

Eugene City Guard.

SA TUESDAY, APRIL 10.

Still on the lips of all we question
The finger of God's silence lies;
Will the lost hands in ours be folded?
Will the shut eyes ever rise?
O friend! no proof beyond this yearning
This outreach of our hearts we need;
God will not mock the hope he giveth,
No love he prompts shall vainly plead.

J. G. Whittier.

CAN CHANGE HIS SKIN.

"Can the Ethiopian change his skin, or the leopard his spots?" wrote the holy man in sacred writ. Prof. Blake, a Kansas scientist, says the Ethiopian can do that very thing and he will take the job of making a white man out of a dark-skinned without the least doubt of his ability to successfully perform the feat.

The Prof says the color of the negro is due to a carbon pigment underlying the skin and can be so transformed by electricity as to leave the subject with a fair complexion. This will be done by the decomposition of the molecules of carbon. It only remains to find a practicable method for applying the electricity to be able to wipe out the color line for all time.

Senator Mark Hanna evidently believes he is still engineering a presidential or some other political campaign, as he continues to send out ready made editorials to the republican press. The motives of the arch-boodler are manifest when it is considered these appeals are made in the interest of monopolies and leeches upon the body politic. The old man is simply carrying out his ante-election contracts. The monopolies delivered the goods last November and now the people are called upon to make payment.

For the first time in twenty-eight years Ohio has two republican representatives in the United States senate. Invariably republican on national issues, and generally so in state contests, it has been Ohio's strange fortune that her representation in the senate has been uniformly divided between the parties for nearly thirty years.

General Coxey says the people's party is practically dead. He states that a new party, name unknown at present, will be organized at Nashville next July. Its principles will be the government control of railroads and the issue of non-interest-bearing bonds, abolishing gold.

Governor Budd of California is not holding down the gubernatorial chair as a matter of fun. The other day he got his pen into use and promptly vetoed over \$2,000,000 of unnecessary appropriations that had been made by a complacent easy going legislature. A governor like that earns his salary.

Local election returns from Ohio and Michigan show an almost unbroken series of democratic victories. Cincinnati may be given as a sample. In November the city gave McKinley 20,000 plurality; now it is democratic by over 7,000, while the vote is but 13,000 short of the presidential vote.

Stratton, the Cripple Creek millionaire, refuses to go into any money making schemes. "What I am trying to do," says he to promoters, "is to keep my income down within the limits of decency."

The Lebanon Advance says the woman who thinks more of the ballot than she does of her baby will never boost this old nation forward many notches.

Klamath Reservation.

As many inquiries have been made we publish the following concerning the opening of the Klamath Indian reservation to settlement:

"Letters from all parts of the Pacific slope are coming to the Oregon City land office making inquiry concerning the Klamath Indian reservation, the impression having got abroad that a date for opening it to the public has been set. This impression probably grew out of an inaccurate note in a San Francisco paper wherein an inspector who had been sent out to examine the Klamath reservation was quoted as praising the richness of the land and in such manner as to give the inference that it was open to settlement. That reservation does not lie in this land district at all, but is in the Lakeview land district. However, it has not been opened for settlement.

The president will issue a proclamation, and the register and receiver of the Lakeview land office will give ample notice of the opening before it takes place."
