OCCIDENTAL MELANGE

Indians Suspend Hop-Picking to Engage in Gambling.

THE SIUSLAW SALMON RUN LIGHT.

Wardner Union Miners Released-An Attempt to Betray the Salt Lake Chamber of Commerce.

with Chinese pheasants.

Coal has been discovered in the hills one mile east of Klamath Falls, Or. P. S. Smith, a merchant of Lavina,

Mont., has been arrested, identified as a stage robber. Rattlesnakes are unpleasantly numer-

ous in Linn county, Or., in the foothills of the Cascades.

The government commissioners are examining the different sites for a deepwater harbor on the Los Angeles coast. Twenty-nine candidates for the office of Fish Commissioner, to be filled by the next Oregon Legislature, are already

reported. Heavy night fogs in Southern Cali-fornia have retarded truit drying along the coast. The weather has been warm and clear in the interior.

The Lane county, Or., Hop Growers' Association have agreed to pay for picking this year 40 cents for 7-bushel boxes and 50 cents for 9-bushel boxes.

One hundred and thirty-five miners under arrest at Wardner, Idaho, have been released, but the indictments against them have not been dismissed. In a canvass of Washington on the

question of selecting a State flower, the rhododendon was largely the favorite, receiving 7,704 votes out of a total of

It is estimated that the apple crop of the Pajaro Valley will reach 250,000 old, is one of the most popular woman writers in England. She writes regularly, except on Sundays, from 9 in the morning till 1 o'clock, and again from At Flagstaff, A. T., Jailer Henry Banta

was seized by the prisoners in the county jail, bound and gagged, and all but two of the men escaped. The six now free, it is thought, will soon be recaptured. Fishing on the Siuslaw is now in

progress. Two canneries, those of Myer & Kyle and C. Timmons, are running. The salmon run, as yet, is light. The sum of 25 cents each is paid for large There will be \$340,000 spent on the

Poso irrigation system; \$60,000 on the East-side Canal; \$100,000 on the Seventyeight Canal, and about \$30,000 on lateral canals in Kern county within the next As the result of one week's picking in the Holmes hop field near Salem sixteen acres yielded 21,000 boxes of nine bush-

els each. This will give 2,100 pounds of dried hops. The sum of \$1,000 was required to pay the pickers.

Graham in Tonto Basin, has been held for trial without bail. This has tended somewhat to quiet the feeling against Tewksbury, which is very strong. Several "hold ups" have taken place

at Freeno since the McWhirter assassination, in one of which Harry Doble, a brother of Budd Doble, was relieved of a father. watch and chain, diamond stude and several hundred dollars in money.

The widow of Lawyer McWhirter at Fresno has offered an additional reward of \$10,000 for the arrest and conviction of the murderers of her husband, and her family have added \$5,000 to this amount, making a total of \$25,000 in re-

An attempt to betray the Salt Lake Chamber of Commerce was discovered in time to prevent any serious damage to the interests of the merchants. S. W. Sears, Jr., is accused of negotiating for the sale of damaging evidence of overcharges against railroads in possession of the Chamber.

Oregon big red apples are being appreclated even at home this year, says the Oregonian. They are usually left on the trees unpicked, and in the early fail the orchards are covered with decaying fruit -but not so this year. Apples are scarce and are retailing in many places at \$1 per bushel. They are usually worth about 10 cents at this season of

There is a story current among the railroad and Wells-Fargo officers have learned that the Collis train robbers doubled on their pursuers and made their way south to the railroad again, where they boldly boarded a train and made their way to Los Angeles, where they have been in hiding.

Work on the Snake river improvement has already begun. The principal work of the government boat will be in clearing the channel of rocks dangerous to be done will be a continuation of the work done last season with the same boat. The work on the river between Lewiston and Riparia has already begun, and better and more extensive improvements will be made there.

The main ditch at the Myrtle creek mines has been extended a mile and a quarter to tap more small streams. Washing is not now in progress, but everything is being put in readiness to begin operations as soon as the fall rains egin. Scarcity of water has always in Southern Oregon, but the Myrtle Creek Company is doing a large amount of ditching to provide water to run the giants the year round, if possible.

The project of lowering the water in the upper Klamath Lake, Or., thereby rec'aiming a vast area of agricultural land, seems to have at last taken definite shape, and the lawyers of Klamath Falls ne, and perhaps \$10,000 in attorneys'

Ukiah. Having plenty of money, they rallied near the Court House, and soon squaws the game was stopped and the four Indians arrested. Jim Ball, an Inon thing between the dealer and bet-r, and on this showing the Justice in business for himself, taking daguerreo-types.

FROM WASHINGTON CITY.

Second Phase of the Behring Sea Arbitration-Number of Immigrants for the Month of July.

The Department of State is advised by the United States Charge d'Affaires at Constantinople that the Turkish government has acquiesced in the claim of the United States for protection to American missionsries in the province of Konia, Asia Minor, and in reparation for in-juries to the person and property of Dr.

