aged in his quest after wealth, even he has passed the 40 year limit and is a poor man. It is true that there a hope unless something or other has accumulated before the 40 year it is reached, but that something d not necessarily be money. The as of that wisdom which is acquired by by experience are often of greater he than mere dollars, even in the pait of wealth, but in order to make per use of what you have learned so win riches after 40 you must also re found out how to continue, and must have conserved your physical ental powers by right living. It's ifficult thing and requires the exerof every ability, this getting more an ordinary share of this world's is in the face of the fierce competin of today.

There are four other fortunes besides e's that stand out pre-eminent in rica because of their size and the t that each was made great almost and the possibility of dissipation by efforts of one man. These fortunes made by Jay Gould. Commodore erbilt, John Jacob Astor and John Rekefeller. Only the last named of It was an "organ," and Bennett was no men is now alive. He was well ted by 40, but he was not rich bead peradventure, since, although his ations before that time had been on large scale, he was yet liable to miss and go to the bottom of the financial at any time previous to his fortieth lay. His position, moreover, was at of a man who, in order to win, have faith in himself and his mion. In faith he was not found ting. He believed that the supply petroleum was practically inexhaustand he went ahead on that basis. ompanions in business sometimes red with him: but, encouraged by example, they all continued, and the has been the upbuilding of a rekable group of Standard Oil for-

into the river and harbor transportation business some time in the sixties. At AMATEUR SHERLOCK. 40 he was started in this line, but he was not rich. His wealth came later. Charles A. Dana, the rich and bril-

liant editor of the New York Sun, was a poor man at 40. After his college days he was an enthusiastic social reformer -who would think it now to read The Sun?-and as such became one of those who texanted the famous Brook Farm.

Then he was a writer for the managing editor of the New York Tribune, under Greeley, at the moderate wages of \$20 a week. When the civil war came, Mr. Dana was made assistant secretary of war by Stanton and detailed to duty much of the time in the field. After the

war he thought himself well qualified to conduct a newspaper and chose Chicago for its location, but the venture was so flat a failure that some men would have been clean discouraged. Dana was not. He went to New York and bought The Sun without money of his own. He was sure his plans, revised after his experiences in the west, where he had published an "organ," were good, and he sneceeded in making a few capitalists see the matter as he saw it. The result was as he expected.

James Gordon Bennett, the founder 30 and 40 when he started his paper, but it was years after that when he became rich. His life down to the day the was issued had been a succession of reverses. He had worked with a fierceness that knew no discouragement for wages a third class clerk of today would turn up his nose at, and he had saved every cent he possibly could. In 1832 he left

the New York Inquirer, on which he had been employed for some time, and, full of hope, started the New York Globe, but this venture failed, and for the same reason that Dana's Chicago paper failed, some thirty odd years later.

STUDYING HUMAN NATURE.

Novel and Valuable Scientific Work Now Being Carried on In Washington.

A new kind of scientific work is being carried on in Washington, in which the testing of 25,000 school children mentally, morally and physically is the preliminary step. Dr. Arthur McDonald is conducting the work under the auspices of the United States bureau of edneation, and the results when arranged and tabulated are expected to throw valuable light upon a number of mooted

For example, it is desired to know whether boys of the laboring class are less bright than the sons of the well to do. Are they as well nourished? In London not long ago investigation proved that the children of laboring people in that metropolis were better nourished-that is to say, weighed more at the same age-than those belonging to higher social strata, the latter being fed on too much candy and cake.

The work here being unfinished, conclusions cannot be stated. To begin with, the height and sitting height of each child were taken. Long bodied races, generally speaking, are inferior. through the plate and backing and fell It is desired to know if long bodied about 400 yards beyond, a performance individuals are less clever or less strong than the short bodied of the same race Are long bodied boys and girls apt to be stunid? Mr. Lehmann very strict with the employees who Murphy he left the latter hard at work come under his orders and rules the on his manuscript at his Lake Bluff bellhoys and porters with an iron hand. home,

The employees have come to understand One day last week he wired Murphy his ways, and it is needless to remark that he would meet him at the Great that his orders are usually obeyed with Northern at a certain time and read alacrity. A large stove heats the office over the altered play with him. The author was on hand at the appointed time, and so was the star. Together coal and saying in a peremptory man- they repaired to the reading room and ner, "Jimmy, go out and get a bucket set about their task. Mr. Murphy read quietly until his enthusiasm overcame One cold day last winter he called one him. Then he threw caution to the

winds and exclaimed: "My God, you have stolen my child!" folks, and then he edged uneasily toward the end of the table. "Tis false," roared Boyd. "I am no

kidnaper. "You lie!" exclaimed Murphy in

clerk appealingly, said, "Please, sir, lond tones, throwing the manuscript aside, and the man from Oregon started for the door, while a commercial man from Toledo leaned back in his chair to see it out.

> man to see what the trouble was. When he told the latter what was up, he apologized profusely and wanted to buy pop for the party. When Boyd plays in Oregon, the stranger will be in the andience.-Chicago Times.

ally tall. Tall people are most often strength are forthcoming, those already | long headed. Tall races are superior. The question naturally follows, Are long headed children superior mentally When it is said that a man has a long head, is there not significance in the remark?

Are tall children, then, superior? Nobody knows as yet. These are among the things which Dr. McDonald is trying to find out. In the classification the 8,000 negro children in Washington schools have been kept separate, so as to compare them with white children. How do they compare in respect to brightness, weight, physical measurements, etc.? The colored child surpasses the white child up to 5 years of age in mental development, then the white child goes ahead. Comparisons of girls with boys naturally follow. At the age of entering womanhood girls weigh more than boys. That age with city girls arrives a year earlier than with country girls -Boston Transcript.

The Name Aroused Her.

Mr. Rudolf Lehmann declares that he once found political animosity of great service to him in painting a portrait.

His sitter was a London lady who belonged to a family renowned for its stanch political opinions. It was the height of summer and very hot. The lady was inclined to be stont, and under "The Old Homestead" and who starred the influence of the heat she now and last season in a new play of his own then fell into a nap, to the serious annoyance of the painter.

Her husband, who knew her weakness in this regard, asked Mr. Lohmann in the lady's absence if he had experienced could not deny it.

"Very well," said the husband, "the next time it occurs you just mention Mr. Gladstone, and you will have no further difficulty."

The artist took the hint, with immediate effect. Henceforth the lady was almost too wide awake .-- Youth's Companion.

Sage and Gould Are Out.

Russell Sage and George Gould are said to have disagreed of late, and their relations in a business way are so severely strained that there may be an open A guest from Oregon, Ills., looked rupture at any moment. The Gould up from a letter he was writing to the and Sage interests have always been closely united. George Gould's wife and his sister Helen, seconded by the family physician, have, so runs the story, induced him to give up working as hard as he has been doing and to take life easier. The purchase of the Vigilant was in furtherance of this plan. Sage, whose whole being is wrapped up in money making, has no sympathy with this programme and is much The author and star had shifted to a displeased at young Gould's long abquiet love scene, when Landlord Eden sence in the present critical condition came in at the request of the Oregon of business affairs .--- Washington Post.

Not Sharp Euough.
