MATTERS OF INTEREST TO FARM. ER AND HOUSEWIFE.

the Broom Corn Crop and How to Care for It-Suggestion for Farm Schools-How the Times Are Made Worse-Farm Notes.

Caring for Broom Corn. The broom corn crop is of vast imstance and it is quite proper to give consideration as to how the crop a be best cared for, says a writer. ality and condition control the value broom corn as well as other comadities, and best condition can be essally obtained by following certain les and methods in caring for the

Cutting should be done before sorn is bleached out, as color is estial, and when green the brush posses advantages both in attractive. and for working. When corn hould be, as soon as possible, hauled nder cover, and have the seeds removd by running through the scraper. This ne, it should be placed on shelves so rranged as to admit of a free circulaon of air. In about ten days, if the reather is dry and all conditions are avorable, the corn will be ready to ale. It should be thoroughly examed, however, to see that it is dry and sured. After the broom corn is thorughly dry the next step is to bale and and attention. There are too many haky and lop-sided bales received anmaily and it bothers those who handle them to keep them from falling apart. being of great importance to keep the ends of the bales square and hich, having been evened by striking ace, and the one who places the brush apped in the interior. Use No. 9 fence

re, five to the bale, and it is not a ad idea to have a tighter wire to tie at ach corner, and press sufficiently to ave a good, compact, tight bale which sill endure the long journey and the andling. No matter how carefully and accessfully every step in the producon of the brush has been performed, he profit of the crop will depend, other nings equal, upon proper baling. Great are and attention should be given to aving the seeds removed, there being oo much fraud practiced by baling up rash, seeds and crooked corn in the bales with straight brush. Bale the rooked by itself .- Prairie Farmer.

A Suggestion for Farm Schools The agricultural college is undoubtedthe best place for a young man to arn the science of farming, but there re some who will not attend because y think that the college is not praccal enough. Would it be practicable large farmers to establish farm hey could employ young men who do not wish to attend an agricultural colege, but who wish to learn the best farm methods, have them work eight or with soft flannel or a bit of silk. en hours a day, the evenings to be eminstruct them in their studies; also everything about the plants scrupu-The young men, by having the advantage of such instruction, could afford work for less than ordinary wages; hey could thus get a very good educawhile otherwise the evenings would be spent in idleness. The farmer would be benefited, too, because he would get a good class of help and could afford to spend some time in instructing them because he would not have to pay so high wages .- Exchange. If there are no large farmers to open up such a school there are plenty of farmer boys in a neighborhood who could profit by such a school, which might be established by a number of farmers able to talk on agricultural topics and to impart practical knowledge in that line. Where this is impracticable some competent instructor ould be hired at a small expense to iose attending .- Rural New Yorker.

THE FARM AND HOME pure water, is practically indestructible. The more porous the tile is the more easily will drainage water leach through. Laid with porous tile, the pipes may be closely fitted, and yet effectually drain the land around them.

The porosity of tile is easily increased by mixing sawdust with clay before the latter is burned. The heat required to harden the clay sufficiently for use burns out the particles of sawdust, leaving a vacant place, and making the tile

for use than that of solid clay. In making brick especially for use in buildings the clay should be as little porous as possible. Brick buildings need painting every year or two to prevent the bricks from cracking, as they will when a sudden freeze occurs after a storm beating against them has filled their surfaces full of water.

Sowing Ryc After Turnips. Turnips will continue to grow after light frosts, and if the land is filled with weeds easily killed, the turnips will sometimes make a more vigorous Kinley's election is a victory for intergrowth in warm weather following a national bimetallism, and quoting the frost than they did before it. There money plank of the St. Louis platform. is a great deal of nitrogenous plant food in the soil late in the fall, and even the industrial sellers strengthened on the turnips cannot save it all. Rye can be receipt of the election news in the sown, and will get some growth even after the turnips have to be gathered. It is much better to have in the soil. over winter than it is to leave the soil naked. It is better for this purpose late in the season than is crimson clover, which will live, and by its growth then his operation should receive great care help to dry out land that is too wet and fit it for plowing.

