out of the ordinary usually cause com ment. It is not a common thing for physicians to indorse and cordially recmmend medicines other than those the Materia Medica. History is full of instances of scientists who have indorsed discoveries they believe to be valuable and have been denounced for so doing, and yet these same discoveries are bless-ing the world to-day. I hope I have the manhood and courage to be true to my convictions, and that is why I so openly and unhesitatingly indorse Warner's the same manner as you would lay stress | Safe Cure as being the greatest of modern discoveries for the cure of diseases which have baffled the highest skill of the medical profession."

I was impressed with the earnestness of the doctor, and saw that he meant

every word that he said.

"Nearly ten years," he replied. attention was originally called to the Safe Cure by a serious case of Bright's disease, which was considered hopeless, and yet, much to my surprise, under it use the patient recovered. I have tries serve to impress upon the minds of that it in other cases since then constantly very large circle of people who plume and my original faith in its power has been confirmed. I have seen patients recover from inflammation of the bladder, gravel and Bright's disease when al other treatment had failed, and I have found it especially efficient in all female

troubles. "Can you specify any particular cases, doctor?" I asked. "That is a delicate thing to do," the doctor replied; "but, as I always keep a

written record of my cases, I can accommodate you.'

Thereupon the doctor opened his desk and produced his record book. Turning over the leaves he said:
"Here is a case of a gentleman who

was a great sufferer from inflammation of the bladder of long standing. He had consulted a number of physicians without benefit. When first consulted I myself having no fear of them, although he tried the usual methods of treatment, but without success, and I finally advised him to try Warner's Sale Cure. He felt better from the start, and in a few weeks was entirely cured." The doctor turned a few pages further,

and then said :

"Here is another case. It is that of a gentleman who had frequent attacks of renal calculi, which, as you know, is gravel forming in the kidneys. He had never been able to prevent these formations, but after an unusually severe attack I recommended him to try the Safe Cure, which he did, and, although it is three years since he took the remedy, he

has never had an attack since.' "Here is a most remarkable case.

is that of a lady who had suffered for some time from Bright's disease. She became enceinte, and about the fourth month suddenly became blind, had convulsions and finally fell into a state of coma, caused by uremic or kidney poison. Several physicians who saw her said she could not live, and in this view I fully concurred. As she could still swallow said, as a last resort, that they might sort of a cigar he wants and ought to so at the start. An imported cigar, at and to the surprise of every one she rethe average cigar stand, at the common covered. She has since given birth to a covered. She has since given birth to a covered. living child, and is perfectly well."

some deception. He has put a different if you would give me their names. I cigar in the box than the one called for think the importance of the subject

would fully justify it."
"In the interest of other sufferers I think you are correct." Dr. Gunn finally observed, after a moment's thought.
"Both the lady and her husband are so rejoiced, so greatful, over her recovery that I know she is only too glad to have others hear it. The lady is Mrs. Eaves, man doesn't know you you get the worst wife of the well known costumer. She was not only restored, but is in perfect to the well known costumer. health to-day.

I thanked the doctor for his courteous reception, for the valuable information imparted, and I feel assured that his per maker, happens to drop a bluing bag which she holds in her hands into a vat him from feeling other than glad at seeof pulp. She is frightened and says ing this interview published for the

The Lottery Obeys the Law. In view of the contradictory rumors circulated regarding the intentions of the Louisiana State Lottery Company and in order to accurately answer num erous inquiries, a representative of the Times Democrat yesterday interviewed Mr. Paul Conrad, the president of the company, with the result expressed be

Reporter-Mr. Conrad, it was asserted some weeks ago in the Northern news-papers, and the statement has since been revived recently, that the company is about to remove to Nicaragua, and there, under a government franchise, open up the business on a grander scale than ever.

President Conrad-I have heard something of this, but there is no foundation for it. The company has officially stated that it bows to the decision of the Supreme Court and will respect the laws. Reporter-Then you have no plans of future action?

President Conrad-I cannot state the case more strongly than was done at the time the company decided not to attempt to obtain a renewal of its charter. I can only repeat that the company will con-tinue in business until the expiration of its present charter and then cease to exist. I cannot understand, after all that has been said, why there should be any confusion in the public mind about

the matter. Reporter-Have you any objection to my stating this as a finalty for the satis- ward, but at the moment it seemed to do faction of the public?

President Conrad—None whatever.

Reporter-Some of the Eastern papers Mr. Conrad, persistently assert that the intery company continues to use the United States mails in the prosecution of its business: will you kindly tell me

f that is true? President Conrad-It is utterly untrue, We are obeying the law in its letter and spirit, and our sgents everywhere are instructed to obey it. We are using the express companies only in our business, and in all our circulars are printed in-structions to all persons dealing with us to avoid the mails.—Times Democrat, New Orleans, I.a., June 1.

RUSH AT SPECIAL SALES.

The Way New York Merchants Draw

Special sales" are a feature of New York commercial life in the retail line, and they contribute more to woman's pleasure and caprice than any other one phase of shopping experience. Those who have never been to one have missed a heap of fun. In one of the large uptown stores recently there was a "run" on gloves. They were of a superior quality, and sold for forty-five cents.

