The wheat market continues to The local market is now supplied with the choices. Oregon grapes, the angler portion of which come from D W Chelistre's vineyard about a mile and a half south of town. Yesterday events a two writer had the pleasure of choicest quality of grapes that the world grows.

Mr Coolidge has two acres in grapes, and has 70 varieties, it being principally an experimental vineyard. Tae different varieties have been in growth from three to six years and with careful and proper culture have thrived most wonderfully, proving almost en-tirely without fail every year the most prolific bearers of the choicest quality fruit that the world produces, vineyard is located on the hills south town and has an elevation of about 500 feet above the city. It is situated on the cust and south side of a sloping hill and gets the benefit of the morn-

EUGENE, OR., Oct. 3, 1896. EDITOR GUARD: - Dear Sir: In your issue of September 30th, it is stated that there has been a failing off in the number of students in the University of Oregon compared with last year. I beg leave to make a correction. number of students registered the first week of school last year was 240. That number was increased to 333 during visiting the vineyard and gorging him-self upon the choicest varieties and the an attendance of 300 the first week and we now have 325 enrolled on the books. As to the falling off in the number of old students, I will say that the per cent. is not greater than in former years. The graduating class was larger last year than in former years and their absence from the University would give to the casual ob-server an idea that there was a falling off in the number of old scudents. New students are coming in every week and the outlook is very flattering con-sidering the partial failure of crops and the general financial depression. The senior class this year numbers 24. We expect at least 400 student this year.
