Dr. S. P. Chandler of Cambridge discovered last winter that, instead of being stationary, the earth's pole moves through a circle with a radius of 45 feet during a period of 427 days. This circle is not an exact one, however, but is subject to a per-turbation of about five feet. He has lately discovered that the pole has another motion during a year's time through a circle with a diameter of 10 feet.

Jerry Rusk type is fortunately going out of use since the election.

The agricultural greatness of the United States has been the world's marvel for many years but there has been no mystery about it. The natural causes to which it is due have always been within plain sight before any man who cared to look for them. The last chance to "claim everything" was too tempting for the secretary of agriculture, so in this final report the crops of the last two years are credited up to McKinleyism. The men who grew the crops did not agree with Uncle Jerry.

The commissioner heartily commends the disability act.

PORTLAND, Nov. 30.—Word was received today at the sheriff's office to be on the lockout for wo tramps who are supposed to be in this vicinity, and who are wanted at Cornelius, Washington county for burg lary and arron. lary and arson.

The Building Destroyed.

Deputy Sheriff , Marquam, immediately on receipt of the news, pisced the matter in the hands of Deputy Morgan, who will apprehend the criminals should they come to Portland.

Early this morning, between hours of 2 and 5 o'clock, the general merchandise storof R. McNutt & Son, at Cornelius was broken into and all the currency in the building stolen. The thieves were evidently oldtimers at the business, for they opened the safe easily and abstracted the sum of \$162.50 in currency, consisting of a check on the Forest Grove bank for \$67.50, \$50 in gold, \$25 in silver and \$20 in notes.

After collecting the cash available they took a few other articles which could be took a few other articles which could be easily stowed about their persons and their fired the building. The atere was one of those kind inseparable from a country town containing all sorts of articles, from a paper of pins to a threshing machine. The building was an ordinary worder structure, and burned to the ground before the inhabitants of the town could work effectively. habitants of the town could work effectively on it. The loss of the building and stock is not a curately known here, but it is ca-

timated at \$10,000.

Meanwhile the thieves appropriated to their use a velocipede hand-car, capable of seating two persons, which was standing on the track on the West Side Southern Pacific railroad, near by, and left town before they were noticed by any one. This morning the hand-car was found on the track a short distance the other side of Beaverton. They had proceeded dong the railroad as far as they could under the cover of darkness, but at the dawn of day sought the more sheltered recesses of the forest.