Setting Currant Cuttings in Fall,

The currant roots more readily from cuttings than most other fruits. Its wood is, however, very soft, and if set nooth, the brush should be handed to late in fall the cuttings will be considthe packer in small lots, the butts of erably injured before spring by freezing and thawing. While the currant can securities showed advances. own upon a table or other smooth sur- bush is reasonably hardy on its own root, its cuttings will not get root to the box of the press should take care | hold them from being thrown out. They keep the butts up close against the should be heeled in during the winter, ids of the box and the brush property and be planted where they are to remain in spring.

Grapes for Winter Use.

Grapes need to be ripened wholly on the vine. They will not, like pears and apples, ripen in the cellar. The really ripe grapes will endure several degrees of frost. If this occurs early, so as to warrant some warm weather after it, some grape growers leave the grapes on the vines for some time after most of the leaves have been frosted. The grapes will ripen thus, but very slowly. It is a risky business, for a heavy frost sometimes comes and spoils those grapes left to ripen late.

Odds and Ends.

When an artery is severed compress above the spurting surface. Blood from the arteries enters the extremities. If a veln is severed compress below the spurting surface. Blood in veins returns to the heart.

To freshen tan-colored shoes, dissolve a tablespoonful of sait in a little warm cools in connection with their farms? water and add to a pint of cold water, in which an ounce of salts of lemon has been dissolved. Wash the shoes with this, and, when thoroughly dry, polish

THE FOREIGN PRESS.

Great Satisfaction Expressed at the

Triumph of McKinley, London, Nov. 6 .- The Standard save: 'Although McKinley is the champion of the financial policy designed to close the ports of the United States to British goods, there can be no doubt that his defeat of the free-silver candidate is a matter of satisfaction in this country." In a late edition the Westmuch lighter, while being even better minster Gazette says:

'The brokers found themselves overwhelmed the first thing this morning with orders from American dealers to buy in their behalf. Such an enormous amount of business has not been done in the course of a brief period since the days of the mining boom, and it is not only from the United States speculators here that the demand for Americans came. A large business, indeed, was

done in these securities in foreign markets, especially Paris and Brussels." The Bimetallic Leauge tomorrow will issue a manifesto claiming that Me-On the Glasgow stock exchange all United States. Business at the Baltic closed firm at

9d to 1s higher than yesterday, A cargo of No. 1 Northern spring wheat, November and December delivery, sold at 84s. Two cargoes of Azoff and Black sea wheat sold at 32s 6d and 32s 9d, respectively. Thirty-five shillings was bid for prompt Walla Walla Another cargo of California affoat sold for 5s 9d.

The Paris, Berlin, Vienna and Frankfort stock exchanges were in excellent tone and active today in consequence of the result of the election in the United States, and dealings in Ameri-

A dispatch to the Times from Glasgow says the general opinion there is that McKinley's election will give a great temporary stimulus to the British export trade in order to rush merchandise forward before Mr. McKinley comes into office. Higher tariffs are then expected to be enacted.

The sugar houses of Glasgow say they expect the duties on refined sugar imported into the United States will be raised 2 cents. With refined sugars selling at 9s per cwt, the possibility of loss to speculators is small. It is believed Americans will commence to buy largely for December, January and February delivery. There is no doubt there will be a rush to export woolen soft goods to America. Shipowners foresee little benefit, as most of the steam tonnage has already been chartered for spring.

The ironmasters say they have done without America for two years, and

will be able to continue without a single American order. The chief satisfaction in business circles is felt over the maintenance of the financial statu

"GREAT PERSONAL EVENTS."

A series of articles of unique interest has been undertaken by the Ladies'

Home Journal. It is to be called "Great Personal Events." and will sketch the most wonderful scenes of populuar enthusiasm and thrilling hittoric interest which have occurred in America during the past fifty years. Each one will be graphically detailed by an eyewitness, while leading artists have been employed to portray the

events in pictures made from old illu trative material. The series has just been started in the current number of the magazine, Hon. A. Oakey Hall, esmayor of New York city, sketching the "When Jenny Lind Sang 'n SCelle . Castle Garden," which still stands +s the greatest single concert in the annals American music. Mrs. Henry Ward Beecher in the following issue will tell of a remarkable scene in which her husband was the central figure: 'When Mr. Beecher Sold Slaves Plymouth Pulpit." Then Stephen Fiske will portray the forore and excitement When the Prince of Wales Was in America." Parks Godwin will follow this in a succeeding number with an account of the unparalleled excitement in New York "When Louis Kossuth

