THE RUSSIAN CZAR

Prof. Leyden Describes His Precarious Condition.

HE NEEDS REST AND RELIEF

Under the Most Favorable Circum stances, However, His Recovery Will Take Years and is Uncertain-Granulated Contraction of the Kidneys.

Berlin, October 11,-Prof. Leyden, the specialist, recently in attendance and many civic and fraternal organiza-

upon the Czar, says: "The Czar has a powerful constitution, and still weighs 200 pounds, though he has lost much flesh since January 1, and he should be able to make a good fight against the disease with favorable climatic influences, as at Corfu on the Island of Madeira, and without unforeseen complications he may recover. The illness of the Czar is peculiar. His principal trouble is granulated contraction of the kidneys, in which the kidneys be-come hard and change tissue, besides being subject to atrophy. This is accom-panied by hypertrophy of the heart, resulting from the enlargement of its mus-cular tissue. This latter leads to the difficulty, and is often very painful, the spasms being complicated by fits of unconsciousness. This is the case with the Czar. There is no dropsy, however. Diabetes in the preliminary stage has declared itself, but it is merely sympathetic and the accompaniment of the main trouble. When further advanced, this frequently results in partial or en-tire paralysis. Thus far, however, there does not appear to be any immediate danger with the Czar. The most important requirement is total abstinence from mental worry, and on this point the Czar has been found exceedingly difficult to convince. The patient should also have plenty of sleep and food diges-tion be regular. This with open-air exercise and good climatic conditions is all that is necessary to effect a cure. Under the most favorable circumstances, however, the disease is of lengthy duration.

Referring to the prospects of a regency in Russia, Prof. Leyden remarked: "The question of the appointment of a regent was discussed at Spala in my presence, but no decision was reached." Prof. Leyden concluded:

possibly years, and the results are most

A regency will become necessary however, if a cure is to be effected."

DR. ZACHARIN'S BLUNT OPINION. LONDON, October 11.-The Standard's correspondent in St. Petersburg sends the following story, the facts of which, he says, he learned through an ear When Dr. Zacharin told the Czar that his malady was incurable; that care and attention might prolong his life a few months, but that it was useless to conceal the fact that no reme dies would avail beyond a certain period, the Czar was terribly affected. He entered another room and exclaimed to the occupants:
"Dr. Zacharin has just told me there

Everybody was thrown into consternation by the Czar's change of face and mien, and greatly blamed Dr. Zacharin for speaking so bluntly. The correspondent vouches for the correctness of

the story, and he adds; The Czarowitz will very shortly re turn here accompanied by the Grand Duke Michael. The two will preside over the Council of State and act They will be Regents in everything except the name. Army reports have a ready been submitted to the Czarowitz, who will probably assume the chief command almost immediately. His marriage appears to be somewhat removed. partly owing to the tradition that no Cear may marry within a year of his coronation. It is reported that Professor Leyden is less hopeless concerning the Czar than is Dr. Zacharin. He con siders that the disease must have existed two years, and he is astonished that it was not detected at an earlier stage, when treatment is more likely to have been efficient."

REGENCY IN DISPAYOR. St. Petersburg, October 11 .- It understood if the Czar decides, fully expected, to form a regency during his absence from Russia, the Czarowitz will not be appointed Regent, but will be entrusted by special declaration of the Czar with the direction of State af-fairs. The title of Regent will be care-

Sugar-Sect Industry. Berney, October 11.-In interviews with a number of leading dealers in engar at Magdeburg the opinion was expressed that under the American tariff bill the increased duty on sugar was aimed at Germany. It was predicted that if it continued in force it would rain the large beet-root farmers. It was thought, however, that America would soon repeal the law. If it did not, it was the opinion of the dealers the government would be forced to adopt repressive measures against American imports.

HE WANTS INDEMNITY.

Another American Escapes From the Russian Prisons.

Washington, October 11 .- Nicholason Frederickson, claiming to be an American citizen who was seized and impris oned in Russia and afterward made his escape, called at the State Department to-day in furtherance of a claim for indemnity for illegal arrest. Frederickson asserts he was born on shipboard in Persian waters of a Swedish father and a half-breed Esquiman mother. He rebecame an American citizen. He was at school in Chicago during his boyhood, and returned there during the World's Fair to work as a machinist. At the time he took out natralization papers he time he took out natralization papers to meet a request by the authorities of Alaska to recognize his citizenship. In Russia last winter he was arrested and imprisoned as a deserter. Later he was set free and kept under surveillance. Again he was imprisoned, and managed to escape and made his way to New York. The impression conveyed by the man's story is that he is suffering from a case of mistaken identity. He told his story to the State Department officials; but as a mere statement does not meet the requirements, he will have to prefer a formal complaint before the department can act in the matter of securing indemnity for him.

Less Activity Than Formerly Because of the Hard Times and the Falling Off in Immigration-The Total Cash Receints of the Office.

WASHINGTON, October 8.-8, W. La. moreaux, Commissioner of the Land OL fice, in his annual report shows that there has not been so much activity in public land offices this year as formerly. due to the hard times and consequent falling off in immigration. Among other recommendations made is one for an innovation in survey. Instead of the contract system under which public lands are now surveyed, he says the government should make the surveys. He suggests the work be done by the geological survey, and points out that the geolog. ical survey is compelled to go over the same ground which has been previously gone over by the contractors' surveyors. The geographical survey and the topographical survey can be made at the same time and with much less expense, The disposal of land for the year ended June 30 was as follows:

scellaneous entries..... ton lands. eresse from last year... The total cash receipts of the office were \$12,767,824, a decrease of \$1,711,800, and the total agricultural patents issued 35,258, a decrease of 8,429. The number of mineral patents was 1,162.

The report further shows:

Surveys amounting to 6,935,837 acres have been approved during the year, The Commissioner recommends that an appropriation be made for at least six ating in the districts designated by the that the law permitting cutting of tim-ber on the public lands be repealed.

A Cause of Action May Lie for a Hosband's Affections.

Los ANGELES, October 9,-Judge Van Dyke has rendered a decision upon a demurrer in the \$50,000 damage suit brought by Mrs. Mary R. Crandall against Mrs. Clara D. Thompson, which illustrates the tendency of modern legislation toward strengthening the rights Mrs. Crandall's suit is for the aileged alienation of the affections of her former husband, E. Crandall of this city, by the defendant, and Judge Van Dyke overruled the demurrer to the sec-Ecuador ond amended complaint. In the course of quite an extended opinion he cussed the point at length raised by the not a proper party, but that the cause of the action, if any, is enforcible only with or by her former husband.
