The ancient idea of flushing the sew-The anticutes of city streets with sea Indian Raid on Negates, Sonora Troops Land-Grant Railroads Most Carry water is being vigorously discussed in many places. In England it has come into such favor that a proposition is now put forward to supply the city of London with sea water. The water would be taken from the sea at a spot not far from Brighton remarkably free from pollution. It would be pumped into a reservoir of 10,000,000 gallons. Thence it would be forced into another reservoir, from which it would gravitate to London. The present consumption of water in London is 200,000,000 gallens a day, of which 40,000,000 gallons is used for municipal purposes. This might be saved for domestic purposes by the introduction of sea water. the cost of the project is put at \$2,250. 600, and the sea water would be supplied by meter for public purposes at a fraction of the present cost of fresh waper. One watering of the streets with sea water is said to be equal to two, or even three, with fresh water. It prevents the decomposition of street refuse, it is effective for flushing sewers, and particularly valuable for the extinction of fire. Of its value to health there is no doubt, and it would be easy to supply it to hospitals and to schools for swimming baths.

## Vegetable Properties.

tigating the properties of the different vegetables announces that a diet of carrots ameliorates harshness of character and reduces nervous irritability. Peas create fatty tissue and encourage joyousness, while turnips have just the opposite effect. Celery taken in excess causes eye trouble, while cabbage is beneficial in pulmonary ailments, and lettuce aids as a sedative owing to the opium contained in its milky juice, which keeps the skin clear and fresh, Red beets are blood producing and will add plumpness to the thinnest form, another attack. providing they are boiled tender. - New York Journal.

Liberty, Equality and Frateroity.

Liberty is of no value in itself, but is valuable only as a means to equality, and equality that did not eventuate in fraternity would perish. Equality will enlarge itself to the bonds of humanity as fast as people learn that in likeness there is the only rest and comfort and pleasure that men can know, and fraternity will come as a result of the same conviction .- W. D. Howells in Century.

IMPORTANT DECISION.

Los Angeles, Aug. 13.-Judge Welclock this morning the citizens of born this morning handed down a de-Mexican government in the interest of years there has been a dispute between the government-aided or land grant As the result of the attack seven in- roads and the government as to the rate dividual shippers or travelers, while Intense excitement prevails on both congress has frequently provided that sides of the line and business is almost the compensation should not exceed highly respected, brave and efficient figures to be fixed by the secretary of

Under these acts of congress, only been organized to follow the escaping half rates have been paid by the government, and the roads, desiring to have them settled, brought a test case under the court of claims act, the At-It may be well to mention that an the Indians. Ponciano Sanchez, chief lantic & Pacific railroad being plaineminent physician who has been inves- of police of Nogales, Sonora; Juan tiff, to recover full fare for transporta-Fernandez, whose brother was killed tion on the 30th and 31st days of October, 1893, of a trooper, one Phillip Barrett, from Albuquerque, N. M., to Prescott Junction, Ariz., a distance of 428 miles. The regular fare for the trip is \$25.70. The government offered \$13.23. The railroad refused to accept the amount, and brought suit for the full amount. The railroad-the Atlantic & Pacific-was represented by Judge Stacey, its chief attorney, assisted by Mr. Herrin, of the Southern Pacific. The United States was represented by Joseph H. Call, special United States attorney.

> The importance of the case was such that it was very thoroughly and exhaustively argued at the January term, full testimony taken and exhaustive briefs submitted. The decision of Judge Welborn is very voluminous, and enters fully into the discussion of the subject. It is a complete victory for the government. The judge holds, in substance, that congress has the right to fix the compensation for this class of work, provided that the rates do not property. The full importance of this decision is easier understood when it is

The decision is not applicable to the government.

A DEPARTMENT PREPARED FOR OUR RURAL FRIENDS.

Advantage of Wide Tires on Wagons Effect of Detasseling Corn-To Exterminate Vermin from Chickens-Cheap Sheds for Emergencies.

Wagon Tires. The wide tire law of Connecticut went into effect with the beginning of the month, and there is likely to be trouble over it, for wagon makers are going on building vehicles with as narrow tires as ever, and a good many ple seem not to have heard of this new law. There should, of course, be a certain degree of latitude in the matter of replacing wheels which, in the case of some of the poorer farmers, represents a considerable outlay, but it should at least be distinctly understood at a standstill. The dead guards were half of the regular rate, the exact that anyone who buys a new wagon which does not conform to the statute does so at his own risk.

It is an eminently wise and reasonable law-the only wonder is that people have to be forced by legal measures into doing what is obviously to their own interest. No other single element, except ignorant roadmaking, adds so much to the heavy burden of supporting the highways as the use of narrow tires, which cut up the roads instead of ironing them smoothly down. Look at the beautiful glossy path which the bleyclists make for themselves at the edge of the road before the puddles are fairly dried up, and then at the bottomss abysses plowed by the loaded wagons and you have the whole thing in a nutshell. The horses' hoofs, of course, chop up the road somewhat, but it is mere surface irritation compared with the deep and fatal wounds made by the grain drills are allowed to stand exnarrow-tired wheels when once a rut is started.

of the front wheels, so as not to follow in the same path, and the surface will as rollers, and instead of cutting up the roads they make them better.

Fine philosophy we have, to be sure. We fax ourselves poor to keep steam ery worn out before its time. Here is rollers at work on our highways and one of the leaks that the wise farmer within eight days before an election is then carefully select wagons which will does not allow to go unchecked. undo the work of the roller as quickly as possible.-New England Farmer.

Effect of Detasseling Corn. At various times it has been thought that the removal of the tassel of the corn plant would result in a larger yield. This was based on the admitted used in the development of the flower every eleven pounds of dry food conand the production of pollen. A number of tests were made to determine the and the pig a pound for every four and facts in the case. Of course it was nec- a half pounds. This gain is accounted essary to allow enough pollen to be for by his immense digestive capacity. produced to fertilize the silks. In most of the tests, therefore, the tassels were removed from every alternate rowizens of New York did he speak in the land-grant roads alone, but applies to pulled out as soon as they appeared or three rows were detasseled and one left untouched.

At the Cornell station detasseled corn produced a slightly greater yield during more orders for good butter than you the first two years, but the third year can fill. But if such does not happen, who presided over the meeting, and will therefore be seen that it is one of there was practically no benefit.
