men 30 years younger, his intellect is as strong as ever, and the clear apprehension, the sterling character that made him an important figure in Congress and in the Presidential Cabinet during vital periods of the nation's history, manifest themselves powerfully when he is called upon to express his sentiments on questions of the day.

Brought up in the vicinity of such men as Jefferson, Madison and Monroe, the associate of Adams, Jackson, Webster, Clay and Calhoun, the intimate friend of later statesmen and orators, his memories embrace the most interesting phases of national politics, and all clear as cameos. Other men in various positions in public life have accumulated millions of dollars. Col. Thompson is far from being wealthy, as rich men are rated, and the competency he enjoys was derived from sources wholy separate from politics.

The venerable ex-Secretary of the Navy was born near Culpeper, Va., in 1809, of ingrained American stock, and throughout his life his habits of thought, his hospitality, his culture and his courtly ways have been those of the educated, well-bred Southerner, Twenty-one years later, at the Christmas season, he left for the West and settled at Bedford, Ind., as a young lawyer. In 1842 he came to Terre Haute, and a brilliant career opened up for him. A term in the State Legislature had been followed by one as State Sen-ator, and he was now in Congress. He was returned in 1848, then appointed Circuit Judge, and from that event until he was handed the naval portfolio by President Hayes was nearly all the time serving the people in a judicial capacity. When the conductor collected the fares, Mr. Field announced in audible tones, as he gave him a dime, at the

All eyes were turned to her, and her pretty face took a most becoming rose color, but back of the reproving glance she threw at him was one of mingled indulgence, appreciation and mirth at the unexpected and apparently truthful announcement

The herd, with the same instinct uppermost in the pony, turns tall to the storm and drifts with it. The bodies of those on the outer side of the herd are soon coated thick with snow and there is a constant struggle for a place near the center of the bunch, where the surrounding animals impart warmth and serve to break the powerful force of the wind.
