The Naval Parade.

The coming naval parade in New York harbor on Oct. 12 will not be as imposing an affair, so far as naval vessels are concerned, as the centennial parade of three years ago. Then, as now, Acting Rear Admiral Walker had command, but he had on that occasion the Chicago, Boston, Atlanta, Yorktown, Kearsarge and the Jamestown. Notwithstanding the fact that a dozen new steel vessels have been added to our national fleet since 1889, yet all Admiral Walker can muster in October will be the Chicago, Atlanta, Philadelphia with two torpedo boats, the Vesuvius and the diminutive Cushing. Our other vessels are widely scattered where they are absolutely needed, and there are twelve vessels slowly approaching completion. The Carnegie strikes have bud considerable to do with the backwardness of the armor plating of the new cruisers, and it is doubtful if such vessels as the Maine, New York or Poritan will be ready for the grand celebration. -Brooklyn Engle.

These are the days when heroes sit in sulkies, whip in band, instead of prancing on mailed chargers, lance at rest. That the hero of the horse trot may find a fair damsel to adore and inspire him is shown by an episode of the Cornish fair. A group of Brownfield dames and damsels were watching eagerly the hotly contested race in which a Brownfield horse driven by Reuben Linscott, the well known one armed trainer, was a competitor. In the last and winning heat of seven, as the pride of the plains swept under the wire a length shead of his rival, the Brownfield women broke into a shrill cry of delight, and one very enthusiastic and very pretty girl, turning to another, exclaimed, "I wish I had Renb Linscott here this minute: I'd kiss him till he couldn't seef"-Bangor (Me.) TROUBLED BY ROGUE SPIRITS.

Pranks With Palmirie

Henry Palmirie of Chicago deserves the thanks of a benighted world. He has been exploring the mysteries of the spirit land by a system peculiarly his own and has explained his discoveries with a nonchalance and perspicuity that stamp him as no ordinary pioneer of extramundane spheres. Mr. Palmirie says be is no spiritualist, yet he talks with spirits. His scheme of comboard or dial, with the alphabet promiscu-ously arranged in a circle around it. With the ends of his fingers resting lightly on the board, it is moved by the spirit back and forth from one letter to another until the answer to his question is spelled out. "C For convenience the words 'yes' and Olef. "no," as they are more frequently used than any other, have a place outside the elrele. Now, I want you to understand," he

said to a Chicago Tribune reporter, "that these spirits all came to me entirely unso I am not a spiritualist and don't attach the same importance to spiritual ism as the believers therein do. But it is intensely interesting to me, and I consider the results of my experiments remarkable

About one year ago I began these se ances with the assistance of my wife. But she soon became so nervous that it was impossible for her to do anything or even remain in the room where the scances were held. Then I began it alone. My appara tus was extremely crude and poorly adapted to the purpose, but I achieved results right along. One night I placed my hands on the board and immediately received a response. I said: Yes. Who is it? The name of an uncle who died in New York some years ago was spelled out. I wanted him to tell me something of the mode of existence where he was, but the conditions evidently were against us then, and I couldn't get much satisfaction from him. here," she concluded, handing me a I asked him to tell me whether there were any other inhabited worlds besides the one in which we live. He said there were two others, Jupiter and-but the name of the second I could not catch. The people in em resembled us, and their spirits mingled with ours

The next night another spirit came, and it said to me, 'Your wife is going to fall ill and die.' Well, that made me mad, you know, and we got into a row at once. I told that spirit never to come fooling around me again; that I did not care to talk with it. But, as I learned later, my injunctions were not obeyed. A few nights what purported to be the spirit of my sister, who, I knew; unless death had overtaken her suddenly, was alive and well in New York. It said to me, 'I am fatally each hand fire bereinad was also Ill at the hospital.' The next day I wrote

The next night the spirit of a man who roomed with hospital it could find out and let me know. | me. He shall recall my husband on his I asked how long it would take. The reply was, 'Ten minutes.' At the expiration of 10 minutes. I went to the board again. The spirit was there and said, Yes; I located your sister in the hospital, and she is sick unto death.'

"Well, all this, you see, was a lie and came from that rogue Jordan. If anybody ever knew such a chap, I should like to have that person's address, because he must have been a bad egg. Then I have had many interesting as well as pleasant communications. I talk either mentally or orally, it makes no difference which. One satisfactory seance was with my stepfather, who was nearly 80 years old when he died. He is in purgatory, a place di-vided into seven states, one for each of the senses, but he hopes soon to get out of there into heaven. He told me my mother was in heaven and wanted to come to me, but only by special permit can the dwell-ers there get a chance to visit the earth. As this purgatory corresponds with that of the Catholic belief, I asked the old gentleman whether one religion was looked upon there as being better than another. He answered 'No.' Then I asked him to give me a description of the various spirit

lands. He replied: " I can't answer that question."

".Why? " There is a guard here watching over

"It seems, therefore, that guards or drivers manage all the spirits that correspond with me. I asked another spirit regarding the mode of life, the punishments and general appearance of things over there, and it replied. 'If the world should find out all you want to know, the increase in

suicides would be immense." It seems that Mr. Palmirie enters into these nightly frolies with much pleasure,

"I am alone in my room. My family has retired. Everybody is asleep. The whole house is quiet. Consequently I need fear no possible fraud or trickery excepting from such rogues as Jules Jordan. I light my pipe, take out my spirit board and place my hands on it. In a minute or two the board moves. I ask, 'Who is it?'

Then the name is given; also the age and time of death. I have obtained the following results: There are three spheres -heaven, purgatory, or place for repent tion, and no living person knew it but myance, and hades, in which there are no
fires, but instead cold and darkness. The

"Veral" he gasped. "No words, man! Over, I say!" And as she gathered strength to force him down he clutched a bush. "Your false, lying tongue shall deceive no more!

"Stop!" rang out a voice, and to Ivan's aid came a strong arm, dragging him back to the green turf, where he lay ex-

hausted and speechless.

The dense clouds hung heavier. A tremendous flood of fire swept down. A deafening crash instantly followed and a hewn bolt of thunder fell at our feet. The ragged clouds parted. The light swung over the scene.

And I leaped into the arms of my boy

The forked light had left the seared mark of a double cross upon his brow! "Cesca dear, can you not speak?" cried

"Yes, that is all that I can do. You find me here, the withered bush that you have made me-a heart without a green leaf upon its twigs; a dead tree, upon which you hung your cruel letter, your message of adien, your declaration to become the husband of another!"

The sun beamed brighter. The freshened trees and grasses held up their green heads with pride as they drank from nature's cup. The daisies never looked more beautiful. I saw the fond, dead hopes of the past spring into new life. The birds sang again their sweet carols as my boy lover's hand crept into mine and our fond lips met.
