cent sum of 15.

A disease over which the doctors are in dispute has raged with considerable virulence in the smelter town of Anaronda, Mont., for the last ten weeks. is caused by some black measles and by others black smallpox.

A telegram from Needles states that 1450,000 of bonds of the Nevada Southern railway branch line from Goffs have been sold in New York city, and it i thought work will be pushed on to Pioche and Goode Springs at once.

At the meeting of the International Irrigation Congress in Los Angeles on October 10 Secretary Gresham states that the Department of the Interior will be represented by an officer for the pur pose of giving such information as may

Butte, Mont., witnessed recently the grandest spectacle the Roman Catholic hurch has yet seen in the West. Archbishop Satolli, Papal absegate, said mass in the open air in the presence of nearly 12,000 people, the whole Catholic population of Butte,

The trial of the ejectment suit insti tuted by ex-Governor Downey to secur the removal of the Indians from War-ner's ranch in San Diego county, Cal., shows that ever since the coming of the mission padres these Indians or their rogenitors were in peaceful occupancy

In connection with the recent row at Federation cannery on the Naas river, British Columbia, Fraser, who was one of the principals, in correspondence criticises the policy of the missionaries dealing with the Indians, and holds that se not connected with the church are the best Indians up there.

Avery rich gold discovery about thirty siles from Sisson in the Eddy Mountain has caused much excitement. The hills are full of prospectors, and every inch of ground in the neighborhood is located. The owners of the original strike were poor men, but have abstracted in the eighborhood of #10,000 in gold from the quartz taken out.

Los Angeles reports a case of faith cure which, it is stated, has astonished the people of that section. Mrs. Ada U. Walton, who had been an invalid for twelve years, most of the time bedrid den, claims that while on her bed sh distinctly heard a voice telling her to arise, as her faith had mase her whole She called for a wrap, jumped out of bed and walked into the dining room. She has had no trouble in walking since.

The attention of the outside world i being largely attracted to the exhibits Oregon is making at the great White City. Many of our Eastern exchanges come to us with articles descriptive the resources of our State. The edit of the Holt County (Mo.) Sentinel, writing from Chicago, pays Oregon the fol-lowing high compliment: "As repre-senting the States of the West at the exposition, Oregon, the land of big red apples, stands pre-eminently at the head Although she has no State building. Or egon makes a magnificent showing of r resources in the several buildings of Her display in the horticult ural building is everywhere acknowledged as being peerless. Here she shows pears weighing five pounds, apples six inches in diameter, plams larger than goose eggs, cherries three and three fourths inches in circumference and peaches 1752 inches. In her agricultural booth she exhibits grains and grasses that are acknowledged by millmen to be without a parallel. In the draw a pension. flour test made at the fair flour made. An important from Oregon wheat was found to make whiter and finer biscuits than any other our tried. In the mining department a miniature placer mine is kept con-stantly in operation, washing virgin gold from the gravel just as it is taken from Oregon's placer-mining properties. In the fishery department severagions of the fishery department severagions of the fishery department severagions are the famous Columbia river salmon are shown, together with fishing boate, fish and 150 flamatine skin wool and 170 kaswheels, etc., and in the forestry department are exhibited some specimens of timber that astonish the world. A block cut from a forcet of the West measures kassaphatchia skin wool, second quality nine feet across. This is the largest of the third class. The changes in duty block of wood at the fair, and it attracts according to the rates prescribed for different classes will be seen to be great.

#### CHICAGO EXPOSITION.

What tires people at the World's Fair is the walk of miles in every building. Five hundred school teachers of Philadelphia are on a visit to the exposition The color line has not been drawn at the World's Fair. There is no distinct-

ive Afro-American exhibit.

The World's Fair Commissioner at sointed from New Mexico by President Seveland has been seated and White, the old member, ousted. The large statue of Columbus that

stood before the main portal of the cold storage building has been donated by its owner, W. H. Mullins of Salem, O., to be erected upon a suitable pedestal, to mark the graves of the dead firemen. Idaho's World's Fair Commission suffered another loss, this time by theft. A solid gold-lined silver cup, presented by the ladies of Wardner, was stolen. The silver chain and staple by which it was fastened was also taken. The cup cost the ladies 450. There is no clew to the

It has been unofficially decided by the local directory not to return to the na tional government the \$1,929,120 derived from the sale of souvenir coins. The majority of the directors consider their action in voting to rescind the rule for Sunday opening and the return of the appropriation all that is necessary in

Owing to the fact that it was discovered that several thousand single-admis sion newspaper passes to the World's Fair were stolen, the management can-celed all these passes, and will get out a new lot to be exchanged for the old ones suit to compet the Common Council to be properly issued as fast as possible false their salaries as required by the It is not believed many persons secured admission on them till the trand was discovered. A number of those presenting a reception at Astoria recently for his the stolen passes have been arrested, and 400th continuous trip to and from San an effort will be made to make them tell the names of the persons from whom

Oregon is one of the States which has nade extensive displays of her fruit products, and her section in horticulture publican clerks who hold government situations at Mare Island. There is a runor that they are to make way for Democrats.

