SAME OLD GAMES.

ARE PLAYING THOSE INVENTED DY THE ANCIENTS.

American Indians Played Baseball. ichet, Lawn Tennis, Chess and Checkrs Date From Away Back-Novelties In men Earely Catch On.

Pew of the hundreds of new games are insented every year become stor. They may be seen in any toy by the score-lawn games and mes, games of cards and games all, games for young and for old. are a melancholy sight, for not in will ever take the place of standbys of infancy and boy-Feen the names of most of them yer he heard of by the majority ican boys and girls. This is the f Instory. as an easy matter to invent a

The best games are so simple, the game was never yet in-Every one of them has grown, est of them have been growing eds of years. Scientific men deal all sorts of queer creatures vel on this earth-great lizards aga; sea monsters, half whale, and and thinoceroses larger than nts. All these have died away beothey were not fitted to live, while mule that were fit for life have non-growing better and better, till the horse, for instance-we could do without. It is just so with a. Those live that are fit to live, the rest die.

Our isst games form a sort of arismy. Their pedigrees run back to ancient times, and no modern upcan compete with them. Take ball and cricket, for instance, probby the most popular outdoor games of m times, the one in our own counthe other in England. They are ons, and their hold on Amerand English boys is in all probadue to the fact that they each unite strong lines of descent-that of the and ball games-to which tennis, se, hockey, croquet and, more disdy, billiards also belong, and that be goal games, such as tag, puss in amer, I spy and dozens of others. All the nations we know anything t had bat and ball games ages ago. dy invented the bat and ball. They up with our civilization from the e when little savages used to knock at a pubble or a fruit with a stick. with the goal games-they have alys been popular. Their name is still m. The goal part-that is, the ronng from base to base-is a much more ortant part of the game in baseball n it is in cricket, and for this reason nericans are justified in looking baseball as the better game, all er things being equal. To be sure, ther baseball nor cricket is the game was 300 years ago, but both have

wn, not changed. Any one who chooses may trace the th of cricket from the year 1300.

NO REALLY WILD HORSES. 111 Are Said to Be Descendants of Those

That Once Were Domesticated. Is there such a thing as the wild

horse, an aboriginal or truly wild horse, in the world now? The answer is more than doubtful. The mustang of Mexico, the wild horse of the South American pampas, the brumbi of Australia, all are descendants of the domesticated ani-

mals introduced from Europe. The first horse was landed in America at Buenos Ayres in 1587. In 1580-that is, in less than 50 years-horses had spread to regious as remote as Patagonia. In Australia the diffusion of horses that have escaped from civilization has been quite as rapid, and in 1875 it was found necessary to shoot as many as 7,000 wild borses in the colony of New South Wales

In some parts of Australia the horse pest has received legislative notice. The wild horses tempt domestic horses to join them, and wild stallions also invade the Australian horse runs and vitiate choice herds in a most annoying manuer. They recur to the ancestral manners in a way that is always the same. Each stallion has his following of mares, ranging from a few up to 40 and even 50, and these parties may be separate or banded together in herds of considerable size, even, it is said, 400 strong. The young and the weak mares

remain with a scanty or even no following. The stallion has to maintain his supremacy by frequent combats, which especially occur at certain seasons of the year. The animals are suspicious in the

extreme, swift in flight, but bold in defense with tooth and heel in emergency. They range extensively in search of pasture and water, and when hard pressed by danger and famine the herds break up. It is said that each troop has a leader and implicitly obeys him. He is the first to face danger and give the hint to fly. When pressed, the horses form a ring, with the mares and foals in the center, and defend themselves vigoronsly with their heels, or they close in on

their opponent in deuse masses and trample him to death. It is distinctly proved, then, that there can be no aboriginal or wild horse in either America or Australia, although there are tens of thousands of unknown horses. Tradition points to central Asia as the original abode of the horse, and may still possibly exist. Darwin's state-

ment that no aboriginal or truly wild horse is known to exist must still be ey came. held as explaining the exact position of this question. But we must supplement it by stating that it is not certain that truly wild horses do not exist, and, on the whole, conclude that the evidence is in favor of the existence of the wild cause." horse in central Asia, but that we have no ovidence as to his pedigree in relation to domestication. The wild horse of the British islands is now practically the Shetland pony, but he is not the powerful animal described by Casar. The domesticated animal everywhere,

however, reverts very easily to the savage state. The paces of a wild horse are ly it concerns i a walk and gallop. The double and the canter are artificial, and it is still a mooted question as to whether the wild horse ever trots .- Paper Rend Before the Bombay Historical Society.

