FELL IN A WELL.—Wednesday's Salem Post: "This morning at 11 o'clock the little 7-year-old son of Mr. Crump, of South Commercial street, in making an attempt to draw water from a well by means of an old-fashioned windlass, lost his balance and fell into the well, a distance of 18 feet. The little fellow with great presence of mind grasped the rope, and his mother, who heard the noise, came out of the house, soon located the little fellow and drew him out on terra firma. Mrs. Crump was assisting his mother to draw water before this, and as he had a chance, being unobserved for a few minutes, he attempted to do the work of drawing water alone, with the above result."

Now she thinks that the only hope for a competitive line is the Yaquina road, and she is going to secure it if possible.

The usual funny things occurred in the Sprague fire. In the excitement of moving valuables out of reach of the flames, many persons performed what, in their coolest moments, would be considered laughable acts. One man was seen to rush frantically along B street with a huge piece of ice, which probably weighed 30 pounds, while behind him trailed a young lady with several pieces of fresh baked pies. Another person placed a large mirror face downward in an open field to protect the glass from the heat of the flames. A moment later two men bearing a large cork stove selected the back of the mirror as a safe place to deposit the stove.

FOSTER'S FORECASTS.

Weather Predictions for the Next Ten Days.

In his last bulletin Foster gave forecasts of the storm wave to cross the continent from August 4th to 8th, and the GUARD learns he says the next wave will reach the Pacific coast about August 9th, cross the west of Rockies country by close of 10th, the great central valleys from 11th to 13th, and the Eastern states about 14th.

Average rainfall may be expected from this disturbance, principally along the central latitudes of the United States.

Warm waves will cross the west of Rockies country about August 9th, the great central valleys 11th, and Eastern states 13th. Cool wave will cross the west of Rockies country about 12th, great central valleys 14th, and Eastern states 16th.

August is the most difficult month of the year for which to forecast the severe storms. It is one of the tropical storm months and as we are not yet able to definitely forecast these tropical storms, and as they always break up the regular weather conditions on the continent the dates of dangerous storms become uncertain.

Indications, however, are that within a few days of August 6th and 19th the most severe storms of August will occur on the continent and the tropical hurricanes will be of greatest force on our Atlantic coast within a few days of the 20th. Near August 6th will also be a favorable date for several tropical storms.

He expects the greatest tropical hurricanes of the year to occur within a few days of September 15th. Mark the date and watch the reports. He cannot give the location except that its force will be felt along the southern coast of the United States.

CARELESS BICYCLE RIDING.—Miss Leora Thomas, of Coberg, aged about 20 years, was passing the corner of Eighth and Olive street, she was struck by a bicycle which came up Olive street at a high rate of speed and was knocked down and thrown eight or ten feet. She received several bruises, but luckily none of a serious nature. The young man riding the wheel was Mr. Rising, and he expressed his sorrow, but this did not help the lady. It was certainly a careless piece of work as a bystander informs us that the bell was not rung, nor was the machine slowed down when approaching the corner. Much careless riding is indulged in, and if continued, the council will have to prohibit all riding on the walks.

Marshal Day filed a charge in the City Recorder's court against said Charles Rising for running against the young lady with a bicycle, about 4 o'clock this afternoon. The penalty for said misdemeanor for the first offense is \$5.

Humphrey & Segar have a force at work packing plums today. On account of the slowness of this fruit in ripening the car will probably not leave before Monday.

The Value of Fir.

The value of the yellow fir for bridge timber, car sills and general construction work is no longer questioned. The Northern Pacific car shops use it not only for car sills, but for car finishing. All the new cars of the Northern Pacific are built at the Tacoma shops now, and of fir and spruce. The Pullman Company uses fir sleepers for its palace cars, and the Illinois Central, Chicago, Burlington & Quincy, and other railroad companies, have been using it for their cars for a year or two. The Northern Pacific made very careful tests of this fir timber for strength and durability at the time the Western divisions of the road were built, as it was a very important question of finding a timber on the coast for the hundreds of bridges or having to carry timber from the East. The test showed that the fir was as strong as oak and about one-third lighter, and that it was almost as durable. The smaller bridges along the Northern Pacific were built of fir and then other roads began to use it, until it has come to be recognized as the best bridge timber in the West, if not in the country.
