M., boldness with which he has trodden on the ore of which is worth about \$35 per forbidden ground may stand in the way

of his selection for the position. Max O'Rell, who is lecturing in Aus max O'Rell, who is lecturing in Australia, announces his intention of returning home and "settling down" for life after this last trip. Asked whether by "home" he meant Paris, he replied in the negative. "In Paris everything is changed. We go there every year to look around, but when one has formed a circle, of literary negal and artistic circle of literary, social and artistic friends, as I have in London—well, that is home.

While Prof. Huxley was staying at a seaside resort in North Wales he was approached by a Liverpool evangelist, who thrust a tract into his hand with the inquiry, "Haye you got your soul saved?" "I have sufficient respect for genuine religion to be revolted by blashamous importinguous." said the sciphemous importinguous." said the sciphemous importinguous." phemous impertinences," said the sci-entist in relating the anecdote afterward. "So I answered somewhat sternly, That is my business," and tore up the tract.'

EDUCATIONAL NOTES.

Total Membership at Yale University This Year-Number of Schoolhouses in the United States.

About 175 new students are registered at Vassar College this year.

The golden rod has been adopted as the flower of the Chicago University. Of the students graduated at Yale University since 1701, 7,526 are dead and

,820 living. During the last year Harvard Univerity has received in gifts and bequests over \$500,000.

The Constitution of Louisiana permits women to hold any office connected with public education. One hundred and two girls were en-

rolled at the opening of the Allentown Baltimore proposes to open a school of

pedsgogy, with a principal drawing a salary of \$3,500 at its head.

Thirty young women students have entered Yale this fall. The Yale males are said to be in quite a stew about it. It is expected that 1,000 students will for the protection and development of attend the new Chicago University this the shipping interests of the city.

> The enrollment this year at the University of Illinois at Champaign is 623, ompared with 498 on the opening day

last year.

England with ninety-four universities has 2,723 more professors and 51,814 more students than the 360 universities of the United States.

New York city is to introduce the are just becoming known. After the kindergarten as a part of the public-men were shot, their bodies were hanged and left for the buzzards to feast upon. The appropriation for the first year is \$50,000.

The name of Butherford B. Hayes stands at the head of the Chautauqua class roll for 1896. General Haves enters on the four years' course at the age of 70 years.

Prussian education is more thorough than that of any other country. Every child is in school from 5 to 14 years of age. Parents must obey the law, pay a fine or go to prison.

The total membership a: Yale University this year will be about 1,900. Last year it was 1,784. The faculty list num-bers over 150. The increase in the academic freshmen class has necessitated its separation into ten divisions, instead

The "Faribault plan" of Archbishop Ireland was the issue at the annual chool election at Faribault, Minn., on October 1. The town decided in the negative, the ticket of those supporting the plan of nuns teaching in the public schools being defeated by a majority of

Education in private schools of high lass costs about \$1,000 from October to early June. For this sum a young woman is housed in an elegant home in a fashionable locality, is fed on choice fare, served by well-trained maids and looked after morally, socially and physically by refined and well-bred women.

The only college in Scotland for the university education of woman is Queen Margaret College, founded in 1883. buildings are the gift of Mrs. Elder. These and the endowments will be reserved for the exclusive education of

FROM WASHINGTON CITY.

A Statement From the General Manager of the Baltimore and Ohio-The Board of Ordnance.

The Mexican government has decided to send delegates to the Internationa Monetary Conference at Brussels.

A statement has been received at th War Department from General Manager Odell of the Baltimore and Ohio rall-way, which shows that in case of an in-vasion of the United States four trunk lines leading to New York from the west could land 350,000 troops within thirty hours, with horses and all necessary equipment, and at the same time move enough commercial supplies to meet the current needs of the country.

