

## Eugene City Guard.

SATURDAY, FEB. 4.

### Who Injure a Town.

La Grande Gazette: There are a great many classes of people who do a town no good, and they might be enumerated as follows: First, those who go to some other town to do their trading; second, those opposing improvement and public expenditure; third, those who prefer a quiet town to one of push and business; fourth, those who imagine they own the town and can run everything as they please; fifth, those who think business can be done slyly, without advertising; sixth, those who deride public-spirited men; seventh, those who oppose every movement that does not promise to benefit them personally; eighth, those who seek to injure the good name and credit of their fellow citizens.

It is said that republican United States senators appear to favor repeal of the Sherman law for publication only, and not as a guarantee of good faith.

Recently there has been perfected a roller pulp machine by which saw-dust, chips, edgings, bark or any other refuse of lumber mills can be made into a first-class quality of printing paper, and that too without the addition of expensive material like rags, cotton or jute. Such paper can be made at a reduction of 50 per cent. over the old way.

One month has passed since a fatal accident occurred through the electric light wires in this city, and still no action has been taken to place the spools a safe distance from the ground. The city council should require it of the company as during cold, wet and stormy weather like the present the danger is increased so much so that the company's employees themselves in raising or lowering the arc lamps, when the current is on, protect themselves with gloves or silk handkerchiefs round their hands.

Although pneumatic tubes for the rapid transferring of mail from main offices to sub-stations have been used by the post-office department for some years past it has been considered impracticable, in New York, to lay such tubes across the East river—hence mail has continued to be transferred by wagons between New York City and Brooklyn, as of old. It is now proposed, however, to lay a large pipe across the East river bridge, within which to operate a miniature electric railway. Cylindrical cars will be built, just large enough to accommodate a mail sack, and before each will be run a tiny electric motor, operated by the trolley system. It is claimed that by this plan mail can be delivered to sub-stations in less than a minute. The idea seems to open up immense possibilities in the line of transportation.

A bill has been introduced into the Ohio legislature which has for its purpose the abolition of capital punishment and in lieu infliction of solitary confinement for life. In no case will a pardon be allowed unless the petition is signed by the trial judge, the district attorney, all the attorneys in the case on either side, all the members of the jury that tried the case that may be alive when the commutation is asked for, and the signatures of two-thirds of the legal voters of the township or voting precinct in which the crime was committed. The bill provides also that in all cases of murder in the first degree the court before whom each trial is had shall keep a record of all the rulings by the court, the charge of the court to the jury and the sentence, such reports to be kept in convenient form for transmission to the governor, who shall, in conjunction with the attorney general, examine the same carefully, and then, if there be a doubt as to the guilt of the prisoner, the governor may at his discretion issue a pardon.

The annexation of the Sandwich Islands to the United States will be but a question of time. The native population is entirely unfit for self government, besides is rapidly dying out. It will soon fall to the lot of some nation to establish a protectorate and none other has the favorable position occupied by the United States. While it is true that the commercial interests of Great Britain on the high seas are beyond comparison greater than ours, the islands are more contiguous to United States territory than that of any other nation. Americans have the bulk of the commercial of the islands, and the Pacific ports on this coast are their natural trading points. The islands possess great value and strategic importance either in peace or war. They are the only coaling station in the middle Pacific, are on a direct line of the commerce between America and Asia, and with the opening of the Nicaragua or Panama canal will be the touching point for a vast commerce between Atlantic ports in Europe and America and Asia. There will be no lack of support to the administration that firmly demands ultimate control of these valuable possessions.

## Cleveland and Silver.

The Portland Dispatch in an article on Cleveland's attitude on the silver question says: "Advocating the continuance or repeal of the Sherman bill is altogether a different thing from favoring or opposing the free coinage of silver. Silverites and anti-silverites unite in the plea for relief from the dangers with which the Sherman bill threatens business. Free-coinage democrats are perfectly satisfied with the defined positions of Cleveland and Carlisle on this important question, realizing that the conditions must be favorable for free coinage before the benefits claimed for it could be enjoyed.