The Navy Department has assumed charge of the quarantine patrol of New York harbor. It will place an officer from the Brooklyn navy yard in charge of the patrol vessels in the lower bay. The old receiving ship New Hampshire will be curned over to the State authorities for use as a hospital or for the detention of cabin passengers.

Postmaster-General Wanamaker has issued the expected order, deputizing postmasters in free-del very cities, towns and rural communities to put up letter boxes on the request of citizens, for the collection and delivery of mails at house doors. The order, it is said, affects nearly 3,000,000 residences to which free-delivery service is already ex-tended, and it is regarded by post ex-perts as the most important departure in free delivery of mais since the beginning of the system under Postmaster Blair.

The second phase of the Behring Sea arbitration closed the other day with an exchange of cases between the agents of the principals. The preparations of the original case for the United States has largely engaged the attention of Secre tary Foster recently. It embodies the minutes of the historical collection of the acts connected with the Russian ownership of Alaska as far as they bear upon the question of maritime jurisdiction over Behring Sea, the control of the seal fisheries, etc.; also an exhaustive analysis of the correspondence early in the present controversy with Great Brit-The American arbitrators have been supplied with a copy of the British case, and they will be occupied with their reply for several weeks.

The monthly summary issued by the bureau of statistics shows that the total imports of merchandise into the United States in the month of July last smounted to \$71,515,000, as against \$67,022,000 for the corresponding month of last year. The exports of domestic merchandise for the month of July amounted to \$57,-361,000, as against 161,770,000. Imports from countries with which we have recprocity treaties had increased during the month as against the corresponding month of last year as follows: Brazil, \$8,188,000; Cuba, \$89.500; Puerto Rico, \$306,000; British West Indies, \$5,000 Salvador, \$12,000. Our exports of do mestic products to those countries dur-ing last month increased as follows over ast year: Brazil, \$10,000; Cuba, \$739, 000: San Domingo, \$30,000; Salvador, \$21,000; British Guiana, \$34,000. The total number of immigrants admitted into all ports of the United States during July was 49,000, as against 45,000 in

Commissioner of Internal Revenue Mason talked recently concerning the issuance of photographic certificates to Chinese in this country. Mr. Mason's attention was called to the reports in the San Francisco papers to the effect that the Chinese declined to register until they got word of advice from the Chinese Minister. Mr. Mason said he had also seen such reports printed, but his de-partment had not been advised by colgreat deal of trouble and expense. Chinese well know the penalty for their negligence to provide themselves with certificates. All those found without them at the date stipulated will be sent to the flowers kingdom. There can be no doubt about that." "But would you have funds sufficient to deport them by the wholesale?" "We would doubtless find the way," said the commissioner. We c uld send them in our naval ves agis or charter ships especially for the purpose. We can pack them like sardines in a box; they are used to incommodious quarters, anyhow," said the Treasury official.

THE CHICAGO EXPOSITION.

A S berian Fishing Canoe, With All the Appliances for the Industry, Will

Be on Exhibition.

General Miles is talking up a parade of Indians for the World's Fair. It is now said that the War Ministers of Prussia and Bavaria have refused to permit any of the regimental bands visit the Chicago Exhibition.

The Southern Pacific railway subscrip ion of \$21,000 for stock in the World's Columbian Exposition makes a total of nearly \$1,000,000 from the various transportation lines in the United States. There is a possibility that, owing to

the cholera, some of the foreign countries may abandon their arrangements for exhibits at the World's Fair, and General Grosvenor of Ohio suggests the pany. The company wants the city to advisability of postponing the opening for a vear. Isaac P. Monfort, an old gentleman,

who lives in Macomb, Ill., still has the mare Nell that he drove all the way to Philadelphia in 1876, and he proposes driving her in the procession at the dedication ceremonies at the World's Fair in Chicago. He has owned her thirty years, and claims to have driven her in ity. that time about 44,000 miles between shafts.

On reached Port Townsend the other day from a trip to Alaska, was brought a Siberian fishing canoe, with all appliances scribed as being a decided curiosity, being constructed of hides and containing a small orifice into which the fisherman crawls feet first and then ties himself

The ferns that New South Wales ha contributed to the World's Fair have been shipped to Caicago, where they are to be transplanted. They are in the very best of condition, and it is confi dently expected that they will thrive in their American home and become mag-nificent specimens before the world is invited to inspect them next year. There are seventy-nine plants in the collection, and as many of them are veritable trees thirty and thirty-five feet in length and heavily packed, the aggregate weight is about eighty tons.

The value of Washington cedar for are well illustrated by the fact that when shingle purposes is illustrated by a the military captured the ricting miners bundle of them which have been on the roof of John W. Donnelly's house on Sequ'm Prairie, Clallam county, sine 1853. Judge Swan of Port Townsend has notified Secretary Meany of the A merchant of the City of Mexico, to World's Fair Commission that he has secured this contribution to the Tacoma Exposition and the World's Fair. The -hingles are in a good state of preservaoncern's bank bills. The result was a tion. This exhibit will serve as an obrun on the bank, which, however, was ject lesson to illustrate the wonderful promptly met, and many of the with-drawn deposits were returned. | lasting qualities of Washington cedar shingles.

