Seven San Francisco Chinamen, knowing Tacoma was anti-Chinese, became frightened while being driven from the Portland train to a boat at the wharf at Tacoma at the sight of crowd assembled at a fire. Without waiting to consult the driver of the gurney they cut the straps on the doors and, breaking them open, ran back to the depot and hid. They left their baggage behind.

At Hot Creek, Nye county, Nev. Richard Gluyas, superintendent of the Hot Creek and Rattlesnake Mining and Milling Company, an Eastern corpora-tion, committed suicide. He went to the mill and set fire to thirty cords of wood, climbed onto it and shot himself. He was entirely cremated, only two small pieces of bone and the fragments of a pistol being found. He left a will disposing of his property.

In 1872 the exports of prunes California amounted to nothing. So rapidly has the industry grown since that date that last year the exports of this fruit from California reached 30,-000,000 pounds. Numerous orchards are coming into bearing year by year, and still more are being planted. This as-regards California. In conversation with fruitmen from Oregon we find that orchardists in certain sections of that State have caught the fever and are planting prune trees by tens of thousands. with Idaho horticulturists. Right and left these same fruit trees are being set out, and as in all these localities named this fruit thrives and yields abundantly one can imagine the condition of this industry in coming years. Here is something for planters of new orchards to

Another attempt may yet be made to rescue the steam collier San Pedro, which went ashore near Victoria nearly two years ago. This time the Moran Bros, of Seattle have taken the matter in charge, and if they find that it will b worth while to try and save the San Po dro, they will make one final effort to do so. The Southern Pacific Railroad Company, which is the owner of the San Pedro, has, it is said, been in correspond-ence with the Moran Bros. for some time. company is auxious that the San Pedro shall be sayed. She cost nearly company if she is not recovered. However, the company does not care spend a lot of money in removing the collier from her present quarters and then fine that she has been down so long as to become absolutely surthless. g as 65 become absolutely worthless, order to determine her value the Southern Pacific has arranged with the Moran Bros, to make a personal inspec-

CHICAGO EXPOSITION.

In the Oregon display is an exhibit that attracts much attention. It includes a working model of a gold placer mining outfit. A large amount of gold-bearing dirt is at hand for demonstrating the whole process of panning out the gold, and at stated intervals the plant is put into operation. This exhibit is not put into operation. This exhibit is not surrounded with glass, and it is an amusing sight to see people hunting over the sand and dirt for particles or appearances of gold.

Near the north end of the forestry France's Vineyards in a Healthy building are shown cross sections of trees from Osegon. There is a yellow fir log six feet in diameter. The yellow fir grows all over the Northwest Coast Range Mountains. It is of superior excellence for ship-building and spars. It ranges from two to ten feet in diameter. A cross section of a trunk of tide-land spruce is shown. It is nine feet nine inches in diameter. The butt was sixteen feet in diameter, the tree being 305 feet high and 300 years old. Great slabs of noble fir, spruce, lovely fir and yellow fir are shown.

Baron de Maraja, Commissioner from

Brazil, and S. Suwa, Secretary of the Japanese Commission, have through O. S. Whitmore, editor of Hardwood, offered forestry exhibits at the World's Fair to to the city of Chicago for a permanent museum. The The Russian Crarowitz has one good room was excessively warm, and he reason why he can never marry the tried his level best to lower a window from the top, but he failed. Then he Princess Victoria of Wates, with whose name the gossipe have connected his. It is that they are first cousins, and the marriage of first cousins is strictly prohibitest by the canons of the Greek Church.

FARM AND GARDEN

The Silo a Necessary Adjunct to the Dairy.

SOME AGRICULTURAL POINTERS.

Something Concerning Specialty and General Farming-Lice and Ticks on Sheep.

For years past there has been a great deal said and written about specialty and general farming, and more especially during the last few years of dison-tent among the farmers, says a writer in the Ohio Farmer. The difference be-tween specialty and general farming is not great if the advocates of both systems will put the same construction on the word specialty. Whatever the word may mean, I do not think its advocates use it to convey the idea that a man to be a specialist must confine his efforts to only one crop or only one particular branch of agriculture, and yet the advocates of general farming seem determined that a specialist must confine

If to be a specialty farmer means that man must confine all his efforts to one branch of agriculture, such as raising nothing but wheat, corn, oats, potatoes hogs, horses, sheep, cattle or any particular thing, then the less specialty farming we have the better. Our brethren in the South tried specialty farming the specialty being cotton, and it proved a curse to them not only as individual farmers, but as a people. But special 7c per pound; tomatoes, 50 er 75c per box; farming doesn't mean anything of the green corn, 10 et 12 ec per dozen; sweet kind; if it does, I have never seen a potatoes, 2) offic per pound; egg plant, modern specialty farmer, nor have I ever read a line advocating such methods from the most enthusiastic specialist, 1 box; California new crop, \$5.50@6.00 believe I voice the sentiments of all speper box; bananas, \$1.50@3.00 per bunch; cialists when I construe it to mean a oranges, \$3.00 per box; pineapples, \$6.00 per dozen; California apples, \$1.25@1.50 words a special system, or in other per dozen; California apples, \$1.25@1.50 words a special system, or in other words a special rotation or combination. > An expensive experiment was made y Prof. C. P. Gillette of the Colorado experiment station on the prevention of ce and ticks on sheep, which we give as follows: After shearing the sheep an emulsion, consisting of 8 per cent kero lightly weakened. During the treatment a man should stand in the vat and give each sheep a thorough drenching. The emulsion should be kept well stirred at all times. The cost of materials for dipping fifty-eight sheep was \$1.11. The scab parasite, ticks, lice and maggots all succumb to the destroying power of the kerosene. The dip does not remain permanently in the wool after drenching it it should be renewed after each annual shearing. Too much kerosene is likely thoroughly emulsified. An emulsion made at the rate of two gallons of keroene, half a pound of soap and one gaon of water churned together, and added thirty or forty gallons of water after churning, will be strong enough to ac complish all that is desired.
