### HIS MAIDEN SPEECH.

ate's Dry Bones.

Washington, April 23,-Senator Mason, of Illinois, made his maiden speech in the senate today, and signalized it by some breezy criticisms on the rules of the senate. It was such a variation from the prosy debate of recent days that the senator was accorded close attention, and twice received the hearty applause of the crowded galleries.

The speech was in support of a resolution introduced by the Illinois senator directing the committee on rules to report a rule by which debate could be

closed and the previous question be orsarcastically referred to the inaction of it, the long and fruitless debate on Cuba, and the delay of the arbitration treaty.

ly, pointing out that the other branch of congress was more open to criticism than the senate. He was in accord with Mason, however, on the need of new rules.

A vote was taken on Morgan's motion to refer the Mason resolution to -ayes 32, noes 24.

A further discussion of the subject is promised, as Hoar has pending a resolution to discharge the committee on rules from further considering the reform of the rules. Most of the day was given to the bankruptcy bill. It was agreed that a committee of fifteeen senators should represent the senate at the coming Grant monument ceremonies.

### SPANISH EXECUTION.

#### A Cuban Insurgent Met His Death Bravely.

New York, April 22 .- A Journal dispatch from Havana says:

Pedro Garcia, who was shot yesterment, his turn finally came to be tried now. a week ago. He was taken before a summary court. The entire court-martial lasted about fifteen minutes, and Garcia was sentenced to death, al-

read the death sentence until last night, twelve hours before he was shot. Promptly at 7 o'clock last night a

cell. The captain in charge of the prisoner called "Pedro Garcia." "Present," was the answer.

"Prepare to come out," said the captain.

'Open," replied Gareia; "I am ready." He spoke as cooly as if he brewing, \$18@19. had been going out to sup with a friend instead of "capilla."

There was an ominous rattling of keys, the sliding of heavy bolts and then the ponderous iron swung slowly

'Farewell to all," said Garcia. "Farewell, and courage," exclaimed his comrades, with husky voices.

Garcia paused in the passage and called back: "At last I will gain liberty."

#### Planting Apple Orchards,

How far apart should apple trees be planted? The small, thin, whiplike trees with a few roots attached look very lonesome when set at the proper distance apart. It requires strong imagination and some faith to see these in the future, spreading fifteen to eighteen feet on either side, and with branches that interlock each other. Yet they will surely do it if not planted forty feet apart. And on good ground,

Greening and Baldwin, is none too near. The Northern Spy apple grows more upright, and that may be planted thirty feet apart, partly to crowd the

Barley-Feed barley, \$17.50 per ton; roots and induce earlier bearing. But even with the Northern Spy we should Millstuffs - Bran, \$14.50; shorts, prefer to have the trees planted forty feet apart, and then plant in between the rows peach trees or dwarf pear trees to produce a crop until the apple Potatoes-Oregon Burbanks, 55@65c; trees come into bearing. kind kills them, as it closes the pores through which they breathe. It is much better to rub lard or fat of any kind on the necks of cattle and around the head than to apply large amounts of

kerosene, which has usually the cifect of taking off the hair. If kerosene oil is used, make it into an emulsion, with ten times its bulk of water, and using enough soap to make the oil and water thoroughly mix. This closes the porce Barley-Rolled or ground, \$20 per and is just as effective as stronger doses.

Farmers Who Are Land Poor.

Farmers who have as much land as they can properly attend to frequently rent other farms and extend their op erations. They cannot do this profit ably unless they depend upon fer'll izers. But few farms receive a sufficlency of manure, and when the farme er undertakes to cultivate more land he must either impoverish the land or add something to it. It is better to use les sland and increase the yield. If the land can be made to produce more without enlarging the area the cust of the crop will be reduced. Hundreds of farmers are land poor and pay taxes on land that cannot be made to pay because the efforts are not concentrated on less space.

#### As to sheep.

Slicep are the most profitable stock on the farm. Those who go into sheep raising extensively find it a profitable business, but a small flock on every farm is nearly all profit. There is no animal that will convert the weeds and wastes that grow on every farm into

#### Farm Notes

The editor of one of the leading dairy journals states that if one-half of the cows now giving milk, intelligently selected for that purpose, could be slaughtered within a week, the remaining half would yield a greater profit than is now realized from the whole, The feeding of cut hay and pulped roots to stock demonstrates that steers will make a larger gain in weight than when the same foods are fed unprepared, as much as 33 per cent. Increase having been noticed. This indicates that it will pay to give careful preparation of the food.

Cottonseed Meal.

Oleomargarine does not injure the sale of butter as much as does the large amount of inferior butter put on the market by farmers, due to either a lack of knowledge of butter making or carelessness in the work. There is a separate and distinct market for choice butter, and it sells readily at good prices during every season of the year. Sheep seem to escape disease only when the flock is guarded. As long as farmers buy sheep to bring on the farm for fattening, instead of raising their sheep and using pure breeds, they will have scab, footrot and other difficulties to meet. If the flock is healthy do not incur any risk by buying other sheep to put with them.

Sandy soil is usually deficient in lime and potash, hence any expenditure for those substances to be applied where the land is sandy should prove a profitable investment. Clover can be grown after such substances are used, and the hand will then make a gain in nitrogen. It is not necessary to give heavy dressings of lime, but apply it lightly in the spring and fall,

One of the best kinds of grafting wax for general use is made of four parts rosin, two parts beeswax and one part tallow. Melt together, pour into a pail of water, and pull like molasses candy. Almost any wax will melt in the sun in the hottest summer days, and should be covered with cloth or paper. If you want a harder wax than this add one part more rosin. You can try this wax by a hot stove and find out its melting point.

Tobacco growers are combating the worms by using a spray of one pound of Paris green to 160 gallons of water. Use a knapsack sprayer, with agitator attachment. If it is not desirable to use Paris green on the plants, the moththat lays the egg may be destroyed by taking the bloom of the Jimson. weed; place them alogag the tobacco rows in an upright position, and inject into each bloom, with a small, clean can, some of the following mixture:-One plut water, one-fourth plut honey,

# Gladness Comes

With a better understanding of the transient nature of the many physical ills, which vanish before proper efforts-gentle efforts-pleasant efforts-rightly directed. There is comfort in the knowledge, that so many forms of sickness are not due to any actual disease, but simply to a constipated condi-tion of the system, which the pleasant family laxative, Syrup of Figs, prompt-ly removes. That is why it is the only remedy with millions of families, and is everywhere esteemed so highly by all who value good health. Its beneficial effects are due to the fact, that it is the one remedy which promotes internal cleanliness without debilitating the organs on which it nets. It is therefore

all important, in order to get its bene-ficial effects, to note when you purchase, that you have the genuine article, which is manufactured by the California Fig Syrup Co. only and sold by

all reputable druggists. If in the enjoyment of good health, and the system is regular, laxatives or other remedies are then not needed. If afflicted with any actual disease.

may be commended to the most skillful physicians, but if in need of a laxative, should have the best, and with the well-informed everywhere, Syrup of Figs stands highest and is most largely Med and gives most general satisfaction.