Cleveland's position has ever been on this, as on all other public questions, such as to inspire confidence in his sincerity and honesty. That many democrats have differed with his expressed opinion on the subject, at times, cannot be disputed, but that they now recognize the wisdom of his course, under the circumstances, is no less obvious. What he is in favor of doing now has already been stated. As to the future, conditions and circumstances will doubtless determine it. The one great end to be attained is the general good. If by means of an international agreement or by other favorable conditions his judgment indicates a freer use of silver and a bimetallic standard he can be depended upon to advocate it. This is all that any reasonable silverite could ask and is what the country wants. To advocate free coinage for any other reason than on the broad basis of the country's welfare would be class legislation unpatriotic and undemocratic. Cleveland has the full confidence of the people on this question and can be trusted to dispose of it in a way which will redound to the best interests of all.

Oregon should not neglect any of her interests, but especially not her horticultural interests.

There is a good deal of business yet to be crowded into the less than three weeks of the Oregon legislature. Many Maine prohibitionists being disgusted with the agency plan, it is now proposed to make druggists the dispensers of such liquors as may be required for mechanical and medicinal purposes. The number of winks required to insure the proper flavoring of the inspiring drug store soda water will, however, probably remain the same.

The navy department has completed the plan for the great review of next spring, but the money is not yet forthcoming. Congress must appropriate \$300,000 for the review will not be held. It is not a large sum, but it is more than the billion dollar congress left in the treasury available for the purposes either of display or necessity.

### Imported Birds Protected.

There is a strict law against killing imported birds. It is as follows: Every person who shall, within the state of Oregon, after the passage of this act, for any purpose, take, kill, or destroy, or have in his possession, except for breeding purposes, sell or offer for sale any nightingale, skylark, black thrush, gray thrush, gray singing thrush, linnet, goldfinch, greenfinch, chaffinch, bullfinch, red breasted European robin, black starling, crow, or mocking bird, shall be guilty of a misdemeanor; also every person who shall destroy or remove from the nest of any of the above named birds, any egg or eggs or have in his possession, sell, or offer for sale any egg or eggs, or wilfully destroy the nests of any such birds shall be guilty of a misdemeanor. The penalty for conviction of either of these offenses is a fine of not less than \$5 or more than \$100.

A great many of these birds are to be found all over this upper valley, as they were turned loose at Portland more than a year ago. Some of them may be easily mistaken for native birds, so aside from humanitarian instinct there is an additional reason for treating the harmless little feathered creatures carefully.

A DELIBERATE INSULT.—Governor Penney received a letter Tuesday from his adjutant general asking permission to use the brass cannon belonging to the state, for the purpose of firing a salute at Portland on inauguration day. The governor sent the following reply: "No permission will be given to use state cannon for firing a salute over the inauguration of a Wall street plutocrat, as president of the United States." Such is the disgrace heaped upon Oregon by this plutocratic mill owner, who was elected to his present position by the democracy of Oregon. A few days ago he declared that Seymour, Tilden and Cleveland were the greatest frauds of modern times and used a disgustingly offensive term in characterizing Senator Carlisle.

Since the Roslyn bank robbery, and the Maywood train robbery, the Northern Pacific Coal Company has taken extra precautions to protect the money that is sent over monthly to pay off their employees at the coal mines. When the Roslyn branch train came down from Cle-Elum the other day to get the wealth from the overland train, thirty or more men, armed with Winchester, were aboard. When the express pulled in, the car containing the money was surrounded with cordon of men bearing rifles, while sentinels were stationed at convenient distances to haul suspicious characters in check. As soon as the money was transferred the Roslyn train was put in motion, while the guards still commanded the situation.

In a few days a test case will be brought by F. M. Johnson and John Burnett at Corvallis to ascertain the constitutionality of the action of the state board of equalization in raising the assessment of Benton county. Two hundred dollars have been subscribed by various citizens and the county clerk has agreed to surrender his fees.

## Legislative Notes.

Daily Guard, Feb. 2.