In this attractor who attention. The publican clerks who hold government fruit is renewed every two or three days and is brought daily from the distant seacoast at great expense. C. R. Irvine, who has charge of shipments, has recerved a large consignment of strawber ries. These were five days on the route making the journey of 2,500 miles through all kinds of weather. Straw berries are considered by fruitmen to be the most liable to injury of any fruit and the condition in which the consign ment reached Jackson Park is though to be remarkable. The berries were we preserved and seemingly as fresh as the day they were picked, a thing which i idered the more remarkable in view of the fact that cold storage en route

was dispensed with. One of the most interesting and comolete educational exhibits to be seen a lackson Park is that of the province o Quebec, which is in charge of Brothe Andrews of the Christian Brothers. Tw ections in the gallery of the manufact ares building are devoted to showing the Canada, and one division represent

be different stages of scholastic trainic n the Protesiant institutions of the rovince. The display begins with the owest grade and specimens of work don y the pupils from the time they ente school until they are turned out thoroughly schooled, fitted to take their po ition in society, and are to be seen their regular order. The studies include all branches known to the educationa world; but, if the pupils excel in an one thing, judging from the exhibit, it i in penmanship and drawing. The coursel instruction makes a special point of endent, and the result is most gratif ing to the instructors. The various chools that are best represented in th exhibit are those of the Christian B ers, Brothers of the Sacred Heart, Brothers of Christ, Sisters of the Good Shep nerd, Sisters of the Assumption, Marie Sisters, Sisters of Charity, Con-gregation of the Holy Cross and manhers of the well-known parochial in

#### FROM WASHINGTON CITY.

The number of pensioners droppe rom the rolls since March 4, 1893, 245, and the total number of pensioner spended since March 4, pending a fur ther investigation of their cases, is 5,000 The manufacture of the new army ri

the (Kragjerogenz) is being pressed vig prously. It is believed the first lot o completed arms will be ready for deliv ery and issued to the service about Sep

The chief of the bureau of statistic ports that during the twelve month ended June 30, 1803, the number of im-migrants landed in the United States was 497,936, and during the preceding year 619,320.

The pension bureau is now engaged a investigating what appears to be as extensive system of pension frauds in New Mexico. It is said that about 2,000 sension cases in the Territory are being nvestigated.

While Treasurer Morgan is non-cor nittal on the report that a defalcation is in the mint at New Orleans, it earned the Treasury Department di cered a shortage in the funds in the nint June 26, and that a searching in estigation has shown that the recen re there was of an incendiary charac er, started for the purpose of covering

The charges of perjury made again the Japanese interpreter employed at the United States custom-house in Sar Francisco have been overruled by the Freustry Department. Acting Secretary Hamlin has sent a letter to the Collector of Unstome at San Francisco exonerating the interpreter and directing that th twelve Japanese be deported "to the country from whence they came."

It is reported that Representative Burroughs of Michigan will introduce a resolution in the House to investigate the present workings of the pension of fice, with particular reference to the le gality of certain orders which have been made by Secretary Smith. It is under lier has been examined in a logal way and a pension granted the Commissio has no right to suspend him from the rolls or to reduce his pension, or to com pel him to be re-examined and go through the form of again qualifying to

An important change has been mad by the Treasury Department in the classification of wool that will lower the duty change follows the conclusive defense of fered by wool importers that certain grades of high-class wool were practically analogous to the grades classified lower in the wool schedule of the McKinley Hereafter material known as 140 suphatchia skin wool, second quality of the first or highest class) will be known as 306 and 397 Servia skin wool and 389

A Lusting Bronzing Solution A solution in which bronze powder is rid in suspension for a long time has been greatemen most without reproach patented in the German empire. Damar lation to mainers, whose whole behavior resin is mixed with one-third of dry car be modeled only upon the intention of do drawing full pay meanwhile.

The court-martial appointed to try Captain Burke. Staff Commander Hawkins-Smith and the surviving officers of the British battle ship Victoria has opened at Valleta, Malta, upon the Historia, the flag ship of Rear-Admiral Tracev. Captain Burke and others were heard. The testimony was direct that Admiral Tryon had blundered.

Treath and the mixture is melted and thoroughly silrred together, and then in thin layers is exposed for several months to a temperature of 120 degs. The resin thus obtained is dissolved in bengine, free frem all traces of acid, by ammonia gas, when a varnish is yielded in which the bronze powder remains suspended to them. The old Stagirite said-how many centuries ago—that manners were frem all traces of acid, by ammonia frequirements by always remembering to the bronze powder remains suspended to that which would be most agreeable to others, most delicately considerate of the feelings, and the least likely to burk of elicity or diagnat.—Harper's Basas. passing a preliminary examination offi-

# FARM AND GARDEN.

Nitrogenous Fertilizers and Feeding Stuffs.

