All this did not, however, abate her admiration for both-perhaps particularly for this picturesquely gentlemanly young fellow, with his gentle andacities of compliment, his caressing attentions and his unfailing and equal address. And when, discovering that she had mislaid her fan for the fifth time that morning, he started up with equal and undiminished fire to go again and fetch it, the look of grateful pleasure and plead-

ing perplexity in her pretty eyes might have turned a less conceited brain than his. "But you don't know where it is? "I shall find it by instinct." "You are spoiling me-you two." The parenthesis was a hesitating addition. but she continued with fresh sincerity. "I shall be quite helpless when I leave here—if I am ever able to go by myself."

"Don't ever go, then." "But just now I want my fan-it is so close everywhere today." "I fly, mademoiselle."

He started to the door.

She called after him, "Let me help your instinct, then. I had it last in the major's study." "That was where I was going."

He disappeared. Rose got up and moved uneasily toward the window. How queer and quiet it looks outside. It's really too had that he should be sent after that fan again. He'll never find

fear, and even now it was with a half snile at her imprisonment in the major's study that she rang the bell and turned to the window. A man whom she recequired as one of the ranch laborers was standing a hundred feet away in the garden looking curiously at the house. He

saw her face as she tried to raise the sash, uttered an exclamation -d ron forward.

But before the could understand what he said the sash began to rattle in her hand, the jarring recommenced, the floor shool: beneath her feet, a hideous sound of grinding seemed to come from the walls, a thin seam of dust like smoke broke from the ceiling, and with the noise

of falling plaster a dozen books followed each other from the shelves in what in the fruntic hurry of that moment seemed a grimly deliberate succession; a picture hanging against the wall to her dazed wonder swung forward and appeared to herself reeling against the furniture, a deathly nausea overtook her, and as she glanced despairingly toward the window the outlying fields beyond the garden seemed to be undulating like a sea.

For the first time she raised her voice not in fear, but in a pathetic little cry of apology for her awkwardness in tumbling about and not being able to grapple this now experience, and then she found herself near the door, which had once more swiing free. She grasped it eagerly and darted out of the study into the deserted passage. Here some instinct made her follow the line of the wall rather than the shaking balusters of the corridor and staircase; but before she reached the bottom she heard a shout. and the farm laborer she had seen coming toward her seized her by the arm dragged her to the open doorway of the drawing room and halted beneath its arch in the wall. Another thrill-but lighter than before-passed through the

building, then all was still again. "It's over, I reckon; that's all just now," said the man coolly. "It's quite safe to cut and run for the garden now through this window." He half led, half lifted her through the French window to the veranda and the ground, and locking her arm in his ran quickly forward a hundred feet from the house, stopping at last beneath a large post oak where there was a rustic seat, into which she sank. "You're safe now, I reckon," he said grimly. She looked toward the house. The

sun was shining brightly. A cool breeze seemed to have sprung up as they ran. She could see a quantity of rubbish lying on the roof, from which a dozen yards of zinc gutter were perilously hanging, the broken shafts of the farther cluster of chimneys, a pile of bricks scattered upon the ground and among the batter-d down beams of the end of the veranda; but that was all. She lifted her now whitened face to the man, and with the apologetic smile still lingering on her lips asked: "What does it all mean? What has happened?"

The man stared at her. "D'ye mean to say ye don't know?"

"How could I? They must have all left the house as soon as it began. I was suddenly left."

My stomaci would not retain food; inv nead acied constantly and was so dirry I could scarcely stand; my eyes were blurred; had a bad heartburn, and my breath was offensive. I had physicians, but they failed to help me. My appetite gave out, and four years ago I developed palpitation of the heart, which serio flected my breathing. Had terriba pains in my back, and had to make wa ter many times a day. I finally devel oped rheumatic signs, and couldn't sleep nights. If I lay down, my heart would go pit-a-pat at a great rate, and many

nights I did not close my eyes at all, was broken down in body and discouraged in spirit, when some time in Feb riary last 1 got a couple of toxes of Dr. Williams' Pink Pills. Before I had fin-ished the first box I noticed that the palpitation of my heart, which had both red me so that I couldn't breathe at times, began to improve. I saw that in going to my home on the hill from the depot, which was previously an awim task, my heart did not beat so violently

and I had more breath when I reached the house. After the second and third boxes I grew better in every other respect. My stomach became stronger, the gas beiching was not so bad, my appetite and digestion improved, and my sleep became nearly natural and undisturbed. I have continued taking the pills three times a day ever since last March, and to-day I am feeling better than at any time during the last eight years. I can confidently and conscientiously say that they have done me more good, and their good effects are more per-

manent, than any medicine I have ever taken. My rheumatic pains in legs and hands are all gone. The pains in the small of my back, which were so had at times that I couldn't stand up straight, have nearly all vanished, and I find my kidneys are well regulated by them. This is an effect not claimed for the pins in the circular, but in my case they brought it about. #### Justice Greater Than Charity.

The one divine work-the one ordered crifice-is to do justice, and it is the last are ever inclined to do. Anything er than that. As much charity as you choose, but no justice. "Nay," you will may, "charity is greater than justice." Yes, It is greater; it is the summit of justice-it is the temple of which justice is the ndation. But you can't have the top without the bottom; you cannot build charity. You must build upon jusfor this main reason, that you have at first, charity to build with. It is not, at first, charity to outly way. Do justice the last reward of good work. Do justice to your brother (you can do that whether to your brother (you can do that whether love him or not) and you will come to him. It is all very line to think you build upon charity to begin with, but a will find all you have to begin with fins at home and is essentially love of melf.-Ruskin.

The introduction of the mortuary photo graph chromo sent the hair artist to the wall, but the species is by no means ex-tinct yet. I met one the other evening who was taking home the memorial of the whole family of a widow of wealth. He told me that there were twenty odd people represented in the material employed in this masterwork. It was certainly melancholy enough to remind one of twenty funerals. I tried to find out what such a feat of genius was worth, but he declined to be interviewed. He hinted at immdreds of dollars, but whether this meant what it was worth in his estimation, or what he was paid for it I could not define. ## A Chief Justice's Gown.

Unlike judges in most lower courts the apreme court justices wear black gowns that are much like the cassocks of church choristers. Arrayed in these somber black rowns, the justices, a row of seven or eight very large and very learned men, present an appearance of official dignity that is most striking.

The supreme court convenes at 12 o'clock. One day Chief Justice Chase was anable to find his robe. He searched every part of the robing room, and even lighted a match to go deeper into his closet than isual in search of the missing gown, betause the day was a dark and rainy one. It wanted but a minute or two of 12

when the chief justice, almost beside him self with long searching, appealed to Ben Wade, the famous rough and ready senator from Ohio, who chanced to enter the room, to help him find his lost gown.

Wade had just come in from out of foors, and so, thrusting his umbrella under one of the settees to see if the missing garment was there, he fortunately fished Holding it at arm's length on the tout. end of his dripping umbrella he should, "Here, Chass-here's your old shirt."

The learned chief justice reached his cat in the middle of the row just as the clock struck the last stroke of 12, but the spectator from the front would never have guessed that the gown which clothed so much dignity had been ten seconds before daugling at the end of a very wet umbrella.