The bill of Representative Coon relative to the formation of new counties appears to be a worthy one. It requires the petition of 100 tax payers to be filed with the county clerk 60 days before a general election. The sheriff must also certify that there is \$700,000 worth of property in the proposed county and that neither of the counties losing territory will be left with less than \$1,000,000 worth of property. The question of establishing a new county must be submitted to the interested electors at a general election and receive two-thirds of their suffrages.

No. 333, Baughman, by request, for relief of Jas. H. Sharp—first reading. No. 335, by Wilkins, fixing salary of sheriff and clerk of Lane county, \$1800 for clerk; second reading. The senate committee on counties has reported favorably on the bill dividing Benton county on a north and south line, calling the new county on Yakima bay, Bay county.

### SENATE BILLS IN HOUSE.

No. 26, by Alley to incorporate Florence, Lane county. Read first time. No. 83.—To incorporate city of Eugene. Read second time. To corporation.

### THE GOVERNOR'S DILEMMA.

The governor's first veto reached the senate at 11 o'clock Tuesday. It was the senate bill relating to private corporations owning the water rights at Riddle, Douglas county. Shall the bill pass over the governor's veto?

The world's fair bill has passed the house by a vote of 35 to 20. In the senate yesterday the color line was drawn when Mr. Denny's bill relative to the intermarriage of certain races came up for final passage. The measure under discussion proposed to make lawful the intermarriage of negroes and the whites. Senator Veatch in a flowery talk said the white wings of peace were spread over the land—that the war was over and forgotten. He thought that there should be no intermarriage of negroes, Indians, Chinese or Japanese with the whites. The Lane county senators both voted against the bill and it was defeated by a vote of 20 to 10.

By Veatch, to authorize county judges to bid in property sold for taxes, read third time and passed.

A woman who sued for a divorce from her spouse in Douglas county, and to whom the court granted a decree, married within the statutory period of six months within which an appeal must be taken, and now her husband has appealed the case to the supreme court, and now the lady is in a peck of trouble.

A correspondent of the Okecheco Review tells of a dance at Paulkerville in the following interesting manner: "The 'Observer' attended the dance at Paulkerville. It was a grand success both financially and physically, for I went through on main strength and awkwardness. A fine supper of raw oysters and crackers was served at midnight, and another consisting of the choicest viands was served at midnight. Some of the boys got too hilarious and were locked up in the hen-house."

### Journalistic Amenities.

It has been supposed that the ancient amenities of Oregon journalism had gone the long way of the dodos and the ichthyosaurs, but there is abundant evidence that even in their ashes live the wonted fires. The keen and dashing Klamath Star thus reasons with an objectionable rival.

The Express intimates that we "danced for whiskey" at Keno. Everybody in Keno knows that to be a lie. We never danced there, we never drank a drop of strong drink there. Our character in Oregon as a temperate, industrious, hardworking and honest-paying editor is too well known to be hurt by a common liar. If "Worthy" would pay for one-half he eats, drinks or wears, he would be more respectable. He is known in Klamath Falls as a drunken bum whose "jaw-bone" is eternally dancing for whiskey. Yesterday morning he was yanked around in a saloon for his drunken bawling, and this is the third time he has been pulled out for his scurrility. To hide his black eye the black guard failed to show up on his paper until nightfall, when he came forth to set his jaw-bone dancing for gin, as usual.

Florence West: Frank Jarvis, who has been working for the light house contractors for some time past, was frustrated in a neat little swindle this week by the prompt action of Constable C. B. Morgan. Since quitting work several weeks ago he has been lounging around the saloon in this city and managed to contract a bill at the place of about \$30, considerable of which was borrowed money. He left town the first of the week, leaving his bill unpaid, and on learning that he had started up the coast the constable and Mr. Masterson went in pursuit and succeeded in catching him at Hecla Head, where he was compelled to come to time like a little man.

Upton's horticultural bill prescribes a salary of \$1500 yearly for a state horticultural inspector, whose expenses while traveling must not exceed \$5 per day. He may have deputies throughout the state. The act is very rigid in its prohibition of diseased stock and the provisions for disinfecting it, both at home and in transit. All shipments of trees, scions, grafts, etc., must be plainly marked with shippers' name and address, so that the responsibility for violations of the law may be properly located. The penalty is a fine from \$25 to \$100.

