Richard Brown, who was injured by the breaking of a scaffold on the Brown hop house a few days ago, is now able to be about the streets, and is rapidly improving.

A part of the material for George Miller's flying machine has arrived, and the work of constructing a "life size" model has commenced at Barr Bros. & Co.'s manufactory.

The funeral of the late Miss Emma Hawthorne took place this morning at 10 o'clock to the Masonic cemetery.

Rev. D. E. Loveridge preached the funeral sermon. School was not held in two rooms of the Geary school, of which the deceased was a pupil.

The heaviest shipment ever made in one day from Wells, Fargo & Co.'s, office in this city was made yesterday by Agent Levinger.

It amounted to 4200 pounds and was mostly poultry. Indications are that Lane county's poultry product is rapidly on the increase.

November Crop Reports. In the case of wheat the returns so far of which are not quite made in full, the estimate will probably be about 14 bushels per acre.

The returns indicate a very short crop of oats, the record per acre being 4 1/2 bushels below that of last year.

Corn—According to November returns of correspondents by counties and averaged by states, is 22.4 bushels per acre for the whole breed.

Potatoes—The average yield per acre is only 62 bushels against 93.9 last year and the average yield for ten years ending with 1890 was about 150,000, 000 bushels.

Hay—The average yield is 1.17 tons per acre, nearly the same as last year.

Tobacco—The average yield per acre is 982 pounds, against 745 last year.

Buckwheat—The average yield is 14 bushels, against 15 1/2 bushels last year.

THE REWARD.

The Same Old Story of neglect and Indiscretion. Betty Grant, Nov. 21.

Yesterday afternoon John Bush, of Fairmount, brought Lulu Dodson to this city and gave her into the custody of the sheriff.

It seems that Bush's sister Jessie and this girl together with Fred Reams and a young fellow named Wiles entered his residence at Fairmount during his absence.

He returned home yesterday and found the Dodson girl there alone at the time.

Reams and Jessie Bush had taken the morning train for the lower valley but officers at Albany were immediately telegraphed to arrest them.

Sheriff Croner went down and returned with the couple on this afternoon's train.

From what we were able to gather, the girls had been making the place their rendezvous at night during last week, and spending their time in company with another girl, Pearl Moore, on the streets in the day time.

These boys were but a small portion of their male companionship. Why the Dodson girl did not leave with the others we did not learn.

Wiles was also arrested this afternoon by Deputy Sheriff Day and is in custody.

Betty Grant is 16 years of age while the Dodson girl is but 15 years old.

It is interesting at the city jail today that the 170 given above is a low, conservative estimate made and is so much clear money to the farmer, after paying all expenses of cultivating, etc.

The sugar company will take all that are raised and will agree to pay so much per ton for them according to polarization of the beets.

The Oregon sugar beet from actual tests, stands high with sugar beet manufacturers as being rich in saccharine or sugar, and will command a good price, say \$1 per ton or \$2 per ton.

This means a big thing to our farmers, who can realize from 3 to 10 times as much more from raising sugar beets, as they can from wheat and oats, besides having their ground kept in a high state of cultivation.

From information received from localities not so favorable as this it appears that the farmers realize over \$40 per acre from their beets and this after paying \$20 to \$23 per acre for cultivating and harvesting their crop.

It is thought that around Eugene beets would make an exceptional yield and that 175 in many instances would be realized.

The \$40 given above is a low, conservative estimate made and is so much clear money to the farmer, after paying all expenses of cultivating, etc.

Samples of best sugar have been placed before our Board of Trade, made from California sugar beets, and there is nothing to hinder our people from having a factory here employing a large number of hands.

Both in the factory and in the fields, and which would result in the increased value of farming lands and the prosperity of the farmers.

Wallace-Watts Wedding. Daily Guard, Nov. 22.

Last evening about thirty of their intimate friends assembled at the residence of Mr. and Mrs. J. O. Watts to witness the marriage of their daughter Mary to Mr. Charles Wallace.

The parlors were beautifully decorated with chrysanthemums, with two lovely wedding bells hanging from the arch.

