for Infants and Children.

"Castoria is so well adapted to children that I recommend it as superior to any prescription known to me." H. A. ASHUR, M.D., 111 So. Oxford St., Brooklyn, N.Y.

"The use of 'Castoria' is so universal and its merits so well known that it seems a work of supererogation to endorse it. Few are the intelligent families who do not keep Castoria within easy reach."

Friday afternoon and Saturday forenoon the sun came out in all its splendor making it appear as though spring time had come. The same kind of weather was had at Eugene and Albany as at Roseburg and they are certainly in the grand and glorious Willamette. Bro. Plaindealer you had references to Portland and that city is not the Willamette valley by a jug full.

BEGINNING OF THE SEASONS.

Generally speaking we say that winter begins with the first December, spring with March 1, summer with June 1, and autumn with the 1st of September. Astronomically speaking the above is incorrect, that mode of reckoning marking the beginning of the seasons at the equinoctial and solstitial points. We passed the winter solstice (which marks the beginning of the winter season) about eighteen days ago. This winter solstice is the meridian passing through the point where it touches the tropic of capricorn. The summer solstice, the other solstitial point referred to, is the one touched on June 21. Both the spring and the autumnal seasons are marked by the sun crossing the equator on March 20 and September 22 respectively. According to the above arrangement of things, a year is the period which elapses from the time of the sun's appearance on one of the tropical circles to the time of his return to the same. Such a year is called a civil or tropical year. It varies slightly, but has an average mean length of 365 days, 5 hours, 48 minutes and 49.7 seconds.

The official statistician at Washington says that the returns show that 5,100,000 refused to vote at all at the last election. He also says: The stay-at-home votess has increased in New York from 75,000 in 1888 to 185,000 in 1892 and 450,000 in 1894. In Pennsylvania it has increased from 70,000 in 1888 to 230,000 in 1892 and to 400,000 in 1894. It has increased in Ohio from 40,000 in 1888 to 115,000 in 1892 and 200,000 in 1894. South Carolina, when she had 50,000 less voters than now, cast 183,621 votes for Hayes and Tilden. The total vote in 1894, however was not much over 60,000, or about one-fourth of the full vote.

It is not exactly fortunate that the first suit to test the constitutionality of the income tax should be brought by an operator in Wall street, who is popularly supposed to have made large sums of money by virtue of his close connection with the senate chamber at Washington, and the violent fluctuations of the price of sugar trust shares during the past year. The legal questions involved in the suit will not be affected by the plaintiff's operation in the stock market but popular sympathy is not apt to be awakened in his behalf to the extent that it might otherwise be.

The different species of ants are pretty generally distributed over the globe, and on this account the naturalists infer that there is work for them to do in the great economy of the universe. In each colony males, females, neuters and sometimes soldiers are to be recognized. The males are invariably smaller than the females, and like those of the feminine gender, have wings in their natural state. The neuters, which are the workers, are without wings in any of their transformations and the soldiers are recognized by the armor plates on their heads.

Married.—At the Sherwood house, January 1, 1895, by J. S. Medley, J. F. G. W. Reiss and Rebecca Miller.

He Was in Salem.

Representative Moorhead of the Oregon Times was in town and says:

"We were in Salem yesterday. The principal topic of conversation is the coming session of the legislature and the election of the United States senator. 'Rooms to let' and 'private board' are very prominent citizens, but the changes this year are more in keeping with the gold basis than formerly. Candidates are numerous and full of fun. We have not had a single application from a lady for a clerkship and the discrimination is unexplainable. We found Secretary-elect Kincaid at home and learning the rounds of his office. He looked smiling and happy. He hasn't tried on the governor's chair yet, although we have no doubt that the fit will be perfect.

We stepped into the representatives hall and hollered a hello to see how our voice would sound. The echo flew back and knocked down the janitor."

A BULL.—The nightwatchman of Albany writes to Marshal Eastland of this city, under date of Jan 6th, as follows: "A man was here this week, claiming to be a member of the K. of P. in good standing, and had a receipt for dues and an order for the past year. Please look out for him and let the K. of P. boys know about this. He is an Irishman and has a roll of blankets. He is no good."

From the hills and dales of the beautiful Pleasant Hill section of country comes a deer story that were it not for the undoubted veracity of the boy who told it, would be considered rather 'fishy.' On the hills adjacent to that section of country the hounds occasionally get on the trail of a deer, and their deep baying is heard from the distance while sometimes across little valleys can be seen the race for life or death on the mountain sides. Very rarely, however, do the deer even when hard pressed, venture into the settled part of the country. J. N. Otto, who lives in that part of the country, one day last week heard the hounds chasing deer over the hills from his village. A little while afterward he heard cracked in his woodshed and the instant later the deer came leaping into his kitchen, frightened and trembling from head to foot. To effect its capture was an easy matter, indeed does the shrinking and timid little deer exhibit enough of undaunted cheek to rush into a house without invitation, and bar for occasional incidents like this told by truthful people, have of the rather odd stories of animal life would be believed by many to be but the fancies of a diseased imagination.

ANOTHER MAN MISSING.

Frank Skinner, of Colton, has not been seen since January 1st.

Frank Skinner about 30 years of age, left his home at Colton last Tuesday morning to Eugene, telling his wife he was coming here to have some checks cashed, saying he would return in the evening. He arrived in Eugene on that day but as the banks were all closed, it being a legal holiday, he sold the two checks on the First National Bank, of Portland, one to H. C. Humphrey for \$80 and one to C. May, for \$25. Since that time no tidings have been received from him.

He was interested, or working for his father, in a variety store in that place, and had resided in that section for a number of years. His wife is much alarmed, we are informed, over his absence. Several years since he mysteriously disappeared and again suddenly reappeared, after a week's absence.

James Robertson, the wood sawyer, is still missing. It is thought he is drowned. The body was found floating in the water, but the cause of death could not be determined.

Mr. W. McBride, secretary of state, has returned from New York, is in good health. On the advice of New York physicians, he will have to rest quiet for a long time.