THE BETTER PART.

There's a gray old church on a wind swept hil' Where three bent yew trees cower. The gypsy roses grow there still, And the thyme and St. John's gold flower. And the try me and St. John's good works The pale blue violets that love the shall Cling light round the thchen stone. And starlings chatter and gray owls talk In the belfry o' nights alone.

It's a thousand leagues and a thousand years From the brick built, gas if town To the church where the wild thyme hears The bees and the breeze of the down. time, and in his own good time he will come and deliver us. And I prayed every evening that our gracious Lord would permit me to see that day when The town is crowded and hard and rough. Let these fight in its press who will, But the little churchyard is quiet enough. And there's room in the churchyard still, -Pall Mall Endget

A GERMAN HEROINE.

[The following tale was taken from a local Holstein newspaper and translated by the eminent scholar, Max Muller, who says of it "that it came to him in a heap of other papers, fly sheets, pamphiets and books, but it shone like a diamond in a heap of rubbish, and, " Max Muller adds, "as the tale of 'The Old Woman of Sleswick-Holstein' it may help to give to many who have been unjust to the inhabitants of the duchles some truer idea of the stuff there is in that strong and stanch and sterling race. to which England owes its language, its best blood and its honored name."

KNOWLEDGE

Brings comfort and improvement and tends to personal enjoyment when rightly used. The many, who live beter than others and enjoy life more, with 'ess expenditure, by more promptly adapting the world's best products to the needs of physical being, will attest the value to health of the pure liquid asative principles embraced in the remedy, Syrup of Figs.

Its excellence is due to its presenting in the form most acceptable and pleasant to the taste, the refreshing and truly beneficial properties of a perfect laxative ; effectually cleansing the system, dispelling colds, headaches and fevers and permanently curing constipation. It has given satisfaction to millions and met with the approval of the medical profession, because it acts on the Kid-neys, Liver and Bowels without weakening them and it is perfectly free from every objectionable substance.

Syrup of Figs is for sale by all druggists in 50c and \$1 bottles, but it is man-ufactured by the California Fig Syrup Co. only, whose name is printed on every package, also the name, Syrup of Figs, and being well informed, you will not accept any substitute if offered.

"It must be remembered." said Miss victory to the women of the Lombards, the pills I had been for years a con-

a mere shadow of my former self and I had really come to think that the brightness and happiness of life was not meant for me. I had not the energy to perform even the most simple of my household duties, and, in a word I was completely 'run down.' I began

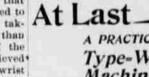

to take Dr. Williams' Pills while I was in this condition and before I had taken half a box of them I realized that they were doing me good. I be- in the public eye today. \$1; six for \$6. gan to feel lively again and to lose that

of as easy to trace the pedigree of ll, for, just as with a great many crican families, there is a break in record back in colonial times. It is own to have been played by the Inans. It is a thoroughly American me, and no one loves it less because ac people claim rounders as its austor and others reject the claim with

As for indoor games, we may prove ir nobility in just the same way. ss comes down to us from the anent Hindoos, by way of Persia. Checkis were played in Egypt, and then in were and Rome. Cards made their apnance in Europe in 1850, and the ucso say that they used them two turies earlier than this. Tenpins was tainly played in the thirtcenth cenry, and probably much earlier. All e have grown, but they have not nged their nature.

