RIVER OF BLOOD.—Statesman: Settlers along the North Santiam in the mountains the first of the week were thrown into wonder and excitement by the peculiar appearance of the stream, which flowed for hours a river of apparent blood. But it had a natural explanation. A heavy thunderstorm had raged in the mountains above Detroit, and a bolt of lightning had struck the bank overhanging the river, causing an immense landslide of red clay formation, which completely dammed up the stream for some hours and left it dry for a mile or two below.