State Superintendent McElroy has received and accepted an invitation to deliver an address before the World's Educational congress, to be held at Chicago during the Columbian exposition this year. This congress will convene July 17. The subject will be, "The Rise and Growth of the Public Schools of the Pacific Slope."

Lumpy Jaw Can Be Cured. WASHINGTON, Feb. 1.—The experiments in the treatment of lumpy jaw under the direction of the department of agriculture, are completed. Results show that of 85 cattle treated 65 were completely cured. Secretary Bank is highly delighted with this showing.

## TERRIFIED BY THE TYPHUS.

A Raging Epidemic in the City of New York.

### Schools Closed.

New York, Feb. 1.—The health authorities have become thoroughly alarmed over the rapid spread of typhus fever during last week and are adopting heroic measures to stop it.

Thirty-seven houses have been declared quarantined. The industrial school at West Thirty-Second Street is closed.

The scourge is no longer confined to the filthy lodging-houses in the east side. One case has been reported from Harlem.

The board of health has furnished \$3000 with which to pay 20 physicians to inspect the lodging-houses for the next 30 days.

### The Trouble Begins.

TOPEKA, Feb. 1.—The expected trouble between the republican and populist forces did not materialize this morning. The populist did not attempt to eject the republicans. No business of importance was transacted by either house during the forenoon session.

### Farmers Find Fault.

LONDON, Feb. 1.—The house of commons assembled at noon and the debate on the queen's speech was resumed. Stewart, conservative, from Scotland, objected to the scant consideration given the agricultural interests. He complained that the United States and the colonies could send produce to London cheaper than they could be sent from Scotland on account of the excessive railway rates.

### Insurance Company Fails.

NEW YORK, Feb. 1.—The attorney-general has made an application in the supreme court for the appointment of a receiver of the Home Benefit Association. The insurance department reports that on December 31 their unpaid death claims to the amount of \$110,000, while the available assets were not over \$11,874.

### The Head of the "Perfess."

NEW YORK, Feb. 1.—J. W. Mitchell, under arrest here, confesses that he committed over 100 burglaries at Newark, N. J., within the past year and a half.

He admits that 10 or 12 years ago he robbed a bank in Chicago of \$40,000, with which he made a trip around the world. Returning out of funds, he resumed the practice of his profession.

### To Count the Vote.

WASHINGTON, Feb. 1.—In the house, the speaker appointed Chipman, dean of Michigan, and Lodge, rep. of Massachusetts, tellers, on the part of the house, during the counting of the electoral vote. The house then resumed consideration of the sundry civil bill.

### Portland Blocked—Heavy Snow.

PORTLAND, Or., Feb. 1.—Snow has reached a depth of twelve or more inches in this city. For the first time during the present storm, street car traffic was almost entirely suspended this morning, on electric lines. The cable is the only one in operation. Southern Pacific trains arrived almost on schedule time, but the Union and Northern Pacific are reported several hours late. The weather bureau's bulletin, issued today, says: Snow was falling this morning at 5 o'clock, at all points in western Washington and northwestern Oregon. East of the Cascades the temperature ranges from 2 degrees above at Baker City to 14 degrees below at Walla Walla. This will be succeeded by warmer temperatures today, on the approach of the storm. In Montana and Dakota the temperature continues below zero from 40 to 44 degrees.

It costs about 12,000 to get the electoral votes of the 44 states carried to Washington. When received the returns were locked in a steel safe in the vice president's room. This safe has been specially provided with detection of any tampering. The key of the count by congress the returns are carried to the house in a pair of well-locked cherry-wood boxes.

Statesman: If the man who started the banks at Junction, Gervais and Sheridan does not intend to come back and explain, he should be brought back by process of law. He should be required to explain what use he made of the \$7000 he "borrowed" from the Gervais bank.

The WEEKLY GUARD with a 12-column supplement, was printed this morning. It can be had at this office for five cents per copy. Buy one or more.

### The Local Market.

The following quotations for the local market are for prices only. They are corrected weekly, and will be found as accurate as such report can be made:
