ABRUPT CONAN DOYLE.

The English Novelist's Queer Antics In a Massachusetta Town.

Dr. Doyle, the story runs, was engaged to lecture in Morristown under the anspices of St. Bartholomew's school. and the 25 boys of the school were in a and Traps to Care For-Imita- quiver of excitement at the prospect of seeing and meeting the creator of Shorlock Holmes. The head muster, the Rev. F. E. Edwards, with the most an orchestra could not | hospitable intentious, invited Dr. Doyle ith the times in the product to dinner before the lecture, inviting also at the same time Mr. and Mrs. Frank Stockton, great friends of the elergyman. Dr. Doyle declined the invitation, to the great regret indeed of the host, the two guests and four or five boys that had been specially favored by being asked to meet the big author. At many theater orchestras the dinner hour, however, to the suron a number of instruments prise of Mr. Edwards, he received a es are probably unknown to telephone message from Dr. Doyle at every 100 members of the and the station, announcing: "I'm here. What shall I do?"

"Why, we didn't expect you, but do come right over. We just sat down to

Swinging along, the Englishman soon appeared, but despite diplomatic conxman beings; others are emising could not be prevailed upon to enter reproducing the "language of the dining room. He wouldn't, he said,

Although assured that only Mr. and Mrs. Stockton and four boys were presmor of these adjuncts of ent, that the dinner was very informal, ra has made a remarkable in- he still remained obdurate.

"Can't I eat my dinner alone?" he asked bluntly.

So he ate his dinner alone, devouring usists of a semicylinder of several plates of roast beef and frequent bout a yard in length. Two relays of vegetables with lightning ranidity. Unknown to any one in the house, the brawny Englishman soon fled and was next seen in the lecture hall of the school. A large audience was prespeculiar noise of the engine cnt, and every courtesy was extended to

> After the lecture, with insulting haste, Dr. Doyle pocketed the \$300 fee and hastened to the train. The only person, in fact, that met the distinguished British author was Mr. Stockton, and as the author of "Rudder Grange introduced the lecturer the latter couldn't very well avoid meeting him. But the 25 boys were sailly disappointed at not shaking hands with the hero of their imaginings. The whole proceeding of the talented author was, in fact, so foreign to what has been reported of him by men and papers that Morristown's Four Hundred are wondering whether Dr. Doyle could possibly have thought the town a juy place, and that he therefore dreaded meeting bucolic enthusiasts.-Boston Beacon.

SENSITIVE MODELS.

Publication of "Trilby" Causes Some to Resign From the Profession.

Women models have always been a Bittle sensitive about their profession, says a writer in the Boston Herald, and since "Trilby" has been the favorite topic of studio gessip some of the best of them have felt that sensitiveness increase and have declined to pose for the was a book, inkstand or box of letters, nude. Child models who have been in bax is revolved, the peas the profession since before they could walk have been forbidden to enter studies, while women who have supported their families by posing have refused to mount the model stand.

Miss Arabella Gold, who is known as a famous figure model to the best New York artists, has recently sent in a publie resignation from the profession. She wrote to one of the leading New York papers requesting that it publish the fact that she would never again pose for the figure. Miss Gold's resignation is a decided loss to the artists, She is said to have one of the most exquisitely formed figures in the world. Of late she has been posing for a number of Sarony's living pictures. In one of the most celebrated of these she repre sents an almost perfect facsimile of the

famous painting, "Psyche." Many models whose forms have heretofore been prominent features in the portrait exhibitions declare that they, too, will renounce the business entirely. It is not that they object to posing nude, they claim, but the notoriety which embarrasses their profession has become intolerable since the publication.

The majority of models interviewed have not read the book, but claim that Trilby, whoever she was, has seriously degraded the profession. Some spoke of her as a New York model guilty of some despicable crime. Others believed her to be a reformer.

OVERRUN WITH MICE.

A Most Remarkable State of Affairs In the Province of Kharkoff, Russia.

