"The use of 'Castoria' is so universal and its merits so well known that it seems a work of supererogation to endorse it. Few are the intelligent families who do not keep Castoria within easy reach."

CARLTON MARTIN, D.D., New York City.

THE CASTORIA COMPANY, 77 MURRAY STREET, NEW YORK CITY.

## SILVER'S EARLY CHAMPION.

The following is the editorial published in the Courier-Journal of Aug 10, 1886:

"The Courier Journal has been devoting a large amount of space, week after week, to the discussion of the silver situation and its relations to the interest of the United States. Most papers of the United States have taken but little notice of the matter, many do not refer to it at all, and no other daily paper except the Courier-Journal in any part of the Union is treating it with any degree of that earnestness and persistence which would imply that it is recognized by leading minds as a question of immediate and intense practical significance to the welfare of all classes of citizens. Such is the magnitude of the question, and such its practical bearing upon the interests of all men, and we find the whole American press ignore it."

The Courier-Journal lays down the following propositions:

"First—That the demonetization of silver, which has prevailed for some years up to this writing, both in the United States and Europe, has had the effect of advancing the value of gold about 40 per cent.

"Second—That this has been accomplished by depressing the value of all other property to that extent.

"Third—That about 40 per cent of the property and producing resources of the people have thus been transferred to a comparatively small class of men, whose stock in trade is gold investments.

"Fourth—That in the exact proportion, as gold has risen, the burden of debt and taxation has increased; and that in proportion as property and labor have declined, the capacity of the people to pay their debts and taxes have diminished.

"Fifth—That the silver discount is creating a bonus of more than 30 per cent in favor of the farm production of India and Asia, which to that extent cheapens the wheat, cotton and various other productions of the United States.

"Sixth—That these lamentable conditions have been produced by anti-silver legislation.

"Seventh—That they can be undone and prosperity restored by pro silver men.

"Now here are seven propositions either of which, if true, certainly proves the silver situation is a matter of intense and universal importance. If so, why is not the matter forced upon the public attention day after day by all the newspapers of the land, which are not owned body and breeches by the money kings or the gold conspiracy? If they, or either of them, are not true, why do they not prove it, and put the question at rest, for all?

If any newspaper in New York, Boston or Chicago, or Philadelphia, or St Louis, or Cincinnati, or New Orleans, can successfully controvert either of these propositions, it will render the public valuable service by doing so at once. If they cannot controvert either of these propositions, they are obviously conniving at a gigantic fraud and wrong which cannot possibly co-exist with any degree of prosperity. If any or all of these propositions are true, the honest journalists, with a capacity to understand the principles involved, cannot consistently abstain from giving them the greatest publicity possible.

"We challenge the editors of any of the papers named, to point out a single flaw or error in any proposition of the seven, and if this cannot be done, we ask in the name of the people what interests they are serving and what consideration, in kind and amount, they are receiving at the iniquity? It will be worth a great deal to the country if these papers will prove all the propositions stated are either true or false. The public should not be content until the public press is awakened to the sense of its public duties, to its dependency on public support, and to its betrayal or ignoring of its ostensible office—public adviser-in-chief."

Bob Ingols expressing himself on the coinage law of 1873, and the present situation said: "For my part I do not ask any interference on the part of the government except to undo the wrong it has done. I do not ask that money be made out of nothing. I do not ask for prosperity born of paper, but I do ask for the remonetization of silver. Silver was demonetized by fraud. It was an imposition upon every solvent man, a fraud upon every honest debtor in the United States. It assassinated labor. It was done in the interest of avarice and greed, and should be undone by honest men."

MONTHLY MEETING.—The A.P.S.C. of the Christian church held its regular monthly business meeting at the home of Miss Idia Stevenson last evening, some one having an itching palm for what did not belong to them, abstracted from Jerry Wilson's safe about twenty dollars and escaped undetected from the place, though the proprietor, an assistant and half a dozen or more customers were present at the time. The struggling up to a lamp post of three or four of these sneak thieves, if caught would have a salutary effect on the remainder of the gang that mightly prowl about Roseburg. But unfortunately catching comes before hanging.... Ad Harman of the Senate Saloon had a gold watch stolen from his vest pocket lying up behind his counter. A suitable reward will be given for the return of the property or arrest of the thief."

The editor of the Astoria Herald is ungalant. Here is how he acknowledged the receipt of a favor from the ladies: "We tender our thanks to the Ladies' Aid Society of Warrenton for a loaf of home made bread they sent us this week. "There, Frederika," she said, "are the four pounds of meat—but where is the cat?"

Our society reporter in writing up a church social, remarks an exchange, says that everything "passed off peacefully." Now we trust our Eastern readers will not infer that we usually have a rip-roaring time with a few scrapping matches thrown in on the side, at our social gatherings, but that a "peaceable" time is so rare that the local papers mention it as a morsel of news. As a matter fact we don't have anything but a peaceable time at our socials and it is not necessary to collect for the lemonade with a six-shooter, as some evil-minded Easterner might suppose.

Roseburg Plaindealer: A genuine bill who gave his name as Edwards has been bilking the people of Roseburg. He posed here as a palmist, astrologer, clairvoyant and necromancer. He was like Paul, all things to all men that by all means he might get two-tops "with which to get his whiskey for which he had a greater liking than he did for honesty. He was last seen on his way toward Coos Bay. Look out for him, everybody. He is no good. We ask our exchanges to give warning of this unprincipled bill, for he is an adept in the business.
