The bicycle correspondents of the Salem Journal is not in love with the Santiam wagon road. He writes: "Of all the mountain roads in Oregon, this Lebanon road has the worst grades of all. The surface of the road is pretty fair, but in hundreds of places there are from 5 to 8 per cent up grades coming this way down the mountains where it would have been just as easy to have had a water grade as it is on the McKenzie route, but it looks like the parties who laid out the road had not the faintest glimmerings of the first principles of road making. The county road below the fall gate is a great deal better grade but the road bed in most places is a bed of boulders with a thin coating of dust over them and the Sitarans living along claim it to be a road, but it is not."

crickets in Harney City.

The crickets have invaded the town but such a din is being raised about their ears it is thought they can be turned and headed off until they get set into travelling in another direction.

Two years ago Harney was crawling all over by this black pest, flower and vegetable gardens being rescued by tacking 4-inch wide tin with flared top around the fencing. One citizen with wire wove fence suffered the loss of his inclosure, but had a yard full of crickets after the town was abandoned by them—his quota having grown too large to crawl out where they had crawled in.
