Albany Democrat: A man named Hilgans, a life-long republican, after hearing Mitchell at Eugene, declared for Bryan, and there is some talk of his speaking for him. Senator Mitchell has done good work for Bryan in Oregon.

Albany Democrat: President Miller, of the O. A. C. is attending strictly to business. He has started for a tour of a number of Oregon cities with a stereopticon. The views to be presented all relate to the O. A. C. and its work.

Ashtland Record: As an evidence that McKinley will win the papers are posted in Ashtland for a week or two past, has not been taken yet. When this gets to Portland all the thousands in the state will declare Jackson county for the British, and of Jackson county there is anything like that amount to spare for that purpose. The fact that can propose \$1000 had it to \$50,000. If it is found that it is wanted \$50,000 would sound better.

Cottage Grove Moderator: M. D. Rochford a mining engineer of extensive experience arrived here Sunday after two weeks visit and inspection of the Bohemia district. Mr. Rochford is here in the interest of large capitalists with a view of investigating, and his visit is of considerable significance, especially in view of the fact that Mr. Rochford, who is well known and ably impressed with the prospects and conditions of the country. It is intention to return soon, and there is likely to become interesting developments.

Russia's Wheat Crop.

The official organ of trade and industry, says a St. Petersburg dispatch to the London Times, gives the following account of the crops down to the middle of August. The wheat from autumn seed has now for the most part been gathered in, and there can be no longer any doubt as to the poor quality of the harvest. The unsatisfactory harvest of spring-sown wheat is also a matter of concern. The crops of autumn-sown corn a slight exception being observed only in the north province of Taurida, along the coast of the Sea of Azof. In the basin of the Don and the greater part of the black-soil region the yield for spring-sown wheat is below the average. In the Crimea it is only middling, in the Caucasus very unequal, and in general less satisfactory than the yield from autumn-sown wheat.

GUN ACCIDENT—IRA JOHNSON.

A young man, aged about 20 years, met with a gun accident while out hunting on the Ingham farm near town yesterday which caused him to lose a toe. The young man placed the muzzle of the gun on his right foot when it in some manner was discharged. The charge, a load of shot passed through the foot, tearing away the middle toe and mangling others. He came into town about 1 o'clock yesterday afternoon and Dr. Kuykendall amputated the middle toe. It is thought the others can be saved.

THE BLUE RIVER MINES.

An Interesting Letter—Developing Work Rapidly Going On.

BLUE RIVER, Sept 27, 1896. EDITOR TIMES.—Thinking that it might be of interest to you and your readers, I will try and give you a small "dose" this evening concerning the development of the Lucky Boy mine and other happenings of this camp. The Lucky Boy is the only claim I have been on this fall, so I will confine myself principally to it. We have a crew of 38 men at work at the present time, including the cook—and he is the mainstay in the whole business. There are seven men working on the night shift, some are tunneling and some are sinking shafts. The shaft is about 500 feet from the tunnel, and they intend to connect them and use the shaft for an air shaft. The miners have already run their tunnel in about 100 feet on the outside of the hanging wall. They did this as it was much easier worked.

On the 25th just 5 practical miners arrived from Grass Valley, Cal., and they are at work on the cross-cut to the west, where the ledge lies. We are rushing the work "on top" as fast as possible as we fear that stormy weather will set in. We have now 4 new buildings up and another under way. The architect of these buildings is DeWitt Roberts, and they are all well constructed. We have a first-class assayer here and a neat little office fitted up for him. He does considerable assaying on the Lucky Boy claim, but how the assays run I am unable to state, as that is a private business of his and the company's. There are two young men cutting wood for the stoves, some men getting out tunnel timbers and others doing one thing and another. Our foreman Mr. White, keeps the wheels turning in good shape. They have a track laid in the tunnel and have a car which holds 1,000 rounds. The second load that was run out Jack-the-Ripper led the car go over the dump about 20 feet. They tied a rope to it and by calling "come boys," no quicker said than done, the car was landed on the track right side up with care.

The boys all appear to enjoy themselves. Morley Keeney and Mason Croft have been hauling material for the buildings, while Gid Foust and Perry Abrams are getting out the timbers. Mason and Morley say that while they only work 10 hours a day here they would rather put in 16 hours at some other kind of work. They had the building material on their shoulders, and one day they acted as pack-horses. B. F. Childs is working on the night shift and "whippers" at 3 o'clock in the morning when going to bed. Mr. Sparks' two boys are busy packing in supplies, tools and other things which are needed.