The chief of the revenue marine serv ice in his annual report enumerates the services rendered by the revenue cutters Corwin, Rueh and Bear and Fish Com-mission steamer Albatross, temporarily detached, in patroling Behring Sea and inforcing the modus cirendi. To September 30 the Bear had cruised more than 10,000 miles in Alaskan waters, and with the United States steamer Adams will remain as a guard in the vicinity of the seal islands until December 1 next. The entire revenue marine service has cost during the yearly \$1,000,000. The Board of Ordnance, which has had

the duty of adjusting the smaller caliber rifle sights and other details of the new magazine gun for the army, has handed in an interesting report. The new weapen, which is a modification of the Krug-Jorgensen gun, will be made at Springfield, Mass., at the national armory for the army and marine corps. The navy will also change its rifle to correspond. It is hoped to have some of the new weapons ready by January 1. The caliber of the army rifle will be reduced to thirty, the weight of the builet will be 220 grains, and the charge will be from thirty-six to forty grains of smokeless powder, or such less weight as will give the above bullet a muzzle velocity of about 2,000 feet per second.

Domestic violence in some States has rendered necessary the use of military in support of the civil authorities, says General Schofield in his report. Idaho's military organization had not reached the strength necessary to cope with a formidable insurrection involving detion by the government.

Cour d'Alene mining region. Wyoming also had to employ national troops to prevent a conflict between armed parties ing with an Arab at Tabo of citizens. Other special services rendered by troops in various parts of the country are involving much labor, ex-posure and hardship. Regarding small arms and field artillery he says when troops are furnished with magazine small arms they will be as well equipped as any troops in the world, and urged that no time be lost in supplying such arms. The General speaks in approving terms of the beginning made in fortifyng our coasts, and recommends an ar tillery reserve and other matters.

A dispatch reciting the troubles experienced by American merchants on the Gilbert Islands was shown to Secretary Foster the other day. The United States commercial agent in the islands has made no such representations to the Department of State. The Secretary says that early in the present year the department received a communication from King Tebu Reins of the Gilbert Islands praying that the United States establish a protectorate over them. The department did not act upon the application for the reason that it was the established policy of the United States to decline to extend its protection by such means. Certain aspects of the case resembled ive as this year. The exception was in the twelve months succeeding the great may be assumed that all legitimate. The German Emperor's may be assumed that all legitimate. merican interests in the fully protected.

THE CHICAGO EXPOSITION.

Marshal Field Invests a Large Amount of taining 5 years of age, while of 1,000 Money in World's Fair Bonds-Other Items of Interest.

A hotel that will cover ten acres and have 6,124 rooms is to be built near the World's Fair.

The last of the \$300,000 appropriated by California for the World's Fair exhibit has been drawn from the Treasury. Marshal Field has subscribed for \$500,-000 of World's Fair bonds. The Chicago banks have taken \$1,500,000 worth, creased, owing to the elevation of Gen-and the entire \$4,000,000 has been die eral Mitre to the chief command of the posed of.

physician.

Electricity's Onward March needle twenty feet distant. During the Philadelphia in 1876, an electric light was exhibited as a curiosity. Now there is

THE FARM AND GARDEN

Good Industry in Which to Engage in the Rural Districts

MAKING CHEESE ON THE FARM

Cheese Contains the Proper Nutriment for a Laboring Man-Muscle and Bone Former.

We do not intend to speak of cases

where a farmer has a number of good customers providing a steady market the year around for his butter, or where the section of country lies adjacent to some large city, making the sale of milk much more profitable. We have often found farmers tolling to make butter when by putting their milk on the train and sending it to the city would net them the year around 10 to 15 cents a gallon We know a neighborhood where the farm ers are gathering their cream and selling it for 9 cents per inch, says a writer in Farm and Home, when the same quantity of milk required to produce this amount of cream w li make two pounds of fine cheese, worth on the market to day 10 cents per pound. Now this seems to settle the queetion from a financial standpoint. A small hand-made press, vat and hoops furnished us on this farm with some extra-fine cheese with much less labor than it would have cost to have made butter. Besides having all we could use for the several families connected with the farm, we sold several hundred pounds of our "Young Amer-ica" at 15 cents a pound, and, as butter only brought the same, we received more than double value for our product. Again, cheese will not only keep, properly turned, all through the long summer days, but will continually get better, while the reverse is true of butter. Another very great factor not usually taken into consideration is that the public's tas e is changing. Fresh butter is de-manded; the days of June butter, kept for six months, are past. Cheese contains the proper nutriment for a labor-ing man; it is a muscle and bone former,

