If there is any coal in the vicinity of The House Committee on Military Af Port Angeles, Wash., it is likely to be fairs will report favorably the bill o uncovered within the next lew months. General Curtis of New York, which re Fifteen men are now at work in the creek vises the regulations for envistment in bottom on Race street, just outside the the regular arroy and is designed to Fitteen into Race street, just outside the lottom on Race street, just outside the eits limits, and Messrs Griswold and Hibbard, who are in charge of the work. are confident that the indications at that be enlisted in time of peace except point are conclusive evidence that within American citizens or those who have d a few hundred feet of the surface a pay ing vein of coal will be found. A dam seventy-five feet from bank to bank and speak, real and write the English lanten feet high has been constructed in the guage. These rules do not apply to In-bed of the crock, from which a water dians. The official reports show that dams. The official reports show that obtained. The formation at the point at which the drill will be operated is sand-stone, which is discolored by the sulphor formes within a discolored by the sulphor must be under 30 years of age. Under supposed to come from the coal the existing rules the enlistments are beneath. Lowis Levy of that city is also anxious to open a coal mine in that vi-cinity. He asks the citizens of Port An-geles for a \$20,000 land bouns, over half of which has already been subscribed. which has already been subscribed, no man shall re-callst who has not served and in return agrees to open up a vein bonestly and faithfully during the first of coal three and a half feet wide.

gether. The official returns show an increase in exports from Canada for the past six months of nearly (4,000.000. The imorts for the past six months increased \$500.000.

The speech of Senator Jones of Nevada during the silver debate will fill Representative Doolittle had hoped to ninety pages of the Congressional Record, and a special number has been assigned to it.

> On the proposed subway to cross the city of Boston \$5,000,000 are to be ex-pended. Passengers will be carried from Park Square to the Union station on Causeway street in four minutes.

The petitions presented to Congress against the Wilson bill bear the names of 1,250,000 persons, the largest number of remonstrants ever known in the cas of a pending scheme of legislation.

The New York State Railroad Com mission intends to ask legislation giving

sachusetts, where it has been successful Judge McAdam of the Superior Court of New York, who has probably granted more divorces than any living Judge, has ruled that if men set traps to catch un-

faithful wives they cannot get divorces. Judge Dundy at Omalia has issued an order reducing wages on the Union Pa-cific system. The average reduction per man is \$3.52 per month. The employee are enjoined from striking against the

west. Boston has been seized with the urb annexation fever again. A bill has been introduced in the Legislature to al low the "Hub" to gather to itself all towns within ten miles of its gilded Statehouse dome.

President Harper of the Chicago Uni ersity is reported to have stated that the story of Cain and Able is a myth. with no more truth in it, as far is known than the story of the wooden horse that figured in the capture of Troy, or than the myth of Remus and Romulus as annected with the founding of Rome.

The Law and Order League at Jackson ille, Fla., has resolved to make it lively for the principals, aiders and abettors in the Corbett-Mitchell fight. It holds that the injunction granted by Judge Call was an evasion of the prescribed statutes, and if the State authorities do not very soon bring the matter up for review in the Supreme Court, the league will do so.

The peculations of James Anderson of Indiana, a well-connected lad of 18 years, who is employed as a messenger in the Treasury valits at Washington, provenore serious than was at first supposed They amount to \$794 as far as ascertained, and the inquiry is still in prog-ress. When the theft was first discovered was supposed to amount only to a few ollars, and at the request of the Treas ury officials publication of the fact was suppressed. Anderson had access to the diver vaults for the purpose of showing visitors through. He pried open the wood work of some of the silver chests

ar the lattice work, slit the bags containing the silver dollars and helped himself to a few dollars at a time as he wanted them.

The next Universal Exposition open in Antwerp on May 5 of this year. The next after that, as far as at present known, will be the Paris Exposition of

Berlin cab drivers to the number of between 400 and 500 have struck against a police order requiring them to wear white glazed hats as a distinguishing

mark of their calling. The Russian government, which aban doned the idea of an income tax some time ago, has now determined to impose tax upon the rental of occupied houses,

to be paid by the tenants. It costs Great Britain \$20,000 to scrape

the barnacles off the bottom of one of its big men-of-war and repaint it, and this has to be done twice a year in th case of nearly every vessel.

There are some signs in Russia of relaxation of the authorities toward the peasants and Socialists. A greater measare of economic justice is hinted at in many public documents.

The Czar in a telegram to the Governor of Moscow expressing thanks for New Year's congratulations says: " May God grant peace, re-t and general welfare to all nations, and more especially to my own dear country."

Paris, not satisfied with the river Seine seeks a shorter cut to the open sea, and a ship canal to Rouen has been proposed. There would be no great physical obstales in the way, since the points are only about seventy miles apart.

According to an advertisement con ained in the Danish Government Gaaette, published in Copenhagen, two big volcances are for sale. They are situated in Iceland, and are the principal at-tractions of the island. The owner asks for them the sum of \$400 apiece.

A concession has been secured by a American for the construction of an lectric railway between Tokio and Yo kohama, a distance of about thirt niles. Two American engineers are said to be now on their way to Japan in con nection with the matter.

There may be another attempt at rea ution in the Republic of Colombia The government is on the alert. Genera Ruiz, military chief of the Liberals i the provin-e of Panama, has been ar rested in Baranquilla and taken to Par ama. He is guarded most carefully.

The Socialist students of the Universities of Berlin, Freiburg, Muenster Marburg and Kiel for the first time in the history of German universities hav nade a public declaration of their So inlist sentiments by dispatching an ad fress to the International Congress Socialist Students at Geneva.

