But nearly every dairy contains animals that have the disease n a latent state, and nearly all who frink milk in cities have some that somes from cows with latent tubercu-The important question is, When tas the disease progressed far enough to be dangerous, and how can it be purified against? No one can tell at that stage in the disease the milk is info, or when it becomes dangerous. It also true that some are so much more asceptible to the disease that they will contract it from milk that others would be entirely free from. With children the langer is greater than with older people, and a child that is born with a feeble astitution cannot stand much milk

Beiling the milk or sterilizing it has a tendency to eliminate the germs, but not in all instances. This method refuces the nutritive value of the food, which is already low owing to its disrased condition, and not a great deal is gained by feeding such food to children. Nevertheless this is the only preventive measure for those using milk in cities during hot weather, and it should be rigidly enforced. In the future, breeds of cows may be bred which will not be subject to this disease, and it is only along this line of improvement that tuberculosis can be stamped out. - Yankee a tay.

An Artist Foolest.

Irving Montagu writes in "Wanderings of a War Artist:" "One evening met two very fascinating Spanish girls in a quiet quarter of Irun, one of whom, being a blonde, was enveloped in a white mantilla. It being customary on meeting a white mantilla to extend her some what similar homage to that paid to royalty, I raised my hat, and stepped on one side to allow the couple to pass, when, in doing so, I saw to my horror, by the light of the moon, that they were followed closely by a grim and grotesqu reptile, half lizard, half frog, which with a series of spasmodic bounds, was making directly for their heels. Oh, the horrid beast, the indescribable monstrosity! To rush forward and trample on the uncanny thing was the work of a

It was the Basque equivalent for the old English jokes practiced on the 1st of April."

Seemed Monotonous.

The other evening a little girl, a mite of five years, lay on her mother's lap during the children's hour. Play was over and the white robed little figure was ready to be tucked into bed.