Russell Young will sketch "When Grant Went Around the World," Mr. Young being of General Grant's party The great scene in the senate chamber "When Henry Clay Said Farewell to the Senate" will follow. Lincoln will figure twice in the series: First, in a description of "When Lincoln was First Inaugurated," and, next, "When Lincoln was Buried." The stirring story of the discovery of gold by John

W. Mackay will be revived in "When Mackay Struck the Great Bonanza." The series will extend through all the numbers of The Ladies' Home Journal during 1897.

There is no form of energy that is so far reaching in its benefits to the welfare and comfort of the world as electrical energy.

A TENACIOUS CLUTCH

Is that of dyspepsia. Few remedies do more than palliate this obstinate complaint. Try Hostetter's Stomach Bitters, however, and you will find that it is conquerable, along with its symptoms, heartburn, datalence, herconsness and loss of field and vigor. Billounces and constitution frequently accompany it. These besides mularial, rhumatic and kidney com plaints, are also subduable with the Bitters.

They say in Texas that the cowboy of the future will use a wheel instead of a horse. One cowherder in Atchison, Kansas, already uses one.

Piso's Cure for Consumption is our only medicine for coughs and coids. --Mrs. C. Beltz, 439, 8th ave., Denver, Col., Nov. 8, '36.

Sun spots are believed to be openings, in the sun's photisphere, or luminous envelope through which the orb is seen.

Makes the Times Worse.

It is a fact without doubt that too nuch talk about hard times helps to make them worse. A farmer who is an occasional caller at the Rural Northwest, but never complains of hard on the subject. His reply was that it ould not do any good to complain about the hard times, and if everybody would keep a "stiff upper lip" and say nothing about the matter times would not seem half so hard and pretty soon they would not be so hard. The complainants' talk of hard times has a great effect in preventing people from engaging in new enterprises and prevents many people from spending bey who could well afford to do so .-Rural Northwest.

Bottled Grape Juice.

Pick the grapes from the stems and mash them. Strain the juice into a ketthe, boll it, remove the scum, strain it sodding. ato bottles and seal it as you would anned fruit. The bottle may be tighty corked and sealing-wax put on above e cork. If only a small quantity of fulce is to be used at one time, small ottles will be more convenient than larger ones. But it will keep sweet several days after being opened in ordinary weather. Lay the bottles on their sides in a cool, dark place. It will do to harm to strain the wine when the bottles are opened. Don't use sugar; t is unnecessary, and there is some danger of making grape jelly instead of wine. Thus made it will keep for years. Another way is to pick and wash the from certain taxes those who use wide grapes; add sufficient water to start tender, and strain as for jelly; add a the future nearly all wagons will have small amount of sugar, sufficient to wide tires. make it palatable; bring to a boil and cun in glass.-The Horticulturist.

Making Tile Forous.

In city sewers there is obvious advanage in having the outside of tile or pipe siazed, and having the pipes closely fitdrainage the more porous the is the bet- ing reading to pupils, but also at the ter. The burned clay out of reach of lines which will in the future be most frost, and coming in contact only with beneficial to them.

by lectures by other capable men. windows near the flowers close tight, the road, and directs that a new teras draughts are death to flowers. The drain pipe should be disinfected at least once a week in warm weather. Dissolve a nickel's worth of copperas in half a pailful of water, and gradually pour it down the pipe. An iron sink

may be kept from rusting by applying with a brush a quarter of a pound of asphaltum in spirits of turpentine. If the bottom crust of fruit ples is glazed with the white of an egg it will

This Shoe Picture

shows a stylish shoe; but does not show half of the shoe's strong points. It is plump call, call cipped, has tough, soft topping, reinforced lates stays, exits broad outside and maide hack stays, solid double soles and slug heels that can't be run over. Portland's Greatest Store offers this shoe to its mail order customers as a special bargain.

IN BOYS' SIZES, 11 TO 2. AT \$1.80 PER PAIR. IN BOYS' SIZES. 2 1-2 TO 6. AT \$2.20 PER PAIR.