Lieutenant John H. Alexander, a tal nted colored officer, who has been ap sounded to the professorsh p of militar cience and tactics at Wilberforce Uni versity, Wilberforce, O., is the first ap ssintment of its kind to be made in this ugatry.

Pittsburg is very happy over the ar ival of a heavy cargo of molasses by teamer direct from New Orleans, the first on record. Heretofore the rule has seen to break cargo at Cincinnati and rehip.

Rosina Vokes was the last of the fa-

mous family of that name.

gracefully, and this was all there was to the formal ceremonies of the opening the great Midwinter Fair. The act of starting the machinery was

signalized by the shrick of every whistle in the exposition grounds, by the blare and fanfare of artillery within full sight of the assembled multitudes. On the same spot, when evening fell, there was a grand display of fireworks, but in the interim the recreation ground was deserted, for everybody made a grand rush as soon as the opening exercises were over to visit the main buildings of the exposition and to patronize the concessional features. It mattered not that some of the exhibits were incomplete as yet, for there was enough to keep all eyes and all thoughts busy during what was left of that short afternoon, and everything, finished or unfinished, was novel and unique to everobody.

It was in the concessions, however, that the holiday spirit of the crowd was made more prominently manifest. The 49 Mining camp immediately established itself as one of the most popular institutions in the exposition. Seven thousand people paid their way into this concession on opening day. The Firth wheel carried nearly six thousand, the Scenic railway was loaded down all day and far into the night: the Wild Animal Arena, the Ostrich Farm, the Indian Encampments, the Hawaiian Village, the Vienna Prater, Heidelberg Castle, the Aquarium, the Sea Lions, the Colo rado Gold Mine, and the scores of other concessions did a big business, and everybody seemed satisfied with the patronage they received.

All this established beyond a doubt the popularity of the Midwinter Exposition. Since the opening day there has been an average daily attendance of 8,000 people, or as many as paid admission so the great World's Columbian Exposition during the first few days after the official opening. Visitors are loud in their praise of what they have seen and are freely predicting that the exposition will be an immense success. The exposition management begin to feel as if they could take time for a good night's rest now and again, for their undertaking has now been fairly launched, and they are willing to trust its drawing powers to prove sufficient for its satisfactory continuance for the enentire term of six months.

The great glory of a California winter is just now at its height. People riding in the open street cars read of the bliz gards and snow blockades that harase their eastern friends, and once more the word of wencome passes along every line of eastern railroad; "Come to California see the great Midwinter Fair, and get WATE."

## The Editor Looking Forward.

Mrs. Annie Caubie sends us an egg tostay which is as large as a goose egg and which was laid by an enterprising Legiorn hen. The egg is a monster and we shall attempt to set it, and expect to hatch out a full grown ostrich with large and wonderful spurs. When the ostrich is trained we shall ride him of the plants shall be vastly increased.-

#### Visiets Are Profitable

Violets cut no mean figure in the trade of New York, and in seasons when they escape disease they are highly profitable to the growers One florist, whose greentouses are just on the edge of the city, picked from twenty-five to thirty dollars worth of violets weekly all through the winter although the plants occupied a comparatively small area. The cost of picking is little or nothing, and a skillful picker acquainted with the nature of the plant can cull so that the fertility

### BEST WAY OF MAKING HAY.

The poor men in Finland accidentally discovered the best way of making hay. Having no meadows of their own, they cut the grass off waste lands, and for want of roads they stuffed it among the branches of neighboring trees to wait the winter snows, when they could carry it home on sledges. After a wet season the farmers noticed this hay was better in quality than they made from better grass, so they made imitation trees by setting up poles ten feet long, with long traverse pegs, and heaped the grass loose-ly upon them : the result was excellent. Even in wet weather only a small portion of the outside was dissolved, while the inner portions, exposed to the air beneath and protected from the rain above, are dried in perfect condition. Mowing can be carried on in spite of wind and rain, and when once the grass is placed upon the drying poles it may be left without serious damage until the weather changes.

#### DRAWING WATER FROM THE WELL.

The cheapest and easiest method of trawing water from a well 100 feet deep

is by a force pump and a windmill, says the Rural World. To convey the water to a house on an elevation a pipe may be attached to a pump, and to keep up a constant supply there should be a cistern near the house, which would hold a stock for use in case of failure of the wind at any time. Where the cold is intense in the winter the pump may be placed in the cellar, well protected by a bank over it and a double door, and the discharge pipe should be laid in the ground below the reach of the frost. It will be a help to fill the ditch in which the pipe is laid with sawdust or chaff and to lay the pipe in a wooden box, so as to have

# around it.

THE CLIPPING OF HORSES. The benefits of clipping are that horses at work, encumbered by long, thick costs of hair, sweat profusely, and thereby cause a great waste to the system, and their health and usefulness are promoted by the removal of their natural covering. When sweating from any cause undul occurs in the horse it is always noticed

i0c; cloves, 18:030c; black pepper, 20@ that it is accompanied by waste of muscle, general debility and loss of tone.

#### The First Plane.

No one can tell exactly who made the first piano for the reason that it has gradually 'evolvei" from an instrument as much unlike itself as one could well imagine. In the twelfth century it appears to have been a gigantic dulcimer, which was merely an obiong box holding a series of strings ar ranged in triangular form across its conter. In the thirteenth and forteenth centuries the "clavichord," another musical monstrosity, had developed from it and was used well up in the eighteenth century. About 1711 Christofall of Padua invented a real piano, but it is said to remind one of a coal box when compared with the elegant

and perfect toned instrument of today.
