EUGENE CITY.....OREGON

Precious beyond price are good resofutions. Valuable beyond price are good feelings. Why is it that women think it neces-

sary to form a club before they are willing to appear in sensible clothes? It is to be hoped that Alfred Austin,

who is only a laureate, will not write an ode to the memory of William Morris, who was a poet,

Some farmers in Jersey are making money by raising pumpkins at five doilars a ton. Anybody can now see how popular the pumpkin pie has become. It is said at Madrid that Weyler bas

been ordered to bring the rebellion to a decisive issue." He has received these orders many times, but he has not carried them out, because he cannot.

All quarrels, mischiefs, hatred, and destruction, arise from unadvised speech, and in much speech there are many errors, out of which thy enemies shall ever take the most dangerous advantage.

No one can witness the life of a great and good man from day to day without imbibing something of its flavor, No one can hear the records of his life without venerating goodness more than ever before.

An English steamer has left Galveston for Liverpool with a cargo worth one million dollars-the largest load, it is said, that ever left an American port. The freight list was over seventy thousand dollars.

Youths are often carefully taught how to perform the various duties of their occupations, but seldom how to secure their performance by other people; yet in most of the pursuits of life the one knowledge is as requisite as the other.

If the Emperor of Russia and the German Emperor really believed in the divine right of kings, they ought to unite to put upon the throne of Constantinople the rightful heir thereto. Such an helr exists, in the person of a direct descendant of Constantine, and of the Comnenus, Nicephorus and Palacologus families-uniting in one individual the claims of all three dynastles. Surely, from the old-fashioned point of view, the title of such a claimant should be deemed valid.

In spite of prohibitory laws, duelling is still much in vogue in Italy, so as, indeed, actually to figure in the vital statistics as a cause of death. Between 1879 and 1895 no less than 3,444 duels were fought, 3,070 of them being with sabers. A total of 4,475 wounds were inflicted, no less than 70 of them causing death. It is significant that the greatest number take place in hot weather, and the least in winter. There is evidently some relationship between the state of the weather and that of the blood, or th temper.

The statesmen of Spain are virtual ly conceding that their nation is groaning under a weight that must ultimately ruln it. During September 30,525 men were drawn throughout Spain for military service. These conscriptions have given rise to much discontent and open opposition. It is charged by the opposition press that discrimination has been shown against republicans. The exempts are higher in some districts than in others, and at every turn of the conscription rack the internal feeling in Spain takes on more and more the character of civil revolt. If the present drift continues Spain seems certain to lose her dependencies, and under an "extension" of her creditors linger along for a while as a bankrupt and ultimately die of exhaustion.

The marriage of Miss Virginia Rouse to Mr. David Lee, the secretary of her father, was solemnized secretly in New York, then the forgiveness of Mr. Rouse was speedily obtained, and the episode brought up to the real point of interest, the breaking of the news to Mrs. Rouse. It is most unfortunate that a time was chosen for this ordeal when Mrs. Rouse was standing close to a quantity of bric-a-brac. It is true that she gave all this portable property, or at least as much as she could reach, to Mr. Lee, but it came so fast that its value as a wedding gift conilderably and rapidly depreciated. Mr. Lee appears to have been much struck by the rare generosity of his mother-in-law and a few more rare rases which he had been unable to fodge. But as Mrs. Rouse finally addad her reluctant blessing it turned out that family harmony was about the only thing in the house that remained anbroken.

A traveler tells a funny story about the neat capture of two thieves which he and his companions effected in a small town near the City of Mexico. They had one of the wing rooms of the inn, into which doors opened from the patio and the yard. The upper part of each door was arranged Venetian-blind fashion, for transom ventilation. Early in the morning they were awakened by slight noises, and saw, at each door, a dirty, yellow hand ou a long arm searching downward for the lock. His companion hit upon the plan of trapping the knaves with an old lariat lying on a table. They looped each end of it and silently snared the two wrists; then pulled the rope taut, knotted it, and left the thieves daugling outside the doors. The stolcal fellows uttered no sound, struggling vainly to sever their bonds with long, ugly knives. The travelers enloyed the situation, and went back to bed. At daybreak the landlord found the rascals and set up a howl that brought the whole town in an uprour to see the Indians, flattened against the doors, utterly unable to get loose.

A comparison of the muscular strength of woman with that of man, including every important group of

made by means of an improved dynamometer by Dr. J. H. Kellogg, of Battle Creek, Mich. The doctor concludes a paper containing elaborate tables of scientific measurements, with the following summary: 1. The strength of the average woman, in comparison with her weight, is less than two thirds that of the average man, as compared with his weight. 2. The strength of the average woman, in comparison with her height, is only four-fifths that of the average man, 3. The total strength of the average woman, as compared with the total strength of the average man, is .53. The weight of the average woman, as compared with that of the average man, is .So. The height of the average woman, as compared with that of the average man, is .92. It thus appears that the average woman, while less than the average man in height, is still more inferior in weight, and presents a still higher degree of inferiority in strength. A comparative study of men and women between 40 and 50 years of age would possibly show women to be somewhat inferior in weight.

