When my little girl was one month old, she had a scale form on her face. It kept spreading until she was completely covered from head to foot. Then she had bells. She had forty on her head at one time, and more on her hody. When six months old she did not weigh seven pounds a pound and a half less than at birth. Then her skin started to dry up and gut so bad she could not shut her eyes to sleep, but lay with them half open. About this time, I started using the CUTICURA REMEDIES, and in one month she way completely cared. The doctor and drug lifts were over one Aussired dollars, the CUTICURA hill was not more than for dollars. My chird is now strong, healthy, and large as any child of her ago use photo.), and it is all owing to CUTICURA. Yours with a Mother's Hessing, MRS. GEO. H.