Lawn tennis is only an offshoot of the game of court tennis, said to have in brought into Gaul by Roman solers and still played. Again only a wth, not a new device. There is na-only a variation of the old pyrmid game of checkers. How about archesi? The pompous title, "A Royal ame of India." inscribed on the old archesi board, is often thought to have een only an advertising dodge, but it as quite true. Parchesi, called by the adoos pachisi, is widely played in intic countries, and the Spanish exrers even found the Aztecs playing it der the name of patolli in Mexico, hither it may have been carried across 10 Pacific.

These and many other instances are with thinking over deeply, for they h a lesson. If any one is tired of old games and wants something a le different, let him alter the old in direction of growth rather than try invent something quite different. The st successful inventors of games have lowed this rule. Indeed it is more in a rule. It is a law of nature. You tht as well try to please the human its with food made out of sand and dust as to force buy or man to get Syment out of a game that does not tain the old, well tried game elents -- New York World.

Words Which Rhyme Not.

The number of English words which e no thyme in the language is very Five or six thousand at least are at rhyme and consequently can be yed at the end of the verse only transposing the accent, coupling in with an imperfect consonance or trneting an artificial rhyme out of words. Among other words to ch there are no rhymes may be menand month, silver, liquid, spirit, mney, warmth, gulf, sylph, music, width, width, depth, honor, iron, echo.

Well Made Up.

"Come, dear, kiss my check and the it up," she said forgivingly. "I'll kiss it," he answered, "but I on't think it wants any more making up !"-Figaro.

A Sanson Pawned the Guillotine. The Sansons have a place in French history, not only because they continued so long to hold their odious office, but because two of their number, a father and son, held office during the evil days

of the reign of terror, when they were kept so busily engaged with their guillotine. The last of the Sanson dynasty was dismissed from his post in the reign of Louis Philippe, in 1847, under remarkable circumstances. Although he had inherited a comfortable fortune from his father, the executioner of the revolution, he got into pecuniary diffi-

culties and was guilty of pawning his guillotine, surely the most lugubrious pledge ever taken by mortal pawnbroker. An order came from the procurator general for the execution of a criminal, and the necessary apparatus was not forthcoming. The prison authorities had perforce to get it out of pawn, and the execution took place. But the last of the Sansons was informed that his services would no longer be required. What became of him afterward does not appear to be known.-London News.

Confined Sound.

The intensity of confined sound is finely illustrated at Causbrook castle, isle of Wight, where there is a well 200 feet deep and 12 feet in diameter. The well has 18 feet of water in it, and the entire interior from top to water is lined with smooth masonry. This lining so completely confines the sound that a pin dropped from the top can be heard

very plainly to strike the water, at a distance of 182 feet below. Another instance is cited from India, where workmen at the waterworks often talk with those at the reservoir, 18 miles away, their telephone being an 18 inch water main that is no longer used for conveying water .- St. Louis Republic.

A Year Clock,

Queen Victoria has one clock which the indolent must envy her, especially the man Matthew Mears, about whom the verses of the eight day clock were written. The timepiece of royalty is a fine example of Louis Seize work by the celebrated Lepante of Paris. The case is ebonized with ormolu mounts. The movement, which is in perfect order, requires winding but once a year.

Nothing occupies one like a conversation in which one has failed to say what one ought to have said. It haunts you like a melody of which you cannot find the end.

One of the simplest methods of gaining a disputative person's good will is to begin by doubting his indgment and then allowing oneself to be convinced.

ne how I got the mon mous novel. ey. Many a thought passed through my | story General Wallace had never visited | and sallow complexions, all forms of heart while I was counting that money. You would not ask me to tell you all? 'But you are kind gentlemen, and

you take much trouble for us poor people. So I'll tell you whence the money came. Yes, I have known want, food has been scarce with me many a day, and it will be so again as I grow older, but our gracious Lord watches over us. He has helped me to bear the troubles which he sent. He will never forsake me. My husband has been dead this many and many a year. I had one only son, and my John was a fine stout fellow, and he worked hard, and he would not leave his old mother. He made my home snng and comfortable.