I must say that Lucky Boy City has more life than several of the little towns, viz—Brownsville, Crawfordville, Halsey or Rowland. Messrs. McCreary, Beckener, Dyson, Standish and Moore have a fine prospect on a claim lying west of the Lucky Boy about three-fourths of a mile, on which Mr. Dyson and Standish, will commence development work again when they return. There are several other claims in the camp which show up well, and I think next summer will tell the tale of this camp.

This is about all the news of this camp at present. I am the cook of the camp at present, and haven't much time, not even to sing "How Tedious and Tasteless the Hours," for it takes me from 4 o'clock in the morning until after 7 o'clock at night to do my work, and I never could sing and work at the same time.

J. W. MOORE.

The following cases came up for hearing: Chas. H. Dodd & Co vs G. Warren and P. J. Jennings; to recover money. Dismissed at the plaintiff's cost. W. H. Davidson vs E. Smith and L. M. McIntire; to recover money. The following jury was drawn: A. Brown, E. R. Frank, W. M. Goodman, Frank Heyer, J. J. Elwood and C. P. Carson. Verdict for plaintiff for \$300.25.

A O U W.

In the matter of S. A. Huddleston, administratrix, appellant, vs the city of Eugene, et al., respondent, it was ordered that appellant have 20 days from October 5 to file transcript and abstract, and 40 days to serve and file brief. Respondent was given 60 days to serve and file brief. An opinion in this case will determine six others against the defendants, and orders as above were made in each.

TWO ENGINES CRASH TOGETHER.

A Conductor's Mistake Costs Two Men Their Lives, While Two More Are Badly Maimed.

Daily Guard, October 6.
The engine belonging to the Southern Pacific southbound San Francisco overland train No. 16, and a special engine crashed into each other between Roseburg and Green's station this morning. Two men were killed and two more wounded. The killed are Fireman McGonegle and Drakemans Top. The wounded are Fireman H. E. Happersett, both legs broken, and Engineer Porter, one leg broken. Others were wounded more or less.

Particulars are meagre, but from what can be learned it would seem that the wreck and loss of life is due to a conductor's mistake.
The heavy San Francisco overland train left Roseburg at 4:25 this morning on time, in charge of Conductor Wald. Roseburg forms the end of a division and when conductor Tynan of this division surrendered the train to Conductor Wald, he forgot to transfer the tickets to him. When well out of the station Conductor Wald discovered that he did not have the tickets, and as there was no other train due for some time, he decided to sidetrack his train at Green's station, three and one-half miles south of Roseburg, and run back with his engine for the tickets. To do this he must run back without orders, which under any and all circumstances is strictly against the rules of the company, but he concluded to risk it. As there is no telegraph office at Greens he could not communicate with Roseburg by wire.

In the meanwhile a special engine was started out of Roseburg with orders to overtake No. 16 and deliver the tickets to the conductor. Both engines supposed they had a clear track ahead and had the throbbles of their engines well open, and somewhere between Roseburg and Greens they suddenly crashed into one another with the results above named. The engines were not derailed but were completely telescoped. The dead and injured, were taken to Roseburg where medical aid was secured for the wounded.

A wrecking train was sent out from Roseburg and it was thought that it would not take long to clear the track, as neither of the engines left the rails. No 15 the Portland overland train, is now at Roseburg until 11:45 tonight and it will probably not be delayed any.

A MISTAKE.

Gov Penneyer Will not Speak Here As Announced.

Daily Guard, October 6.
The Guard announced yesterday, on authority of the Portland Tribune that Ex-Governor Penneyer would speak here on October 25. It is now given as a mistake and his many friends must be disappointed.

The Tribune of Monday evening says: "The only appointments made by Mayor Penneyer to speak during the presidential campaign are as follows: The Dalles, Oct. 8; Pendleton, Oct. 9, and Spokane, Oct. 10. These were given as the only official dates by the mayor this morning. He is unable to make many speeches owing to his position as head of the city government, which requires almost his entire time. If the mayor had an assistant with whom he could leave the office in charge during his absence, he could canvass the state thoroughly and do unlimited good for the silver cause."

A HOLOCAUST.