HOW TO SALT THE CATTLE.

The Consumption of Poultry Greatly Increased by Proper Care in Marketing-Etc.

The best vessel to feed quite young pigs in is the mother sow. plenty of good nourishing food, and let nature take its course.

A few shovelfuls of dry earth thrown into a stinking pig pen will abate a nuisance. A better way, however, is not to have a pig pen of that sort. Give the pigs plenty of room, and they will not offend the olfactories, The porcelain nest eggs are a humbug.

They do not look enough like an egg to fool a blind hen. Cast your own nest eggs by blowing out the contents of a shell or shells and filling with plaster of paris. The process is very simple, and there need be no failure. The consumption of poultry would be greatly increased by proper care in mar-keting. Many people are deterred from buying and from eating fowls by observ-

ing the filthy coops in which they are shipped and offered for sale. There is noney ready for the man who will market fowls in a decent manner. A drug journal reports that the government investigation of black pepsin resulted in finding that it is composed of about 83 per cent common salt, 2 per cent rennet and 15 per cent annotto. It does not follow that this analysis will fit all the stuff advertised as black pepsin,

but the public can rest assured that it is all fraudulent. Don't fret over the low price of wheat Remember how much cheaper and easier it is to raise and harvest it than it once was—when it was necessary to hire a squad of men at heavy expense; now you harness up the binder, hoist your imbrella and do it with ease and perfect onfort, and the plowing that was laboof an acre per day is now done four times as fast, and a good ride on a spring seat

brown in.

When the farmer sells the ashes made upon the farm to soapmen instead of preading them upon mowing or pasture lands or applying them to growing crops it may be inferred that he does not yet fully appreciate their full value. Ashes are supposed to contain in a natural form all of the mineral or inorganic ele-ments of fertility that enter into the composition of plants, and hence are valuable when applied to soil either as a top dressing to meadow and pasture lands or to growing crops of all kinds.

SALT FOR CATTLE, Instead of throwing it in handfuls on the ground on certain days of the week after the old method, take a new, sound barrel into the field, place it upon its side on some dry knoll where there is no shade, saw out four or five staves between the large or middle hoops, thus giving the animals access to the salt at will and at the same time leaving a fair protection from the rain to the contents of the barrel. After half or more has been eaten saw out another stave or two on each side of the opening, thus making it large enough for them to use all that remains. By this plan all the animals in the herd will help themselves to just the quantity they need, whenever they wast it, and the waste is small.

> ment station, Storrs, Conn., has for years been urging upon the attention of iarm-ers the value of nitrogenous feeding stuffs. The progress of experiment is bringing out the desirability of such materials more and more clearly. Thus the experiments on the effects of fodder

upon the production of milk and meat,

lately made in experiment stations in the United States and in Europe, em-

phasize most forcibly the need of rations much richer in protein than most of our farmer's feed. In connection with this subject it is stated that crops contain a large exces of the materials which serve as fuel Hams, medium, uncovered, 15@17 \(\)ec per pound; covered, 15\(\)ec @17c; hams, large, while the protein compounds, which make muscle, bone and milk, are relatively wanting. The farmer is primarily responsible for this state of affairs, and must be the one to take the first steps to amend it. The protein needed for the use of the stock kept on the farm may be obtained in one of three ways: may be purchased in the form of con-centrated foods, such as wheat bran, of BERF-Prime steers, \$2.50 a 2.75; fair meats, etc.; it may be obtained by growing the legumes, which are able to obtain the clergy exhorted the population to cows, \$2,000(2.25) common to medium nitrogen directly from the air and convert it it into protein, or it may be ob-tained by breeding and importing varie-\$2.75; ties of grains and grasses richer in nitro gen than those now cultivated. While it is probable that the feeder must for the present continue to buy some of the protein which his animals need, still by care in selection of crops and by growing plants richer in nitrogen much more protein may be produced on the farm it-self. This protein is needed for folder in order to make leaner meat and more of it and more milk at less cost. The trogen not transformed into meat of

milk makes rich manure for grasser, grains and other crops, and the rich macure helps to bring larger crops and crops richer in protein. An old agricultural writer says that some twelve years ago he noticed his bull was free from lice when the rest of his cattle were not. Thinking the ma ter over, he came to the conclusion that the bull's habit of throwing dirt over himself must have something to do with his freedom from lice. So he tried dry earth on the rest of his cattle with good

Since then I have used dry earth and have frequently put it on cattle hav-ing lice, and have found it perfectly effiacions both as a preventive and a con-If in winter I think it needed and cannot get it otherwise, I go into my cellar and get a few quarts. There is no danger of using too much. Dry it of stove; then sprinkle it over the from head to tail; and, working in through the hair, it soon destroys all lice. I believe the earth to be just as efficacions, less dangerous and less ex-pensive than tobacco or any of the acids recommended."

A Good Rule of Manners

They are the finest ladies, they are the lation to manners, whose whole behav