\$1.30 per 100 pounds.

BUTTER—Oregon fancy creamery, 25@

the Young Chickens.

THEY SHOULD BE WELL SIFTED. the Best of All Foods for Newly

Advice to the milker: Keep thyself

Hatched Broods.

clein. The farmer who does not provide a garden for his family ought to go without his dinners.

A practical dairyman cleanses his milk utensils with boiling water, s-leoda, scouring with sait and occasional scraping. He never uses soap. Three hundred pounds of butter per

cow should be the minimum, 400 pounds the aim and 500 and upward the ambi-tion of the progressive dairyman. Pure milk cannot be had from a cow

that drinks impure water. Eighty-seven per cent. of ordinary milk is water. A ow will drink 100 pounds of water in a day. What we want now, wisely remarks an exchange, is pure-bred dairymen. It

is vain to give the best cows to a man who has not learned to make the most of the native kind. A horse affected with chronic founder always goes sore, and is inclined to walk on his beels. The heels of the fore leet usually strike the ground first. The hoofs show signs of contraction by rings or ridges com ng on hoof. Plis ers applied to the coronet do good in such

It is not good sense to conclude that because hens will exist and lay a lew eggs now and then when little or no pains are taken with them t is waste of time and trouble to do more for them. Well taken care of, they will do far more than if let to shift for themselves, yielding, in fact, a handsome profit in return for the attention shown them.

An experienced sheep breeder says that the best ration he has ever known to be led to fattening sheep is composed of equal parts by weight of oats, peas and millet. To fifteen bushels of the mixture was added one bushel of flaxseed, and a I were ground fine together. Each sheep was fed two pounds of this ground mixture with hay, and made a

peculiar gain of three pounds each week. Ground oats, fed dry in troughs, are excellent for young chickens, but they should be well sifted, the chaff and hulls being given to the adult fowls. If slightly moistened with fresh milk or boiling water, chicks are very partial to ground oats, but they must not be so fed is to have any portion of the food remain over after each meal. The rolled oats, which are used for making catmeal porridge, may be fed dry to chicks, and perhapvit is best of all foods for newly hatched broods.

Salting Stock.

The salting of stock is generally prac-

ticed irregularly, done when the farmer happens to think of it or "feels like it." Advanced stock raisers urge that salt be kept where the cattle can obtain it at any time instead of being doled out to ous. At the same time it is difficult to hit upon a method o keeping salt at a times in reach of cattle. Some place it in large iron kettles set in pasture, and allow the animals free access to it. In rainy weather the kettles of course are liable to be filled with water, but the salt water seems to ratisfy the cattle quite as well as dry salt, and it is saldom here is so heavy a rainfall as to waste the salt. Boxes or barrels, so arranged that the water does not penetra'e them and left in sheltered places, are used by some farmers. They should be at least partly covered. Rock salt is not so much used as formerly, many believing that the tongues of the beasts are rendered sore in their efforts to scrape the salt from the hard surface. Coarse salt,

more in the long run. Raising Stock.

bought by the barrel, probably costs no

The loss to the average farmer in raising scrub steers and ill-bred horses is far more than he realizes. It is not likely that the time will ever come when it will pay to raise common scrub steers and ordinary horses any better than it does now, and it is hard to see where there is profit in the business for the ordinary farmer now. There is an enormous waste of food in raising an ordinary steer to a marketable size. He has to be kept a year longer than he would if he was a good grade, and he won't weigh any more and will not bring as much per pound. A common horsethat is one that is neither a trotting horse, a carriage horse or a draft horseis hard enough to sell now, and the probabilities are that the demand will decrease. The ordinary farmer, who only raises a few horses in an incidental way, will find it safest to work in the direction of either carriage or draft horses. The demand for these is not likely to fall off, and a good team of either car-

riage or draft horses always bring payng prices. Keeping Butter Fresh. The best method for keeping butter

or any length of time is to store it in barrels under brine in the granulated form. Now, clean whisky or rels should be used, filled to within eighteen inches of the top with brine strong enough to float an egg, and the butter then put in and covered so as to keep it at least four inches beneath the surface of the brine. Butter packed in this way has kept perfectly sweet for eighteen months or more. Under our present conditions of manufacturing and marketing it of course rarely occurs that there is any need of keeping butter for such a long time, but in putting up butter for export, especially to countries south of us, this or a similar plan might be adopted for keeping it in good condition. We have a good chance now for building up a trade with our southern neighbors, and it would pay to take some extra pains to procure it by getting our butter to them in better shape than any other they receive.

Wig Wearing Very Old. The ancient Egyptians all wore

wigs, and the early Christians from Sweet Girl-Well, I read the other day A. D. 427 to A. D. 917 considered a about a rich man who made his will in false head covering a badge of distinction. This, too, in lirect opposition to Tertullian, who in vain declared them devices and inventions of the devil, and Clement of Alexandria, who warned his hearers that when the sacred hands of the clergy were laid on their heads the blessing

favor of the woman who refused him, and would not penetrate through the

false hair. -St. Louis Republic.