'Then came the war with the Danes. All his friends joined the army, but the only son of a widow, you know, is free. So he remained at home, and no one said to him, 'Come along with us,' for they knew that he was a brave boy, and that it broke his very heart to stay behind, I knew it all, I watched him when the people talked of the war or when the schoolmaster brought the newspaper. Ah, how he turned pale and red, and how he looked away and thought his old mother did not see it! But he said nothing to me, and I said nothing to him. Gracious God, who

could have thought that it was so hard to drive our oppressors out of the land? "Then came the news from Frederica! That was a dreadful night. We sat in silence opposite each other. We knew what was in our hearts, and we hardly dared look at each other. Suddenly he rose and took my hand and said, 'Mother!' God be praised, I had strength in that moment. 'John,' I said, 'our time has come. Go, in God's name. I know how thou lovest me and what thou hast suffered. God knows what will become of me if I am left alone, but our Lord Jesus Christ will forsake neither thee nor me.

"John enlisted as a volunteer. The day of parting came. Ab, I am making a long story of it all! John stood before me in his new uniform. 'Mother,' he said, 'one request before we part-if it is to be.' 'John,' I said to him, 'I know what thou meanest. Oh, I shall weep. shall weep very much when I am done, bot my time will come, and we shall meet again in the day of our Lord, John, and the land shall be free, John; the land shall be free? "

Heavy tears stood in the poor old worinn's eyes as she repeated her sad tale,

but she soon collected herself and continued: "I did not think then it would be so hard. The heart always hopes even against hope. But for all that, and here the old woman drew herself up and looked at us like a queen, "1 have never regretted that I hade him

Then came dreadful days, but the go. most dreadful of all was when we read that the Germans had betrayed the land, and that they had given up our land, with all our dead, to the Danes! Then I called on the Lord and said: 'O Lord, my God, how is that possible? Why lettest thou the wicked triumph and allowest the just to perish?"

At the time 1 the Holy Land, and under the circumshort of marvelons. All the information

of other authors. A large map was before him as he wrote, and he constantly had to draw on his imagination, but in this respect he was always fortunate and never made a blunder in his descrip tions. In fact, the Palestine of "Ben Hur" is generally regarded as authori tative, and General Wallace relates with keen relish how a younger author wrote a story, the scene of which was laid in the Holy Land, and stole all his descrip-

tions bodily from "Ben-Hur." General Wallace says that his hardest task in writing the book was to find a hero His favorite passage in the story is the scene of Ben-Hur's house, where he de scribes the miracles of Christ. General Wallace believes that more art is displayed in this passage than even in the famous chariot race, which is generally regarded as the strongest passage of the book.

The Chignon, 1771.

I had my heddus roll on. Aunt Storer said it ought to made less. Aunt Deming said it ought not to be made at all. It makes my head itch and ache and burn like anything, mamma. This famous roll is not made wholly of a red cow tail, but is a mixture of that and horsehair (very coarse) and a little human hair of yellow hue, that, I suppose, was taken out of the back part of an old wig. Nothing renders a young person more amiable than virtue and modesty without the help of false hair, red cow tail and D---- (the barber).-"Diary of Anna Green Winslow," Alice Mono Enrle

Newfoundland.

Not only have her mother and sisters been unkind, but even the elements of nature have been spiteful to Newfoundland. A fog worse than the London veil continually frowns upon her shores. The fiercest storms of the continent buffet her. Sinister icebergs hover about her harbors and threaten her fishing craft Frequent conflagrations make havor with her antique, combustible buildings, making her poverty still more grinding. Though Newfoundland is bigger than Ireland and nearly as large as all New England, very little of her territory is of use to her. The interior is either marshy or rocky, and the difficulty of building roads through such a country keeps back agriculture. Untold mineral riches, however, are believed to be awaiting development, and her untouclfed beds of peat are sufficient to supply with good fuel many times the population of the colony.

The cod is the great bulwark of provincial prosperity. The seal comes next, for Bering sea is not the only home of this animal. The fish industry is so predominant that the pedestrian on the sidewalks of the coast towns passes under an endless arbor of drying fish .-Boston Transcript.