One of the most curious results of the craze for bleyeling is to be observed in the ancient city of Coventry. It is, as is well known, the center of the bleycle manufacturing industry of England. There has consequently been a great rush of mechanics thither, to meet the demand of the workshops, and the city is unable to accommodate properly this addition to its population. Every available house is filled with tenants, and yet there are homeless men on the streets-industrious workingmen, with money in their pockets, but unable to find vacant lodgings. The health officer reports that more than 3,000 houses are so overcrowded as to be in an unsanitary condition, while the vaccination law has become practically a dead letter from the physical impossibility of executing it. Hundreds of new houses are going up as rapidly as carpenters and masons can build them, but they are only a small fraction of what is really needed, and in the meantime workingmen are camping out in tents and improvised sheds. And all because of a style of riding which good Lady Godiva never so much as dreamed of.

It is reported from New York that the Protestant Episcopal Church has decided to invade the evangelical field now occupied exclusively by the Salvation Army and the Volunteers. The new army, it is said, will be under the same form of military discipline and will seek to make converts in the same way from the streets. It will include the best features of the Salvation Army and Church Army of England, from which the Church Army sprung. The conspicuous auccess of the older organizations bespeaks a similar success for this new venture if it follows the same lines. The Salvation Army has done all the hard work in this country of fighting and conquering prejudice and retaining general respect, and it has made the way easy for any other similar organization to follow in its footsteps. It has been conceded that the people reached by these evangelical armies are of a kind who are beyond the pale of ordinary church influences, and certainly it is a wholesome religious movement that the corn that the good farmer threw to first man who led her to the altar. proposes to swell the number of these his feathered cratures with a liberal Wedded bilss was of short duration, evangelical agencies. If the Episcopa- hand. lians find their object as successful as fore all the denominations will have similar representatives in the field.

In 1834 there was probably not even chickens. He took a pint of corn and a semi-millionaire in New England, through the center-There were but thirty-five persons in of each kernel be Boston whose property was assessed bored a hole. ## Political Support.

An old chronicler tells of a pretty ineldent connected with Gen. Washington and the old-time election days Washington voted at all the Fairfax elections until the close of his life, uniformly supporting the Federal candidates.

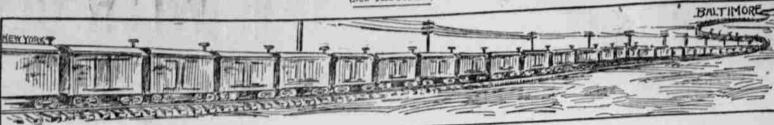

Although he lived at a distance from the court house at the Alexandria market, he generally voted early in the day. The polls were reached by a flight of steps outside the building, which in 1799 had become very shaky from old

When Gen. Washington reached these steps, he placed one foot upon them, and shook the crazy ascent, as if to discover how much strength was left in it. Instantly twenty brawny arms, one above the other, grasped the rickety stairway, and a dozen men's shoulders braced it firmly. Nor did a single man move from his position until the venerable chief had deposited his vote and descended the stairway.

"I saw the general's last bow," said atic career is drawing to a close. Once one of these supporters half a century off the stage she may find a charm in after that day, "and it was more than domestic life. kingly."

An Easy Living .- "Where are you name is Helen Louisa Leonard. Chiworking now, Mary?" "Ain't working cago was her girlhood home and her nowheres. I am in business for myself. I got a couple dozen ladies that pays me a quarter a week to come around and ask 'em for a place, and it makes the hired girl they got mad and her first stage success was achieved in and nibble it in the same way. 1887. Wheat at that time was selling at

steadily advanced until it reached 94%

cents. June 15 came the break, and in almost the turn of a die, wheat dropped

to 73. An idea of the tremendous ex-citement this occasioned may be formed

from the fact that the total trading on the Chicago board that day amounted to

100,000,000 bushels of wheat. The trad-

ing in New York the same day was 30,000,000 bushels. The total loss to the Harper clique by the collapse of the

corner was in round numbers \$3,500,000.

The total amount of wheat involved was 16,000,000 bushels. The sequel of this

corner, so far as Harper is concerned, is a matter of criminal history. The ruin thus forced upon him disclosed the fact

that he and one of his relatives had hy-

sothecated the securities of the Fidelity

Bank and robbed the depositors right and

left. For this Harper was sent to the penitentiary. One of the most unusual corners was "Old Hutch's" last flurry on

the Chicago board. It was not a precon-ceived affair. There was no more

system in his speculations than there is
