The following concerning the situation in New York state is from the last issue of the Ostego Republican:

"The hop market the past week has remained quiet, but there is a strong, firm feeling among the holders of choice hops, and the reports from all hop markets, the world over, are the same, a firm holding of choice hops.

The Commercial-Bulletin estimates the stock left back in this state at 35,-000 bales, which is only 10,000 bales above the estimates made by this paper, and we do not believe our estimate is too small. The government reports for the year ending June 30, 1890, show an increase in the number of brrrels of beer brewed to the extent of 2 204,087, thus necessiating an increased constill greater."