One of the most unpleasant places in this world to live in just at present, according to Russian papers, is the prov ince of Kharkov, in the land of the czar. The country is now overrun with mice-millions of mice. The cats have become so accustomed to the sight of the little animals that they no longer catch them or even play with them. They are said to be a greater pest than the rabbits were in Australia a few years ago. Provisions for the table, candles, soap, books, shoes-everything, in fact, is eaten up by the animal in the nighttime. The furniture even is not spared. Sleep for many of the poor inhabitants has become almost impossi-All of them virtually have been obliged to place their bods in the middle of the rooms. Some of them even have been forced to sleep with their feet in basins of water, the Russians of that district believing that mice will not touch a person so sleeping. If these precantions are not followed, the mice dance a genuine "saraband" on the recombent figures and on the bed and

even bite the sleepers. Almost all the wheat has been destrayed. A number of wealthy women -handed proprietors-have been obliged to abandon their homes and have gone to St. Petersburg to get away from the

ourge, for such it has become. In the fields the mice are so numerons that men kill 200 or 200 in five to

The girls whose games she does not share Unkind opinionshandy. She's made of china, some declare, And some of sugar candy.

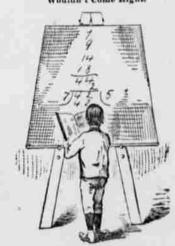

Dear little heart! Should she confess,
She's semetimes rather lonely,
This very pink of perfectness,

Helen Gray Cone in St. Nicholas.

"There is a science in doing little things just right," said a down town business man a few days ago, "and I notice it in my office. I had two office boys there whose main duty it was to bring me notes or cards that were sent in to use. One of those boys, whenever I sent him for a book or anything heavy, would walk rapidly by my desk and toss it indefinitely toward me. If it happened to miss me and land on the desk, it was all right. If it fell on the floor, the boy always managed to fall over it in his eagerness to pick it up. Then if he had a letter or a card to deliver he would come close up to the desk and stand there scanning it over with minute care. This being concluded, he would flaunt it airily in my direction and depart.

"The other boy always came and went of the desk. Letters and cards were always laid-not tossed-right where my eye would fall on them directly. If there was any doubt in his mind about whether he ought to lay a letter on my desk or deliver it to some other person in the office, he always did his thinking before he came near me and did not stand annoyingly at my elbow studying the letter. That boy understood the science of little things. When New Year's came, he got \$10. The other boy got fired."-New York Sun.

Wouldn't Come Right.

I wish the feller wot writes schoolbooks wouldn't guess at the answers to questions in the 'rithmetic. I've done this example four times now, but I can't get the answer that's in the book. The book's wrong.

Pictures With Paper and Paste.

Marian is a little girl who likes to make pictures. Sometimes she makes them with a pencil, and sometimes she makes them by sewing with bright colored zepbyrs on dainty white cards. Mamma gave ber a package of these

pretty colored circles on her birthday, and ever since then she has been very happy in working with them. Mamma often makes stories for the

pictures, and here is one of them: Oh, Tabby, Tabby, sleek and fat! You seem a very solerm cat, As on the round mat in the sun You sit and blink at every one.

Your coat is thick, so run and play.
'Twill keep you warm this winter's day.
And then we hear her saft "Purt, purt."
As off she gree, all dressed in fur.
—Emma G. Saulsbury in Child Garden.

TOO MUCH FOR HIM.

The Book Agent Sadly Discovered That

He Had Tackled the Wrong Mus. A young man, with a large book under his arm and a 7 by 0 smile on his the spinal column. It is such a plain show mug, stuck his head into the ticket window at the Union depot and asked the It is seen every day when lumbago takes clerk what the fare was to San Antonio. a good hold on a stitch in the back. There "Ten dollars and fifteen cents," replied the ticket slinger.

"I am pining to leave Galveston, but I lack just \$10 of the ticket money. However, that shan't part us. I'll make a partial cash payment of 13 cents and take the rest out in trade."

