HORNUNG, a well known manufacturer of boots and shoes at 820 Nolan St., San Antonio, Texas, will not soon forget his experience with an attack of the cramps which he relates as follows: "It was taken with a violent cramp in the stomach which I believe would have caused my death, had it not been for the prompt use of Chamberlain's Colic Cholera and Diarrhoea Remedy. The first dose did me so much good that I followed it up in 20 minutes with the second dose, and before the doctor could get to where I was, I did not need him. This Remedy shall always be one of the main stays of my family." For sale by Osburn & DeLano.**

**THE CRY OF MILLIONS!**

**OH, MY BACK!**

STOP IT NOW, SOON IT WILL BE TOO LATE.

I have been troubled many years with disease of the kidneys and have tried many different remedies and have without relief. About the 15th of April I was suffering from a violent attack that almost prostrated me in such a manner that I was bent over when I sat down it was almost impossible for me to get up alone, or to put on my clothes, when I immediately commenced using the tea. It had an almost miraculous effect, and to the astonishment of all the guests at the hotel, in a few days I am happy to state that I was a new man. I will recommend the tea to all afflicted as I have been.

**Tin Plate Ignorance.**

The Register has made a wonderful discovery of what the tariff tax of \$16,000,000 annually for tin has accomplished. It says: "The GUARD stated a few days ago that Messrs. Wilkins and Abrams had secured a few sheets of American made tin plate and placed it in McClung's show window for political purposes. The facts are that the tin in question was sent to the Eugene Canning & Packing Company, and was sent as samples without any regard to the campaign. It might also be of interest to the GUARD to know that in May last year the cannery paid for their tin \$6.60 per box on board ship at San Francisco, or \$7.87 laid down in Eugene. This was for imported tin. This year they can purchase the same grade of tin, American make, from Hazen & Co., of Indiana, for \$6.70 per box laid down in Eugene. When they made the purchase last year foreign tin was quoted at \$6.75 per box on board ship at San Francisco, or 5 cents per box more than American tin now costs laid in Eugene. That is what the tariff is doing for us in the tin business."

**Sewing Machine Argument.**

The sewing machine has become indispensable to the household, says the Telegram. The sum paid out each year for sewing machines makes an enormous item. And it is money that usually represents hard earnings. The McKinley law puts a tariff duty of 45 per cent on sewing machines. This tariff tax is taken from the persons who buy sewing machines. It does not go into the treasury of the United States, but it goes directly into the pockets of the manufacturers. Does the manufacturer need this additional tax in order to make his business pay him a profit? This question is answered by making a comparison of the prices charged in this country and in Europe for one of the best machines. This machine is sold at retail by agencies in England for \$32, and in the United States for \$45. In other words, they can make the machine here in the United States, ship it to England and sell it at a profit for \$32, when under the operation of the McKinley law the American buyer is compelled to pay \$45 for the same machine. Is there equity or justice in a tariff system which oppresses the American consumers in this style? The poor American woman who earns her livelihood by sewing is compelled to pay \$13 more for a sewing machine than an Englishman pays. She is robbed of her \$13 to enrich a monopoly, and yet it is all done under the sanction of law.

**Colored Men Denounce Harrison.**

An Idaho paper says: One of the oldest Indian squaws on the Lemhi reservation died the other day at one of their "wick-ups" on the west side of the river. Her name was "Makie," mother of Shepster Jim, of the foreign tribe north of here known as the Shepster Indians. She was 93 years of age, so we presumed—for none of them know their exact age—and was known among their tribe as a great medicine woman.

The proposed electric system for this city and Springfield is a step in the right direction, and is one which offers more practicable advantages to both places than any other local improvement that could be suggested. The phenomenal growth of the cities of Washington which have not one-tenth the natural resources of our town has been due only to the push and enterprise of those realizing the necessity of reaching out and drawing in to them the business of the surrounding country.

A United States fish commission car No. 2, arrived at Penitentiary on Monday noon's train from the East, and was taken up the branch Thursday morning.
