SATURDAY, MAY 4

The butter market in Oregon is very unsatisfactory. It is not often that first class butter sells for 10 cents per pound.

Several small fruit driers will be built by owners of orchards in Lane county for use the present season. The fruit will be saved in better condition and at far less cost.

Experienced prune growers contemplate discarding low grade fruit, claiming there is no profit in it and that the sale of the better grades are injured by placing it on the market.

A salary of \$5,000 a year is paid to an attorney general that cannot be trusted to protect the interests of the state. The people make the incumbent of the office a very handsome gift.

Huntington of the Southern Pacific railroad asserts that his prosperity is due to the fact that he lives within his income. The extortionate policy followed by the company of which he is the representative prevents thousands from following his example.

A lamentable accident involving loss of life has occurred on the Oregon Central and Eastern railroad. The ownership of the road is in doubt, and no permanent repairs will be made until the question of ownership is settled. The people of the Willamette valley will welcome a prompt opinion from the supreme court on the points involved.

This country will control the Nicaragua canal. England may bully the little republic, but will lose on every move. The \$75,000 indemnity claimed is but an excuse and pretense by which Great Britain seeks to obtain a foothold from which she can exercise power over the future international highway. The strict adherence of the United States to the Monroe doctrine is a stumbling block in her way that cannot possibly be surmounted.

An unavoidable accident, the first for many months, happened on the old Oregon Pacific road the other day and the Oregonian promptly suggests that the so-called railroad commission close the road to traffic. That railroad hauls freight at reasonable rates and is not run in the interest of Portland capital. We should not be surprised to hear a protest against wagons competing with the Southern Pacific railroad for freight business because of an occasional runaway.

The Rural Northwest says one hundred of the eminent lawyers, politicians and business men of the state have lately, through the columns of the Oregonian, given the farmers such sage advice as to how to conduct their business in order to prosper. It would now seem the proper thing for one hundred eminent farmers to tell the lawyers and business men how to conduct their business in order to prosper. Good advice of this sort don't cost much, and it would be ungracious to discuss its value.

Walter Willis' strawberry patch is attracting more attention than his melons did last year. There is every prospect of a good crop of berries, and our people are already planning to make short cakes.

Diversified farming is the rule hereabouts now. Corn, beans and potatoes are the leaders, while fields of peas are being tried by some and buckwheat by others.

Mr and Mrs T O Martin visited Cottage Grove last Saturday.

Free Silver Democrats.

JEFFERSON CITY, Mo., April 30.—Thirty-five of the 58 democratic members of the state house of representatives met in caucus late last night and adopted a resolution favoring the free coinage of silver at the ratio of 16 to 1. The vote stood: Ayes, 32; noes, 7; not voting, 4. The caucus precipitated a discussion which will probably result in holding a state convention.

Will Use Steam Tricycles.

UKIAH, Cal., May 1.—W. P. Miller, of this city, received a telegram this morning announcing that he was the successful bidder for the mail route between Ukiah and Harris. Harris is 90 miles north. Mr Miller has placed an order for two six-horse power gasoline tricycles, which he will use instead of horses. Mr. Miller says the tricycles work finely. He expects to have five here soon. Mr Miller's contract runs for three years. This is the only stage line in the United States which will be run by steam tricycles, and the experiment will be watched with interest all over the country. They will have room for passengers and mail, and will have a speed of from 3 to 12 miles per hour.
