Mr. Hill and family fared much better than Rev Mr. Beaman, who was robbed and he swam out and was rescued to-gether with Rev Mr Hill and family. R. V. HOWARD. George Arzberger Dead.

Daily Guard July 29

Geo. Arzberger known by many as "George the Barber," died at the county poor farm, near Thurston, yesterday at neon, after having been unconscious for two days, aged about 59 years. The funeral took place at the Smith ceme-tery this afternoon.

Arzberger first came to Eugene from Portland in 1857, and immediately opened up a barber shop. James Mc-Claren was a passenger on the same boat with him. In 1858 he started for poat with him. In 1808 he started for the Frazer river mines, but only got to Portland, where he spent a couple of months and then came back and re-sumed business. During the year 1862 he caught the mining fever and went to the Carlboo mines, remaining went to the Carlboo mines, remaining away until 1868, when he returned here again and went into the barber business. About 1880 he was married to Miss Florence Isles, but after a year a separation and divorce ensued. In 1882 he sold out his barber shop to Hugh Renshaw, and from that date to 1888, when he went on the county, he eked out a precarious existence at the gambling table, and from the charity of his friends, who paid his living expenses during 'the year 1887. About the year 1885 his nervous system gave way and he was unable help himself. Since 1888 he has been the ward of the county, and for two or three years he was kept at Portland hospitals with the hope that he might be benefited, but without any good results. Since that time he has been cared for at Dr. Russell's Sanatarium. In early days George made "bushels of money" as he said but it disappeared over the George made "bushels of money" as he said, but it disappeared over the gamoling tables. A verdict of justifiable homicide was rendered, no arrests being made.

A Long Chute.—The proprietors of the Teaushet mill in the Coast Fork mountains east of Walker, this county, intend to build a chute 6 miles long in which to float railroad ties and other timbers from their mill to the railroad. It was purchased in the palmy days when the Hogg management had funds, and when the road was known as the O. P. As it was about 2 o'clock that the news of the supreme court decision turning the road over to Bonner & Hammond was ticked off by the telegraph instrument in the office the belief grows that the faithful old clock, used to vicissitudes and debt, could not stand the change to promised prosperity, and with the receipt of the news of the decision, like "Grandfather's Clock," "it stopped short, never to