A correspondent of the Country Gentlemen, Jacob Engle of Schoharie county, N. Y., relates his experience with lice on stock in a recent issue. Readers who have lousy stock are requested to tr this and report results. He says: used kerosene and lard mixed, curried and brushed over them; also camphor in barrels, 20@40c per gallon; \$1.75 per dissolved in alcohol and carbolic acid in lard, but without satisfaction; and, being determined that the lice should go, I tried onions after waiting about a week. One particular animal, a yearling bull, was very full even after being treated with the other remedies. I took a large onion, cut it in two and rubbed him hard all over until I had used three or more onions and my eyes smarted. Then I gave him some of the pieces that were left and a few other small scullions, which he ate with relish, as did all the others, and then I waited results. The second day I examined him, and to my astonishment and joy the hair was full of carcasses, but not a live one could I find. Since then I have fed none to the cows giving milk for fear of spoiling the butter. I am going to treat the poultry sugar pess, 95c@\$1.00; string beans, 90@ also by rubbing their roost well. I should 95c per dozen. Meats: Corned beef, 1s, be pleased to learn the results with

save many an animal an uneasy night."

Good Dairy Cow Food.

Onions for Lice on Cattle.

In a dairy section of New York cotton-seed meal is fed to the cows to the exclusion of all other grain food. When the animals are in milk and hay feed, the rule is to give two quarts at a mess. The meal is usually given dry; but occasionally it is stirred into sweet skim milk when that is available, according to the Nebraska Stockman. When asked if dry hay and cotton-seed regimen did not constipate the animals, a prominent dairyman replied: "I have not seen any such result." Cotton seed and ensiage with some hay would make the most complete ration for milking cows in winter; but in the section alluded to they have no ensilage, because it is a mount-ainous region and corn will rarely mature. The best dairymen feed cotton seed when the cows are at grass, a quart morning and evening. The result pays "twice over" in added milk and butter, and nearly the cost of it is added to the value of the manure. The testimony is that cotton seed increases the quantity and quality of milk 25 per cent, over that of cornmeal and the manure value 50 per cent. As to the result of feeding cotton seed to other animals reliable data for judging have not yet been made

Wheat-Sowing. From experiments in wheat-sowing

that have been carried on for severa years at the Ohio agricultural experiment station we learn that average results fa-10@16c per pound, according to vor sowing at the rate of five to seven pecks per acre of thoroughly cleaned seed and sowing this not to exceed two inches deep.
In favorable seasons broadcast seeding has produced about as large a crop as

> hot and dry, drilling is likely to give the best results. No advantage has yet been discovered in the mixing of different varieties. each case. This increase may be partly due to the more thorough pulverization of the soil accomplished by double drill-

It is often better, says an exchange, to have a good, trusty tenant on liberal terms than to pick up any one and apply the squeezing process to him. That is a sound doctrine; but we should don't know, though. I really believe I would change the adverb to generally, if not to rather etherize poor little Fido than see him always. "Often" is too mild a term.

the yield sufficiently to warrant its use.

The fact that sheep will clear an old par ture of weeds and sprouts must not be taken as an indication that weeds and sprouts are all the provender they need They will exist on such coarse fare, but they won't do much more than exist.

In an English Railway Train. First Artist-Children don't seem to

me to sell now as they used. Second Artist (in a hoarse whisper)-Well, I was at Stodge's yesterday. He'd just knocked off three little girls' heads -horrid raw things! a dealer came in, sir, bought 'em directly-took 'em away, wet as they were, on the stretchers and wanted Stodge to let him have some

more next week. Old Lady (putting her head out of the window and yelling)-Guard, guard, stop the train and let me out, or I'll be murdered.-London Tit-Bita.