What do you mean by taking it out

in trade? "I am a book agent, and if you will let me have the ticket I won't try to sell you a book. I won't say book to you once. This is the most liberal and advantageous offer ever made to the public, and you ought to take advantage of it. I have been known to talk a man so completely out of his senses in 15 minutes that he wasn't even fit to send to the legislature afterward." "What book have you got?" asked

the ticket agent. A beaming smile came over the back agent's face, and in a singsong voice

"I am offering, in 17 volumes, 'Dr Whiffletree's Observations In Pales tine, a book that should be in every family, a book that comprises the views of the intelligent doctor on what he saw in the Holy Land, with numerous spec ulations and theories on what he did not see, altogether forming a complete library of deep research, pure theology and chaste imagery. I am now offering this invaluable encyclopedia for the unprecedented low price or an a volume, which is really giving it away for noth-

After the book agent had kept this up for about ten minutes be began to grow discouraged. Instead of showing signs of weakening, the ticket agent. with an eestatic smile on his face, begged the eloquent man to keep on.

The book agent stopped to rest his jaw, when the ticket man reached out his hand and said:

"Shake, ole fel! Come inside and take chair and sing that all over again That cheers me up like a cocktail, 1 used to be a book agent myself before I reformed and went into the railroad business, and that is like music to me. It soothes me all over. It calls back hallowed memories of the past and makes me want to go out on the road again. I would rather pay \$20 than have you leave Galveston. You must come around every day. I could listen to that all day and cry for more. "

The book agent shut his book and "Some infernal hyena has given me away, but there is another railroad that I can get out of this one herse town on. I'll not consent to travel on any road that doesn't employ gentlemen who can treat a cash customer with common politeness. You can't capture my book on me or to fetch things that I wanted to any terms, and if you will come out of your cage I'll punch your head in less time than you can punch a ticket." And he passed out like a beautiful dream .-

PENALTY FOR PRIVATE USE.

Galveston News.

The Surprising Dilemma of an Illinois Congressman's Constituent.

An Illinois congressman is now go ing about the corridors of the capitol wondering what is going to happen to one of his constituents. Last spring he was requested by the said constituent to exercise in his behalf one of the functions of a statesman-to wit, to send him some garden seed from the depart ment of agriculture. The member has tened to comply, and a contingent of seed was at once dispatched to the Illinois man. They went, of course, in a government envelope or envelopes by mail, with the usual legend, "\$300 pen alty for private use."

In due course the congressman, to show his interest in the welfare of his constituent, wrote to him asking if the grown all right. The constituent replied that they had been planted and had come up finely, "but," said he in tis letter, "what shall I do with the stuff I have raised? I notice there is a penalty of \$300 for private use, so I don't like to take any chances."

This was a construction put upon it which the congressman had not before thought of, and the more he thought of it the more he wondered what would happen to that constituent in Illinois, and he is still wondering .- Washington Letter.

The Ball Nozzle.

According to Chief Bonner, the ball nozzle which has excited so much interest throughout the country is destined to work a radical and highly beneficial change in the system of fighting fire. Instead of working at a distance with straight streams, firemen, by using the ball nozzle, can enter burning buildings and work at close range, thus not only doing more effective work, but averting to a considerable extent the serious dam age to interior property, and in many cases this system will enable firemen to save the lives of inmates of burning buildings. The man who has given the world an appliance of such value is cer tainly entitled to the gratitude of his fellow men -- New York Tribune

Target Practice In Texas. "We have 15,010 mutilated and worn silver dollars in our vault," said a sub-treasury official. "We also have over 500,000 half dollar, quarter and dime pieces, which have become too thin for use. It is a curious thing that the mutilated dollars which we receive from Texas are deeply indented. This is a result of the target practice in Texas. The crack shots down there think that a silver dollar is the best kind of a mark Do we give a good dollar for a mutilated one? That depends upon the extent of the mutilation. We have a discretionary power in this respect. "-Exchange.

A Dumas Anecdote.