At 8:30 o'clock the bridal couple, accompanied by their pretty little maid, Miss Jennie Teutsch, Hemenway, marched in to the strains of Mendelssohn's Wedding March, rendered by Miss Lillian Reimhart, and took their places under the two wedding bells.

The bride looked handsome in cream white, made with bodice, full sleeves, trimmed with silk chiffon, and she had very long hair caught up by satin ribbons, together with a long train. White gloves completed this bewitching toilet.

After the ceremony and the usual congratulations the company retired to the dining room, where a delicious supper was served.

A number of elegant presents were received, among them being the following: Silver carving set, forks, spoons, butter dish, castor, pepper and salt, fruit dish, table cloth and napkins, towels, tray cloth, rugs, etc.

Those present were: Misses Stevens, Brumley, Loomis, McClung, Adair, Mast, Gilroy, Teutsch, Hemenway, Stebbins and Reimhart. Messrs. Johnson, Linn, Matthews, Teutsch, Henderson, Moran, Hall and Cohen.

Mr. and Mrs. Wallace took home the local this morning for Cook Springs, W. Va., where they look forward to the future.

The Grattan joins their many friends here in wishing the happy couple a bright and prosperous future.

Sugar Beet Factory.

The benefits of a sugar beet factory to Eugene and the surrounding country can hardly be overestimated.

We are informed that parties have such a factory in contemplation and will put up a factory and plant costing \$300,000, providing they meet with the support and cooperation of both citizens and farmers.

It is expected that they will ask for a site for the factory and also stock subscriptions.

The main question lays with our farmers and is this: How many acres will you agree to plant to sugar beets?

Of course, the company will take all that are raised and will agree to pay so much per ton for them according to polarization of the beets.

The Oregon sugar beet from actual tests, stands high with sugar beet manufacturers as being rich in saccharine or sugar, and will command a good price, say \$1 per ton or \$2 per ton.

About Advertising. One of the most difficult things the publisher has to contend with in securing and retaining a good local advertising matter is the general practice of country merchants and business men of letting their ads stand from one month's end to another without change.

In addition to giving the paper a stale, stereotyped appearance, the advertisers do not realize the same profit from their advertising as they would if they changed the wording of their ads.

There is a class of advertisers also, who never seem to realize that there is anything to be gained by making their business known through the advertising columns of their local paper, and if they do put an ad in, it is only to "help the paper along."

This is one of the most fallacious ideas yet, for there is no profit for the publisher in advertising that does not directly benefit his patrons.

Now, we are just as deeply concerned in the benefits of our own local advertising as you are yourselves, and will always be glad to change the displays just as often as requested.

We trust that when our patrons understand this they will devote the same amount of attention to their advertising as they do to other matters incident to their business, and in this way much more good will result to all concerned.

Card of Thanks. To our friends and neighbors, to the citizens of Eugene, to the principal and pupils of the Geary school, and to the faculty and students of the University, we publicly tender our sincere thanks for their unsurpassable kindness to us in our deep affliction.

Board of Trade Meeting.

The Board of Trade met last night at the rooms in the Harris block. Vice President E. C. Smith occupied the chair, about thirty members being present.

In the course of the proceedings a prize of \$40 was offered for the best writup of Lane county for a small factory to be used by the board. H. C. Humphrey and E. J. Fraser were appointed a committee to have charge of the contest.

It was stated that Barr Bros. received inducements to move their plant to Cottage Grove. A committee consisting of F. A. Rankin, Dr. Kuykendall, F. M. Wilkins, S. R. Williams and D. W. Eaves were appointed to confer with this company and see under what conditions they would remain here.

The same committee was also assigned to see about the removal of a woolen factory here from Knoxville, Iowa. Some correspondence has already passed and a favorable result is hoped for.

H. N. Cokerline was authorized in behalf of the Board to confer with a best sugar manufacturer at Chicago, Cal., regarding the establishment of a new sugar plant in this city.

This is a project also, upon which favorable hopes are indulged. The question of electing an immigration agent was discussed but no action taken thereon.