The sale started at 9 in the morning. and directly there was a spirited scene around that counter. Women rudely pushed one another away in their wild endeavor to get a pair of gloves. One gave a \$5 bill and clamored for her change. Another held a pair over the heads of the crowd and endeavored to give her money to one of the salesgirls. This woman, after patiently waiting for a time and seeing no chance of getting up to the girl, quietly put the gloves in her muff and sauntered off. She had a bargain.

After a while the change from \$5 was brought back. The salesgirl had by this time become rattled with the confusion and rapidity with which the gloves were being bought, and handed the money to the wrong woman, who put it in her purse and walked away. The lady to whom the money belonged, getting uneasy at the long delay, finally elbowed her way through the crowd, demanding her change, and creating no little excitement. The rush was so great that the girls behind the counter grew frantic, and began to cry. The floorwalker ordered the sale closed for reopening. Then a scene of wild confusion was dispelled, and the glove purchasers dispersed themselves over the store and were soon busied with other purchases

Three hours later the glove sale began again, only to find even a greater crowd clamoring for covering for their hands than in the morning. It continued only thirty minutes when it was again stopped because the clerks could not wait on the anxious customers. It was never reopened, but the establishment, all the same, got a first class advertisement out of the attempt to sell dollar and a half gloves for forty-five cents.-New York

Locked Antiers.

"Locked horns are becoming quite a fad with some of the swells at the metropolis," said a gentleman the other day, and some of the Adirondack hunters and guides are making nice little sums by occasional sales of the curiosity that is demanded. You see, the old story about the bucks that fall to fighting, and in some manner get their horns locked so they can't get apart and then starve to death, has taken a strong hold upon the romantic natures of many people and if they can only get a set of locked horns mounted they are happy.
"So the hunters select nice horns that

correspond as to size, and by the use of a twisted cord and case spring them together as if locked in their death embrace by the maddened thrusts of fighting bucks. Then, on account of their great rarity and the difficuly of finding them, they are sold to the rich curiosity hunter for a big price. His friends look in wonder and envy at them, while he recounts the story told him by the guide who found their skeletons held together by the horns and the earth all trodden down around the place so solidly that vegetation had not grown there in years, etc., and the guide goes back to the woods and fixes up another pair for the next curiosity seeker."-Utica Observer.

The swan is the longest lived bird, and it is asserted that it has reached the age of 100 years. Knauer, in his work entitled "Naturhistoriker," states that he has seen a falcon that was 163 years old. The following examples are cited as to the longevity of the eagle and vulture: A sea eagle captured in 1715, and already several years of age, died 104 years afterwards, in 1819; a white headed vulture, captured in 1706, died in 1826 in one of the aviaries of Schoenbrunn Castle, near Vienna, where it had passed 118 years in captivity. Paroquets and ravens reach an age of over 100 years. The life of sea and marsh birds sometimes equals that of several human generations. Like many other birds, magpies live to be very old in a state of freedom, but do not reach over 20 or 25 years in captivity. The nightingale lives but 10 years in captivity, and the blackbird 15. Canary birds reach an age of from 12 to 15 years in the cage, but those flying at liberty in their native islands reach a much more advanced age. - Detroit Free Press,

Who Patronize Savings Banks. Mechanics and storekeepers have the largest savings bank accounts. Naturally we do not have many professional men as customers, but among the comparatively few that patronize saving banks doctors seem to lay up the most money. Lawyers generally keep their money in national banks, as the nature of their profession requires them to have their funds where they can draw checks upon them. Many professional men, though, keep money in a savings bank as a side investment, upon which they can draw for a rainy day. Some classes of men, from the nature of their employment, are unable to accumulate much money. Painters, for instance, and actors, usually live through the summer upon their winter's earnings. - Interview in Brooklyn Eagle.

Hardly Courteous During the epidemic of influenza in one of our cities a gentleman who was suffering acutely from it went down town one morning, and on the way me at least a dozen sympathetic friends At the twelfth encounter his patience was exhausted.

"Have you the prevalent cold?" in quired his twelfth assailant, a burly good natured man. 'Yes," said the invalid, captiously; "1 have. Have you the prevalent sympa

The retort was hardly courteous, and the man himself felt ashamed of it after him good. - Youth's Companion.

Eat More Fruit.

Meat three times a day is more than average down town dwelling human nature can endure. Functional disturbances of the liver, gall stones, renal calculi, diseases of the kidneys, dyspepsia headache, fits of ill temper or of the blues, irritability and general absence of the joy of life are largely due to an excess of meat and other highly concen trated food. What shall we eat? We reply, eat more food. - Medical Classics.

RIGHT OR WRONG.

Which will ye have? It does seem as if some folks prefer to have the last condition of the liver rather than the first. They perpetually does themselves with purgatives totally without vartue as alterative of liver trouble. Hostetter stomach it ters is the successfur candidate for the people's choice, and yet, contain and welknown as it is, there are unfortunate swing keep on tring the drestic remedies of former dast it is to the intelligent portion of the poble that the well-known and long-trid properties of the Bitters appeals. Reason should be guided by experience in the matter of medication. The best guide to our feet is the lamp of experience, saiva great patriot of the early revolution-typeriod, and the exclemation is pregnant with touth. For over a taird if a century the Bitters daily has met with the indorsement of people auffering from liver complaint, malaria, c nstipation, flowmatican, defillity and troubles accompanied by dyspepsis. Laterly it has declared itself and been thoroughly approved as a remedy for "la grippe."
